

2014 to 2020 European Structural and Investment
Funds Growth Programme

Call for Proposals
European Regional Development Fund

Priority Axis 6: Preserving and Protecting
the Environment and Promoting Resource
Efficiency

Managing Authority:	Ministry of Housing, Communities and Local Government
Fund:	European Regional Development Fund
Priority Axis:	Priority Axis 6: Preserving and Protecting the Environment and Promoting Resource Efficiency
Call Reference:	OC12R18P 0869
Local Enterprise Partnership Area:	Greater Birmingham and Solihull
Area Indicative Fund Allocation:	£3,550,000 (£2,800,000 for More Developed Region) (£750,000 for Transition Region)
Call Open:	Friday 5 October 2018
Call Closes:	23:59 on Friday 23 November 2018

1. Introduction

The 2014 to 2020 European Structural and Investment Funds bring the European Regional Development Fund, European Social Fund and part of the European Agricultural Fund for Rural Development together into a single European Union Structural and Investment Funds Growth Programme for England supporting the key growth priorities of innovation, research and development, support for Small and Medium Sized Enterprises, low carbon, skills, employment, and social inclusion.

The Government has confirmed that it will guarantee funding for ERDF projects that are contracted by the end of 2020.

All contracted ERDF projects must be completed by the end of the programme period, 31 December 2023. Each application for ERDF will be required to demonstrate that it delivers good value for money and domestic strategic priorities.

The funds are managed by the Ministry of Housing, Communities and Local Government for the European Regional Development Fund, Department for Work and Pensions for the European Social Fund and the Department for Environment, Food and Rural Affairs for the European Agricultural Fund for Rural Development. These Departments are the managing authorities for each Fund. In London, the Greater London Authority acts as an intermediate body for the European Regional Development Fund and European Social Fund programmes. In some other areas, intermediate bodies are being designated by the Ministry of Housing, Communities and Local Government and the Department for Work and Pensions to perform the following tasks:

- Input into project calls in respect of local development needs (with reference to ESI Funds Strategies); and
- Assessment of applications against certain selection criteria in relation to fit with local priorities in respect of the European Regional Development Fund and European Social Fund.

The managing authorities and intermediate bodies work closely with local partners on ESI Funds sub-committees in each local enterprise partnership area. Partners on these sub-committees provide:

- Practical advice and information to the managing authorities to assist in the preparation of local plans that contribute towards operational programme priorities and targets;
- Local intelligence to the managing authorities (or intermediate bodies where designated) in the development of project calls that reflect operational programme and local development needs as well as match funding opportunities; and

- Advice on local economic growth conditions and opportunities within the context of the operational programme and the local European Structural and Investment Funds strategy to aid the managing authorities' (or intermediate bodies where designated) assessments at outline and full application stage.

This call is issued by the Ministry of Housing, Communities and Local Government and invites outline applications in respect of the European Regional Development Fund for England 2014 to 2020.

2. Call Context

On behalf of the national Growth Programme Board, the Ministry of Housing, Communities and Local Government (the managing authority) invites applications seeking European Regional Development Fund support under:

Priority Axis 6 Preserving and Protecting the Environment and Promoting Resource Efficiency

Investment Priorities:

- 6d** Protecting and restoring biodiversity and soil and promoting ecosystem services, including through Natura 2000, and green infrastructure
- 6f** Promoting innovative technologies to improve environmental protection and resource efficiency in the waste sector, water sector and with regard to soil, or to reduce air pollution

The **European Regional Development Fund operational programme for England 2014 to 2020** sets out how the European Regional Development Fund will focus on investment to support economic growth and job creation. **Priority axis 6** of the operational programme aims to preserve and protect the environment and promote resource efficiency.

Any application for funding will be required to clearly demonstrate that it provides good value for money and supports domestic strategic priorities. Applications must meet the requirement of, and make a meaningful contribution to, the delivery of the relevant priority axis of the [European Regional Development Fund Operational Programme](#) and where appropriate should reflect how such support will aim to improve productivity levels within small and medium sized enterprises.

In addition, applications will be expected to meet identified local development needs, as expressed in the scope of this call and as set out in the [GBSLEP](#) European Structural and Investment Funds strategy.

