No: .....

EXPORT OF BREEDING PIGS TO MALAYSIA

HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM (GREAT BRITAIN AND NORTHERN IRELAND)

FOR COMPLETION BY: OFFICIAL VETERINARIAN

I. Number and identification of the animals

Official ear mark	Breed	Sex	Age

II. Origin of the animals

(a) Name and address of exporter:

(b) Address of premises of origin where the animals were examined:

III. Destination of the animals

(a) Name and address of consignee:

(b) Address of destination:

(c) Means of transportation and all available details of shipping:

(d) Import licence number(s):

#### IV. Health Information

I, the undersigned, certify that the animals described above meet the following requirements:

- (a) the United Kingdom is free from foot and mouth disease in accordance with the Office International des Epizooties (OIE) Terrestrial Animal Health Code, and has been free of African swine fever and classical swine fever during the twelve months preceding the date of export;
- (b) Vesicular stomatitis and Nipah virus have never been recorded in the United Kingdom;
- (c) **either**
  - \*i. the animals were born and have remained since birth in the herd of origin named at paragraph II (b) above; **or**
  - \*ii. the animals have been kept in the herd of origin named in paragraph II (b) above for at least 60 days prior to the date of export;
- (d) no case of transmissible gastro-enteritis (TGE), porcine enzootic encephalomyelitis, swine vesicular disease, leptospirosis and brucellosis (*brucella suis*) has occurred on the premises of origin during the two years preceding the date of export;
- (e) the establishment of origin has been free from clinical and pathological evidence of porcine reproductive and respiratory syndrome (PRRS), post weaning multisystemic syndrome (PWMS) and porcine dermatitis and nephritis syndrome (PDNS) during the six months preceding the date of export;
- (f) \* as far as can be ascertained / \*on the basis of a written declaration received from the veterinary surgeon(s) of the premises of origin from where the pigs were sourced, the pigs are derived were **either**:
  - \*i) from herd(s) in which there has been no clinical evidence of atrophic rhinitis during the past three years; **or**
  - \*ii) from atrophic rhinitis free herd(s);
- (g) **either**;
  - i)\* **in the case of pigs exported from Great Britain;**  
Great Britain is free of Aujeszky's disease and vaccination against Aujeszky's disease is not permitted;
  - ii)\* **in the case of pigs exported from Northern Ireland;**  
there has been no clinical, serological or pathological evidence of Aujeszky's disease on the premises of origin during the 12 months preceding the date of export; **and**  
  
On (date), being within 30 days of export, blood samples were taken from the animals and sent to a

Government laboratory where they were subjected to a serum neutralisation test (SNT) **or** ELISA test for Aujeszky's disease with negative results in each case;

(h) on (date), being within 30 days of export, blood samples were taken from the animals and sent to a Government laboratory where they were submitted to the following tests with negative results in each case;

(i) brucellosis - a serum agglutination test (SAT) (reaction less than 30 iu/ml) **or** complement fixation test (CFT) (negative means less than 8.3 icftu);

(ii) porcine reproductive and respiratory syndrome (PRRS) - immunoperoxidase monolayer assay (IPMA) or ELISA;

(i) **either**

\* (i) on (date), being within 30 days of export, blood samples were taken from the said animals and sent to the Government laboratory where they were subjected to the microscopic agglutination test for leptospirosis (serotypes *L. pomona*, *tarassovi*, *canicola* and *icterohaemorrhagiae*) with negative results in each case (negative means less than 50% agglutination at a dilution of 1:100); **or**

\* (ii) on (date), and again on (date), being at least 14 days after the first treatment and within 24 hours of loading, the said animals were injected with streptomycin/dihydro-streptomycin at a dose rate of 25mg/kg live bodyweight;

(j) on (date), being within 24 hours of loading, I examined the animals and found them to be free from clinical signs of infectious or contagious disease and in my opinion fit to travel;

**\* Delete if not applicable**

**V. This certificate is valid for 15 days.**
