Syndromic indicators at a glance:

Indicator	Trend	Level *
Cold/flu	increasing	similar to baseline levels
Fever	decreasing	below baseline levels
Cough	increasing	below baseline levels
Difficulty breathing	increasing	below baseline levels
Sore throat	no trend	below baseline levels
Diarrhoea	no trend	below baseline levels
Vomiting	no trend	below baseline levels
Eye problems	no trend	below baseline levels
Heat/sun impact	no trend	similar to baseline levels
Insect bites	no trend	similar to baseline levels

*Since week 47 2014 new baselines have been introduced for comparison with previous years.

Data summary:

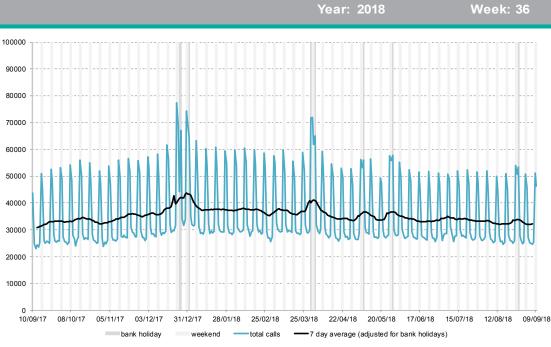

Year	Week	Total calls
2018	36	197,840

WW Public Health England

11 September 2018

1: Total calls.

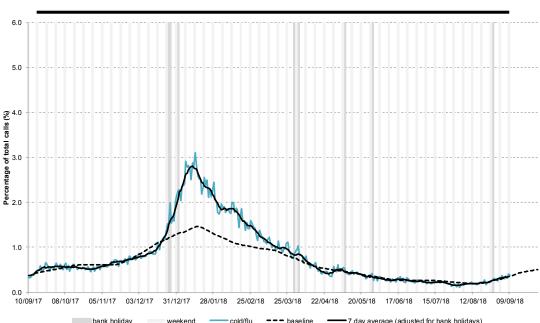

The total number of syndromic calls recorded each day by NHS 111.

Remote Health Advice

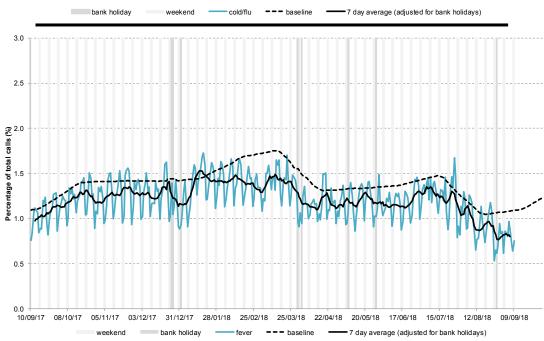

2: Cold/flu

Daily 'cold/flu' calls as a percentage of total calls. Baselines are constructed from historical data since 2013.

3: Fever

Daily 'fever' calls as a percentage of total calls. Baselines are constructed from historical data since 2013.

With Public Health England

11 September 2018

4: Cough

Daily 'cough' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

5: Difficulty breathing

Daily 'difficulty breathing' calls as a percentage of total calls. Baselines are constructed from historical data since 2013.