Applicants are advised to familiarise themselves with the detail of the operational programme, local European Structural and Investment Funds strategy and the relevant documentation listed in sections 5 through to 8 **prior to** submitting an outline application.

3. Scope of the Call

3.1. Scope

This call invites outline applications which support the delivery of priority axis 6 of the European Regional Development Fund operational programme and respond to the local development need set out in the [GBSLEP](#) European Structural and Investment Funds strategy.

<p>Indicative fund allocation:</p>	<p>Indicatively, through this call the managing authority expects to allocate up to £3,550,000 of which £2,800,000 is for the more developed region and £750,000 is for the transition region).</p> <p>The managing authority reserves the right to invite to full application (and subsequently approve) projects that have a cumulative value that is higher or lower than this indicative allocation, subject to the volume and quality of proposals received. The managing authority may also decide to place some projects submitted through this call on a reserve list and invite them to proceed at a later date, subject to the availability of funding.</p> <p>There is no indicative allocation of European Regional Development Fund funding between capital and revenue activity, both capital and revenue is eligible dependent on the nature of activities / investment priorities set out in the call.</p>
<p>Minimum application level</p>	<p>European Regional Development Fund investment is intended to make a significant impact on local growth. Applications are expected to demonstrate appropriate scale and impact. The managing authority does not intend to allocate less than £250,000 European Regional Development Fund to any single project. Consequently projects with a total value of less than £500,000 in the more developed region (at 50% intervention rate) or £416,667 in the transition region (at a 60% intervention rate) will not normally be supported under this call</p>
<p>Duration of project activity</p>	<p>Projects should plan to deliver activity for a maximum of three years, however the managing authority reserves the right to vary the maximum duration, upwards or downwards.</p>
<p>Geographical scope</p>	<p>The England European Regional Development Fund</p>

	<p>operational programme operates on a national basis. All eligible European Regional Development Fund expenditure must benefit organisations located in England.</p> <p>Revenue projects should predominantly support businesses based within the local enterprise partnership area of this call.</p>
Specific call requirements	<p>Please note: Value for Money and alignment with Strategic Domestic Priorities will form a key part of the assessment and appraisal of all applications. Therefore proposals should clearly articulate and demonstrate how activities align with domestic strategic priorities and offer good value for money.</p>
Call deadlines	<p>For this specific call, applications will be assessed after the close of the single deadline.</p> <p>Applications received after the published call close date will not be considered. All applications will be assessed following closure of the call.</p>

3.2. Local development deed

Projects must deliver activity which directly contributes to the objectives of priority axis 6 of the operational programme, one or more of the relevant investment priorities and meet the local development need expressed in the table below.

Local Development Need
<p>Local growth priorities:</p> <ul style="list-style-type: none"> • There is ongoing need for development to support economic growth through better utilisation of land. The Greater Birmingham and Solihull Local Enterprise Partnership’s Strategy for Growth sets out important development sites namely UK Central (a strategic plan for the development of an area of Solihull including the M42 gateway, Birmingham Airport, the NEC and a Jaguar Land Rover investment site); the enterprise zones, and the Enterprise Belt (a collection of development and investment sites that straddle the Greater Birmingham and Solihull Local Enterprise Partnership area). • The Greater Birmingham and Solihull Local Enterprise Partnership also has natural assets such as the woodlands of Wyre Forest and the canal and river networks that run through the GBSLEP area. The Natural Environment White Paper (2011) The Economics of Ecosystems and Biodiversity Study - shows that protected natural areas can yield returns many times higher than the cost of their protection. Projects must aim to increase the surface area of habitats

supported to attain a better conservation status.

