

EXPORT OF IN-VIVO BOVINE EMBRYOS TO CANADA

HEALTH CERTIFICATE

FOR COMPLETION BY:

EXPORTING COUNTRY: UNITED KINGDOM

EMBRYO COLLECTION TEAM VETERINARIAN AND OFFICIAL VETERINARIAN

## I. Information concerning:

## a) the donor animals

	Registered name	Registration number	Species	Breed
Dam				
Sire				

## b) the bovine embryos

- i. Total number of bovine embryos in consignment:
- ii. Total number of straws in consignment:
- iii. Date(s) of collection and number(s) of embryos and further detail from each collection date:

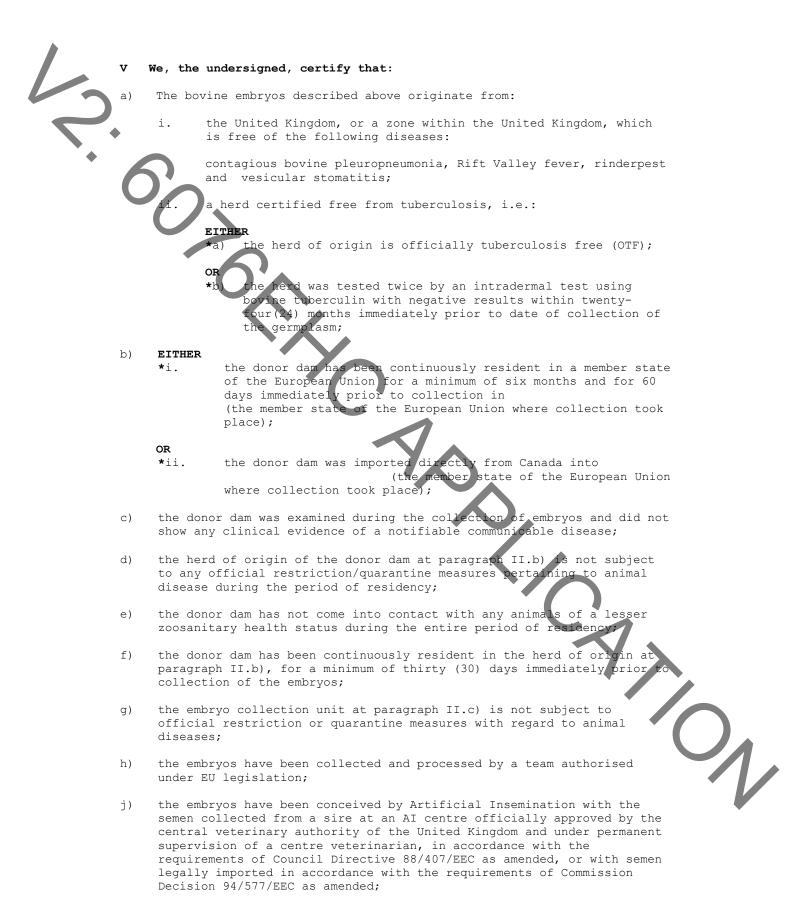

Collection	Number of Embryos	Identification Mark /	Freeze Date
Date	in Straw	Label on Straw	

## II. Origin of the animals

a) Name and address of exporter:

b) Address of herd of origin: ss of embryo collection unit where the embryos were collected (if from paragraph II.b) above): III. Destination of the embryos Name and address a) of Consignee: To (country and place of final destination): b) CANADA Means of transportation (route and flight no. C) Serial number on the shipping container: d) Serial number of tamper proof seal on shipping container: e) IV. Information concerning embryo collection team: Registration number of the embryo collection team: a) Name and address of approved embryo collection team veterinarian: b)

c) Name, address and approval number of the Artificial Insemination Centre in which the semen of the donor bull originated:

- k) the embryos have been washed, treated and processed in accordance with Chapter II, Annex A to Council Directive 89/556/EC as amended;
- the zona pellucida of the embryos was examined on the entire surface using a magnification of not less than 50X and certified intact and free of adherent material;
- m) the embryos have been collected, processed and stored in hygienic manner that prevented contamination with pathogenic micro-organisms. All material with animal ingredients used in processing has been sourced and processed to prevent introduction of pathogenic microorganisms. All equipment used to collect, handle, wash, freeze and store the germplasm presented for export to Canada has been new, or sterilised prior to use;

the embryos have been stored in sterile ampoules, straws or receptacles in sanitised liquid nitrogen containers at an approved storage place for a minimum period of 30 days prior to export;

o) the embryos have been stored in sealed containers in ampoules, straws or other receptacles indelibly marked in accordance with the recommendations of the International Embryo Transfer Society (IETS) for labelling. The receptacles are labelled with at least the following information: practitioner code, donor breed, donor registration number, donor management number or barn name or tattoo, sire registration number, straw number, number of embryos in receptacle (if greater than one), and freeze date (YYMMDD, eg 11JA01);

p) the tanks, containers, cages or vehicles used to transport the embryos to Canada have been sealed in a manner to preclude opening. The number(s) of the seal(s) are recorded at paragraph III.e) on the certificate.
