IV. Health Information

Certificate number:

I, the undersigned official veterinarian, certify that the birds described above meet the following requirements:

- (a) Either
 - *i. The United Kingdom is officially free of highly pathogenic avian influenza (HPAI) according to the criteria of the OIE; or
 - *ii. The day-old poultry and parent flocks are located in a zone of the United Kingdom where more than 12 months have elapsed since the date of resolution of any case of highly pathogenic avian influenza (HPAI) in that zone, or any adjacent zone; or
 - *iii.The day-old poultry and parent flocks originate in a poultry compartment within the UK where more than 12 months have elapsed since the date of resolution of any case of highly pathogenic avian influenza (HPAI) in that compartment;
- (b) The premises of origin and hatchery are members of a government supervised poultry health scheme which conforms with the recommendations of the OIE Code, and as such they are subject to regular inspection by the veterinary authorities;
- During the 12 months prior to the date of export no cases of the following diseases have been confirmed on the farms of origin:
 Mycoplasma gallisepticum, infectious laryngotracheitis, avian leucosis, and fowl typhoid (S.gallinarum);
- (d) The parent flocks have not been vaccinated against avian influenza;
- (e) The parent flock(s) have been tested during the 30 day period prior to export for avian influenza type A, of the H5 and H7 subtypes, using a serological test with negative results; and a clinical inspection of the parent flock within three days prior to the date of export was carried out and no signs of clinical disease were observed;
- (f) The day old chicks have not been vaccinated against avian infectious laryngotracheitis, avian influenza, mycoplasma, or fowl typhoid (Salmonella gallinarum);
- (g) the day old birds for export do not come from any premises which is subject to official restrictions imposed by the competent authority either for the control of animal disease or because of a suspicion of contamination of animal feed with **dioxin** or any other harmful substance;
- (h) The day old birds are packed for export in containers and separators which are new, clean and unused;
- (i) I have this day inspected the day-old birds for export and found them to be healthy with no clinical signs of contagious disease;