- The Greater Birmingham and Solihull Local Enterprise Partnership area has specialism in this field; Birmingham has published the [Green Living Spaces Plan](#) a world leading assessment of how the city's needs are currently being met by its current network of natural assets, or ecosystem, which provides a blueprint for change as a single multi-layered challenge map
- In addition, the Greater Birmingham and Solihull Local Enterprise Partnership suffers from Urban Heat Island effect which is concentrated on Birmingham and Solihull which exacerbates the need for refrigeration and cooling and increases the overall energy consumption for cooling (i.e. refrigeration and air-conditioning). Green infrastructure has been shown to have a cooling effect and can be designed in to support the resilience of businesses and sustainable economic growth.
- Waste emissions are predominantly methane, a greenhouse gas which arises as biodegradable waste decomposes in landfill. While Greater Birmingham and Solihull Local Enterprise Partnership local authority domestic waste has been falling, there remains scope for further reductions, while a problem is looming with commercial and industrial waste which is forecast to rise over the decade to 2020 by almost 50%. There is therefore a continued need for waste processing and re-use to combat Green House Gas (GHG) emissions and wasted resources.
- There are significant opportunities to reduce the use of virgin materials through waste management and waste as a resource in combination with translating information into action via area assessment, networking and innovative approaches for the reuse of materials and waste in support of the performance of businesses and carbon reduction and emissions
- In relation to this call, projects should address the following market failures identified in the Greater Birmingham and Solihull Local Enterprise Partnership European Structural and Investment Funds Strategy (Priorities Appendix Page 200) and design projects with reference to Priority 3 in the same strategy relating to green and blue infrastructure' and waste and resource management
- 6d Protecting and restoring biodiversity and soil and promoting ecosystem services, including through Natura 2000, and green infrastructure
- Market failure: Investments in Green and Blue infrastructure and actions that support the provision of ecosystems services on which businesses and communities depend to increase local natural capital and support sustainable economic growth.
- 6f Promoting innovative technologies to improve environmental protection and resource efficiency in the waste sector, water sector and with regard to soil, or to reduce air pollution

- Market Failure: Investment in the uptake of innovative technologies and resource efficiency measures to increase environmental protection, resilience and performance of businesses and communities
- Simultaneous bids to multiple local enterprise partnerships are welcome, to encourage cross-local enterprise partnership activity and delivery at greater scale and with wider reach, and which meet the priorities of both local enterprise partnerships in regards to Priority Axis 6

Local priorities:

Proposals should demonstrate alignment with local development need and priorities including:

- The planning policy for the relevant local authority areas.
- Specific subject - related strategies such as the Stoke and Staffordshire Joint Municipal Waste Management Strategy.
- Significant local development plans that include green and blue infrastructure such as the UK Central Masterplan, and Birmingham Curzon HS2 Masterplan for Growth
- Green Living Spaces Plan which contains a world leading assessment of how the city's needs are currently being met by its current network of natural assets, or ecosystem, which provides a blueprint for change as a single multi-layered challenge map.

In addition:

- Projects are encouraged to collaborate where appropriate to achieve synergy of operation and to avoid duplication.
- GBSLEP has set up a growth hub to support business within its area. All projects should consider the linkages they can make to facilitate sharing of information to enable small and medium sized enterprises to access funding sources.
- GBSLEP encourages projects where possible to be of suitable scale
- If applicants wish to learn more about the European Structural and Investment Fund Strategy and how their potential projects can contribute to it, they may find it helpful to contact the European Regional Development Fund technical assistance project for the Greater Birmingham and Solihull Local Enterprise Partnership via their dedicated inbox at <mailto:esif@solihull.gov.uk>.
- Information on the Greater Birmingham and Solihull Local Enterprise Partnership technical assistance project with links to the European Structural and Investment Funds can be found on the Greater Birmingham and Solihull Local Enterprise Partnership's [website](#).

3.3. Operational programme investment priorities

Applications must specify the activities to be delivered and must directly contribute to **one or more** of the following investment priorities:

Investment priority	6d – Protecting and restoring biodiversity and soil and promoting ecosystem services, including through Natura 2000, and green infrastructure.
Specific objectives	Investments in green and blue infrastructure and actions that support the provision of ecosystem services on which businesses and communities depend to increase local natural capital and support sustainable economic growth
Indicative actions	<p>Activity supported to achieve this specific objective will focus on investment in green infrastructure; definitions are set out in the National Planning Policy and in Natural England’s Green Infrastructure guide¹. Blue infrastructure is a sub-set of this and refers to the water-related features (rivers, ponds, lakes etc) that play a crucial role in providing benefits to people and wildlife.</p> <p>Activity can include site clearance, soil de-sealing, decontamination and land remediation, but only where these directly contribute to an area’s green and blue Infrastructure / natural capital which are the primary objective of the interventions.</p> <p>Sustainable drainage can be a design function incorporated within green infrastructure. It can also make a contribution to the provision of green infrastructure, where natural solutions are used to provide such a function. Furthermore the volume and quality of water that flows into blue infrastructure, such as rivers, ponds and lakes, has a fundamental impact on their health and condition. Sustainable drainage can help improve this.</p> <p>Under this investment priority, indicative actions to be supported by European Regional Development Fund may include:</p> <ul style="list-style-type: none"> • Investment in green and blue infrastructure such as green corridors in urban areas and waterways; • Sustainable drainage to improve water quality and in some cases local air quality; and

