EXPORT OF DUCK	HATCHING EGGS	TO	INDONESIA	No:	
HEALTH CERTIFI	СЪТЕ				

HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM

FOR COMPLETION BY: OFFICIAL VETERINARIAN

I. Number and identification of the birds

Number	Identification	Breed

II. Origin of the hatching eggs

- a) Name and address of exporter:
- b) Address(es) of premises of origin:

III. Destination of the hatching eggs

- a) Name and address of consignee:
- b) Means of transportation:

IV. Health Information

I, the undersigned, certify that the hatching eggs described above meet the following requirements:

- a) The duck hatching eggs originate from
 EITHER* (i) The United Kingdom
 OR* (ii) A Region of the United Kingdom
 OR* (iii) A poultry compartment within the United Kingdom
 which is officially free from notifiable avian influenza (NAI)
 according to the criteria of the OIE Code;
 In the event of NAI outbreak in the UK, free AI compartment
 certificate must be attached in the importation documents;
- b) vaccination for avian influenza is forbidden in the UK;
- c) No outbreak of low pathogenic avian influenza (LPAI) has been confirmed at any of the farms of origin, nor within a radius of 6 kms thereof, within the past 12 months.
- d) EITHER* (i) on (date), blood samples were taken from a representative sample selected at random from the flock(s) of origin and submitted to a laboratory of the Veterinary Laboratories Agency (VLA) where they were tested serologically for Salmonella pullorum, S.typhimurium, S.gallinarum and S.enteritidis with negative results in each case, and a copy of the laboratory report is attached;
 - OR* (ii) the flocks of origin are subject to regular microbiological sampling at the hatchery at least once per fortnight for Salmonella enteritidis, S.typhimurium, S.pullorum and S.gallinarum according to a Government controlled monitoring scheme and have given negative results in each case during the past 6 months, and a copy of the most recent laboratory report is attached .
- e) there has been no evidence of the following diseases in the farm(s) of origin during the 3 months immediately prior to shipment: avian tuberculosis, Pasteurella anatipestifer (duck septicaemia), duck viral enteritis, duck viral hepatitis;
- f) the farm(s) of origin are members of the government supervised Poultry Health Scheme and as such are subject to regular official veterinary inspection;
- g) there has been no evidence of clinical symptoms of infectious disease at the farm(s) of origin during the 90 days immediately prior to shipment;
- h) the flock(s) of origin of the eggs for export have been subject to a vaccination programme using authorised vaccines as follows (if necessary attach a separate schedule):

Disease	Name of Vaccine	Manufacturer	Dates of vaccination

- j) the parent flock(s) has/have been hatched in hatcheries which are members of the government supervised Poultry Health Scheme (or its equivalent in other member states of the EU), and it is a condition of the Scheme that eggs are sterilised prior to incubation, and that hatchery equipment is sterilised prior to use, and that high standards of biosecurity are maintained;
- k) I have this day inspected the said hatching eggs and consider them to be wholesome, fit for the purpose of incubation, and free from infestation with parasites.
- the hatching eggs have been packed in clean, new boxes and separators.
- V. This certificate is valid for 10 days.
