

Medical Device Alert

MDA/2018/030

Issued: 19 September 2018 at 11:00

Valid until: September 2019

Flex connectors in Halyard Closed Suction Kits – risk of interruption of ventilation

Summary

Manufactured by Halyard Health – risk of some Flex Connectors in Closed Suction Kits becoming loose or disconnecting, which may interrupt patient ventilation.

Action

- Identify the affected devices as stated in the manufacturer's [Field Safety Notice](#) (FSN).
- Ensure that all users receive the manufacturer's FSN and that they understand the problem and actions to be taken.
- Refer to the FSN for actions to be taken.
- Report adverse events involving these devices through your local incident reporting system and/or your national incident reporting authority as appropriate: [England](#), [Scotland](#), [Northern Ireland](#), [Wales](#). You should also report directly to manufacturers if your local or national systems do not.

Action by

All healthcare staff involved with patient ventilation.

Deadlines for actions

Actions underway: 03 October 2018

Actions complete: 17 October 2018

Medical Device Safety Officers (in England): ask the manufacturer to add you to their distribution list for field safety notices (FSNs). This is to help with reconciliation.

Remember: if your organisation receives an [FSN](#) from a manufacturer, always act on it. **Do not wait** for a communication from MHRA.

Problem / background

The manufacturer found certain Flex Connectors supplied with Halyard Closed Suction Kits with Flex Connector may become loose or disconnect before use or during use.

If disconnection occurs during use, it will result in an open respiratory circuit and interrupt patient ventilation.