¹ <http://publications.naturalengland.org.uk/publication/35033?category=49002>

	<ul style="list-style-type: none"> • Urban greening including measures which improve air quality and reduce air pollution such as street planting.
--	---

Investment priority	6f – Promoting innovative technologies to improve environmental protection and resource efficiency in the waste sector, water sector and with regard to soil, or to reduce air pollution.
Specific objectives	Investment to promote the development and uptake of innovative technologies, in particular in resource efficiency, in order to increase the resilience and environmental and economic performance of businesses and communities.
Indicative actions	<p>The aim is to help businesses optimise the use of resources in ways that improve business performance in terms of resilience, profitability and competitiveness while at the same time contributing to the protection and preservation of the environment.</p> <p>Under this investment priority indicative actions to be supported by the European Regional Development Fund may include:</p> <ul style="list-style-type: none"> • Provision of support and advice for businesses in the adoption of innovative technologies and processes for the management and reuse of energy, materials, water and waste (including recycling and recovery). • Provision of support for the piloting and demonstration of innovative technologies to promote resource efficiency in order to encourage their greater take-up.

4. Required Outputs under this Call

Applicants will need to demonstrate how the eligible activity, funded by the European Regional Development Fund will achieve the programme-level outputs for priority axis 6.

For projects proposing to deliver activity against more than one investment priority, the appropriate outputs should be selected. Project will be required to report on, and evidence, the achievement of the outputs separately under each investment priority.

For projects coming forward under this call the expected outputs and results are:

Investment Priority 6d	
Output reference	Name
C22	Total surface area of rehabilitated land
C23	Surface area of habitats supported in order to attain a better conservation status

Investment Priority 6f	
Output reference	Name
C1	Number of enterprises receiving support
C5	Number of new enterprises supported
C29	Number of enterprises supported to introduce new to the firm products

The managing authority expects the level of outputs proposed within outline applications to be realistic and achievable and to deliver good value for money. The application should clearly state the methodology used to determine the levels of outputs proposed.

Projects will only be supported if they demonstrate good value for money. An important consideration when assessing value for money is the level of European Regional Development Fund outputs that the project would deliver.

The managing authority has not set specific output targets for this call and does not publish average or expected unit costs.

The local European Structural and Investment Fund strategy for each local enterprise partnership area includes details of the local, notional European Regional Development Fund allocation to each priority axis and the type and number of European Regional Development Fund outputs that are expected in return for this investment.

All operations will be required to report regularly on progress toward achievement of targets. This will need to include both quantitative and qualitative data relevant to

the appropriate geographical areas. Applicants will need to explain how they will collect and record this information to maintain a fully evidenced audit trail. It should be noted that if an operation fails to deliver contracted outputs, a performance penalty may apply.

5. Application Process and Prioritisation Methodology

There are two stages to the European Regional Development Fund application process:

- (i) Outline application and, if successful
- (ii) Full application.

Acceptance of an outline application to progress to full application stage does not in any way indicate or constitute an offer of European Regional Development Fund grant.

Applicants must fully complete the [outline application](#) which will be assessed by the managing authority against all of the national [selection criteria](#) except where an intermediate body has been designated to assess against some of the selection criteria. Where an intermediate body has been designated to undertake delegated tasks, the intermediate body will undertake the assessment against the selection criteria in relation to fit with local priorities.

Outline applications will be assessed in two stages, Gateway assessment and Core assessment.

The Gateway assessment is undertaken by the managing authorities and considers:

- Applicant eligibility;
- Activity and expenditure eligibility; and
- Fit with the National operational programme and the local development need set out in section 2.

Applications that fail the Gateway assessment undertaken by the managing authority will be rejected. Applications which pass the Gateway assessment will then be assessed by the managing authority in relation to all Core assessment criteria.

