Fax Number:

### 3.2 Physical address at destination

Farm/abattoir name and number:

District:

### 4. Means of transportation (air, road, rail):

4.1 Description of transport vehicle (flight number, Registration number):

**Import permit number:**

### **B HEALTH ATTESTATION**

I, \_\_\_\_\_ an Official Veterinarian of the United Kingdom hereby certify that:

1. The United Kingdom is officially free from all types of Equine Encephalomyelitis;
2. The chicks/hatching eggs described in A originate from a **flock** which:
  - i. is free from all official veterinary restriction affecting birds;
  - ii. is situated in an area where no cases of velogenic Newcastle Disease, Fowl Plague or Avian Influenza have been confirmed within a radius of 20 km during the last 3 months;
  - iii. has not been vaccinated with live vaccines for Newcastle Disease other than lentogenic strains;
  - iv. has to the best of my belief and after due inquiry, showed no clinical or pathological evidence of the following diseases on the premises during the previous 6 months prior to export:  
Infectious laryngo-tracheitis. Chlamydiosis (ornithosis), Tuberculosis, Vibrionic hepatitis, Infectious avian encephalomyelitis, Fowl typhoid, Pullorum disease, Salmonellosis, Fowl pox, Pasteurellosis (fowl cholera), Newcastle disease, Viral arthritis, Inclusion body hepatitis, Infectious bronchitis, Infectious bursal disease (Gumboro disease), Transmissible enteritis, Mycoplasmosis (*M. synoviae*, *M. gallisepticum* or *M. meleagridis*), Turkey coryza and Turkey rhino tracheitis;
  - v. was routinely monitored for Salmonella Enteritidis with negative results.
  - vi. The consignment originates from bio-secure poultry farms which have been serologically tested for Avian Influenza subtype H5 virus with negative results. The farm(s) must be under regular sero-surveillance for Avian Influenza according to the recommended protocol (every 6 months);
3. The **hatching eggs** were cleaned and sanitised soon after collection and packed in new or clean cases which have been fumigated sanitised with a liquid disinfectant or **day old chicks** were packed for distribution in new chick boxes or used boxes of a suitable material which have been thoroughly cleaned and disinfected or fumigated.

4. The day old chick/hatching eggs were loaded into clean vehicles and sealed under official supervision.
