ORIGIN & HEALTH STATUS OF BIRDS-(SUPPORT HEALTH CERTIFICATE- 7514SUP)

THIS CERTIFICATE MUST BE COMPLETED WHEN THE FOOD CHAIN INFORMATION (FCI) DOCUMENT THAT ACCOMPANIED THE BIRDS TO SLAUGHTER DID NOT CONTAIN THE HEALTH ATTESTATION REQUIRED ABOVE AND THEREFORE NO CHAIN OF EVIDENCE THAT THE MEAT COMPLIES WITH THE SPECIFIC INDIAN REQUIREMENTS IN THIS DOCUMENT IS AVAILABLE TO THE OV CERTIFYING THE MEAT FOR EXPORT

Paragraph VI (a)- Born-Bred-Reared-Slaughter clause: only the meat from birds hatched, reared, slaughtered and processed solely in the UK is eligible for export to India.

Paragraph VI (b)- Establishment disease clearance: Evidence of 'incidence' of disease should be interpreted as clinical signs as well as information from production and mortality records, laboratory reports and pathological examinations. Note that the statement refers only to frank outbreaks of clinical disease, and not to agents which are routinely or effectively controlled by vaccination.

IMPORTANT: This guarantee is needed for the farm of origin and for the 12 months prior to dispatch of the birds to slaughter, not only for the flock(s) of origin of the birds and for the life of that/those flock(s).