In areas where an intermediate body² has been designated, the following will apply:

The intermediate body will assess the application against the following Core assessment criteria:

- Local strategic fit

² This process works differently for the Greater London Authority. Please contact the Greater London Authority for further details.

The managing authority will assess the application against the following Core assessment criteria:³

- National strategic fit;
- Value for money;
- Management and control;
- Deliverability;
- Compliance; and
 - Procurement
 - State Aid
 - Publicity requirements
- Cross cutting themes
 - Environmental sustainability
 - Equal opportunities

The intermediate body will also provide advice to the managing authority to assist the managing authority to make its assessment against the following Core selection criteria:

- Value for money; and
- Deliverability.

Having assessed projects against these criteria the relevant local enterprise partnership area European Structural and Investment Funds sub-committee will advise the managing authority or intermediate body as relevant on the contribution to local economic growth conditions and opportunities within the context of the operational programme and local European Structural and Investment Funds strategy to aid the managing authority's assessments (at outline and full application stage).

Having concluded their assessments the managing authority and the intermediate body will prioritise the applications they wish to proceed based on their assessment against their respective selection criteria. Only projects that the managing authority and the intermediate body each agree should proceed, based on their respective core selection criteria, will be invited to submit a full application. Subsequently only those full applications that the managing authority and the intermediate body each agree should proceed, based on their respective selection criteria, will be approved.

Please note that the managing authority's decision is final and there are no appeals. If you wish to complain about the calls and application process, please follow the procedure set out at <https://www.gov.uk/government/organisations/department-for-communities-and-local-government/about/complaints-procedure>.

Potential applicants / applicants may wish to take advantage of information and support services funded through European Regional Development Fund Technical Assistance and available to assist the design and development of compliant projects / applications for European Regional Development Fund. Details of your local Technical Assistance funded project can be found on the [Technical Assistance website page](#).

For calls under investment priority 6d, please note:

All green infrastructure projects are required to make a contribution towards biodiversity priorities (especially relating to national objectives to increase the provision of water, grass and woodland habitats) and in addition proposals will need to clearly show how they deliver at least one of the socio-economic benefits of Green Infrastructure below:

- Flooding alleviation and Water Management;
- Pollution management / control / regulation (water and air);
- Economic growth and Investment (new market opportunities);
- Health, well-being, recreation and leisure (linked to a growth benefit);
- Provision of products from the land; and
- Climate change adaptation and mitigation.

In determining which projects should be eligible for funding reference should be made to the relevant sections of the National Planning Policy Framework relating to the environment and green infrastructure; green infrastructure priorities set out in local plans; the Natural Environment White Paper (2011); Biodiversity 2020 (2011); and Natural England's Green Infrastructure guidance.

The UK's National Planning Policy Framework requires local planning authorities to "set out a strategic approach in their local plans, planning positively for the creation, protection, enhancement and management of networks of biodiversity and green infrastructure".⁴ Investments in green infrastructure should look to complement the priorities for multi-functional green space as set out in the relevant local plans.

Where an investment is planned for a site that is designated as part of the Natura2000 network, or sits in proximity to such a site, reference should be made to the Prioritised Action Framework to ensure any proposed interventions complement the designated site's objectives

⁴ https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/60777/2116950.pdf

6. General Information

6.1. National Eligibility Rules

When developing an application, Applicants must refer to the [National Eligibility Rules](#) setting out the requirements of the 2014 to 2020 European Regional Development Fund programme. It is the responsibility of the applicant to ensure that the National Eligibility Rules are adhered to both at application stage and following approval. Failure to do so can lead to financial penalties leading to recovery of up to 100% of the grant value. If in doubt on any of the requirements, applicants are strongly advised to seek specialist advice.

European Regional Development Fund eligibility rules apply to **all** project spend within the eligible costs, including match funding.

The European Regional Development Fund is governed by European regulations and national rules. Applicants are advised to familiarise themselves with the relevant documentation, (section 8 Key Document refers) prior to submitting an outline application. If successful at the full application stage, applicants will enter into [a Funding agreement](#) and must abide by the standard terms and conditions contained therein. Once a Funding agreement has been issued it should be signed and returned within 30 days, unless otherwise agreed with the managing authority. Applicants are therefore strongly advised to read these terms and conditions to ensure that they are able to enter into such an agreement prior to responding to the call.

