- a) Date(s) of collection:
- b) Quantity and condition of semen:
- c) Identification numbers on straws/containers:

III. Origin of the semen

- a) Name and address of the owner of the donor dog:

IV. Destination of the semen

- a) Name and address of exporter:
- b) Name and address of consignee:

\* Delete as applicable

c) Import permit number(if applicable):

**V. Health Information**

I, the undersigned, hereby certify that:

a) on (date), being after collection of the semen for export, I examined the donor dog and found no clinical evidence of any infectious or contagious disease including leptospirosis;

b) Great Britain is free of rabies according to Article 2.2.5.2 of the World Organisation for Animal Health (OIE) Terrestrial Animal Health Code;

c) EITHER\* (i) on (date), being after collection of the semen, a blood sample was taken from the said animal and submitted to the Veterinary Laboratories Agency, Weybridge where it was subjected to the microscopic agglutination test (MAT) for **Leptospira interrogans** serovar canicola, with a negative result (negative being less than 50% agglutination at a serum dilution of 1:100) (the laboratory report is attached);

OR\* (ii) on (date), being prior to the collection of the semen, the donor dog was vaccinated against **leptospirosis**;

and,

on (date), and again on (date) being not less than 14 days apart and both dates within the 30 days after collection of the semen, blood samples were taken from the donor dog and submitted to the Veterinary Laboratories Agency, Weybridge where they were submitted to the microscopic agglutination test (MAT) for **Leptospira interrogans** serovar canicola, and showed no increase in titre between the first and second tests, and a titre of 1:400 or less on each occasion (the laboratory reports are attached);

d) the semen has been placed in a container for transport which bears the name, breed and microchip number\*/tattoo\* of the donor dog.

\* Delete as applicable
