

## ANNEX A

Meeting Note – Highways England update on A1 strategic Study 7<sup>th</sup> June 2017

 – HE  
– CBC  
– CBC  
– HE

Arranged for HE to give an update on the A1 E of England study and next phase of work

WSP have been appointed to undertake further study which specifically looks at option B

This time will be focussed on looking at smaller sections of the A1 in CBC/BBC  
Looking at individual benefits of a number of options including potential offline solution between Lower Caldecote and Eaton Socom

Focus on what will support growth, “art of the possible” - best options that are achievable plus relationship with development will improve cost benefit  
Using regional Traffic model / DfT forecasts, aim to complete work in the Autumn, which I said would work with our LP timetable

Alan asked us to provide maps of where the New town proposal is – would be worth sharing as much info as we can.- also suggested that the promoters could start having conversations with HE

Agreed the need for more regular stakeholder group meetings once a month- next meeting arranged 6<sup>th</sup> July 17

Further meeting would be beneficial to discuss HE response prior to end of the draft plan consultation in August – CBC to suggest