6.2. Eligible Applicants

Section 4 of the [National Eligibility Rules](#) sets out who is eligible to apply. Financial Due Diligence checks will be undertaken on non-public sector applicants that are successful at the outline application stage. Checks will be carried out following notification of a successful outline application and may exclude applicants from further consideration. These checks will include assessment of the applicant's financial standing including ability to deal with cost overruns, the ability to cash flow a project in arrears and absorb a financial irregularity.

Applicants must be legally constituted at the point of signing a funding agreement. If the application is approved the applicant organisation will enter into a legally binding funding agreement and therefore will carry the liability for ensuring that the terms and conditions of the funding agreement are met.

If there is more than one organisation applying for the funds, a lead organisation must be selected to become the applicant (and grant recipient) with the remaining organisation(s) acting as delivery partner(s). In this situation the applicant would be

responsible and liable for the delivery partner(s) and ensuring the project is operating compliantly.

During the application process the managing authority will consider the applicant's track record, both positive and negative. If the applicant has been involved in the delivery of previous European grants and any irregularities have been identified, the managing authority will expect to see what steps have been taken to ensure that the risk of further irregularities in the future is mitigated. It is acknowledged that some organisations will be new to European Structural and Investment Funds funding and will not have a track record.

6.3. Contribution rate and match funding

European Regional Development Fund investment must not be used to replace existing funding sources. European Regional Development Fund investment must enable activity to take place that would not otherwise happen or to increase the scope, scale or intensity of activity. The level of European Regional Development Fund awarded will be the minimum in order for the project to proceed

In the more developed region the maximum contribution rate is 50% of the total eligible project costs subject to State Aid regulations. The remaining 50% or more must come from other eligible sources as specified under section 6 of the National Eligibility Rules.

In the transition region the maximum contribution rate is 60% of the total eligible project costs subject to State Aid regulations. The remaining 40% or more must come from other eligible sources as specified under section 6 of the National Eligibility Rules During the application process applicants will need to satisfy the managing authority that they have, or are able to put in place eligible match funding for the balance of costs. Other EU funds cannot be used as a source of match funding.

European Regional Development Fund investment is limited by State Aid regulations and where the award of European Regional Development Fund would constitute State Aid the European Regional Development Fund grant rate may fall below the stated maximum.

European Regional Development Fund is paid quarterly in arrears and expenditure must be defrayed prior to the submission of any grant claims. Applicants may be asked to demonstrate how they are able to cash flow the operation.

6.4. Project timescales

European Regional Development Fund funding will normally be approved for three years; however the managing authority reserves the right to extend the contract term in exceptional circumstances.

Projects approved through this call will normally be expected to:

- Submit a detailed and complete full application within three months of formal selection at outline stage. Projects which fail to meet this deadline may be deselected;
- Commence delivery (defraying European Regional Development Fund eligible costs) within three months of formal approval. Projects which fail to meet this deadline may be deselected; and
- Be closed by June 2023.

6.5. Project extensions

Existing grant recipients whose projects:

1. Do not involve the direct development of premises or infrastructure;
2. Have a funding agreement that ends/has a financial completion date during the period of this call or within **18 months of the closing date of this call**; and
3. Addresses the priorities set out in section 2

May apply for a second phase of delivery – this will be expected to be in the same form as the current project (i.e. a genuine continuation of activity) but may reflect improvement/some change to reflect experience of the first phase of the project. The application must be made using the standard outline application form. Where changes to the first phase of the project are significant, these should be presented as a new application. The relevant Growth Delivery Team will apply judgment in considering the significance of any change. Projects may apply to be extended for up to 3 years.

Applications in respect of the development of premises or other infrastructure should be presented as new projects, this includes applications that have a link to an existing European Regional Development Fund project e.g. further phases of the development of sites or premises.

Please note - extensions to existing projects will be assessed against the criteria set out in this call in the same way as 'new' projects. There is no guarantee that extensions will be selected. Extension requests relating to projects that end more than 18 months after the closing date of the call or do not meet the requirements set out in this call will be rejected. The applicant's track record and the performance of existing contracts will be taken into account during the assessment process.

6.6. Capital projects

In developing the budget for the outline application, applicants seeking European Regional Development Fund to support a capital project should note that:

- New build projects will normally be expected to achieve the Building Research Establishment Environmental Assessment Method (BREEAM) rating of 'excellent'; however BREEAM 'very good' will be accepted where this is the maximum feasible standard;
- Refurbishment projects will normally be expected to achieve the BREEAM rating of 'Very Good'; and
- Infrastructure projects will normally be expected to achieve the Civil Engineering Environmental Quality Assessment rating of 'Very Good'.

6.7. Cross Cutting Themes / Horizontal Principles

All applications selected as a result of this call will be required to demonstrate how the Cross Cutting Themes have been addressed in the project design and development. Cross Cutting Themes for European Regional Development Fund are 'equality and anti-discrimination' and 'sustainable development'. Further information is available in section 11 of the [European Regional Development Fund Operational Programme](#).

Green infrastructure projects seeking funding under priority axis 6 require both a wider strategic overview to ensure maximum benefits, and a future management plan.

Applications for projects delivering carbon savings will need to include a coherent and transparent methodology for measuring the savings.

6.8. Additionality, duplication and displacement

Additionality is a core principle of European Regional Development Funding. Applicants must be able to demonstrate that the activity paid for out of European Regional Development Funding adds value to new or existing activity.

European Regional Development Funding cannot support activities that duplicate existing provision/services within the region.

Applications need to identify and evidence how the beneficiaries will use the service and demonstrate that the project does not displace other activity available in the market place.

6.9. State Aid and revenue generation

Applicants are required, in the outline application, to provide a view on how their proposal complies with State Aid law. Applicants must ensure that projects comply with the law on State Aid. Grant funding to any economic undertaking which is State Aid can only be awarded if it is compatible aid, in that it complies with the terms of a notified scheme under the General Block Exemption Regulation (EU) 651/2014.

Only if this is not possible should applicants use the De minimis Regulation or 'no aid'. [Guidance for grant recipients](#), explaining more about State Aid, is available; it is important that Applicants take responsibility for understanding the importance of the State Aid rules and securing their full compliance with them throughout the project, if it is selected into the programme.

The managing authority is not able to give legal advice on State Aid. It is the responsibility of the applicant to ensure that the operation is State Aid compliant.

6.10. Procurement

All costs claimed by the applicant (grant recipient and/or delivery partner(s)) must be recovered on an actual cost basis. Other costs must be procured in line with National (including [Public Procurement Regulation 2015](#)) and EU regulations. Procurement will be subject to audit and verification and any irregularity will result in a financial penalty of up to 100% of the grant paid. Robust and transparent procurement is required to ensure that grant recipients:

- Consider value for money;
- Maximise efficient use of public money; and
- Maintain competitiveness and fairness across the EU.

It is **strongly recommended** that applicants seek and follow legal advice in respect of procurement requirements. Procurement irregularities remain the most substantive cause of error and clawback of grants.

7. Support

Please note that this is a competitive call and to preserve impartiality the managing authority and, where appropriate, the intermediate body are unable to enter into correspondence with applicants over their outline application. Details of where guidance can be found are contained throughout this call document. In exceptional circumstances, if there are issues with accessing this guidance, please contact: WM.ERDFenquiries@communities.gov.uk.

Whilst the decision of the managing authority is final, if you think consideration of your application has not followed the published ERDF process, please refer to the MHCLG complaints procedure available on [GOV.UK](#).

8. Key Documents

- European Regional Development Fund operational programme;
- Outline application form;
- Outline application form guidance;
- Local enterprise partnership area's European Structural and Investment Funds strategy;
- Eligibility guidance;
- Target definitions;
- Summative assessments guidance; and
- Funding agreement (revenue and / or capital).

9. Document Checklist

Incomplete applications will be rejected. Please ensure the following information (documents) are submitted.

Outline stage:

- Fully completed outline application;
- Financial tables; and
- Outputs, results and indicators tables.

10. Document Submission

Completed outline applications must be submitted via email to the address in Section 7. Applicants are asked to quote the call reference and project name in the subject line of your email as this will greatly assist the managing authority.

Outline application forms not received by the deadline will not be assessed. Outline applications which are not fully completed will be excluded.

The managing authority will normally acknowledge receipt of your application by email.

For this call applications will normally be required to **commence delivery/activity within three months** of the award of a Funding agreement.

Any changes related to the deadline for the submission of the outline application form will be notified on the [European Growth Funding](#) website pages.
