No:

EXPORT OF CHICKEN HATCHING EGGS AND DAY OLD CHICKS TO PAKISTAN

HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM (GREAT BRITAIN)

I. Number and identification of the *hatching eggs/birds

Number	Identification	Breed or Strain	Sex	Day old or hatching eggs

II. Origin of the hatching eggs/birds

a) Name and address of exporter:

b) Address(es) of premises of origin:

c) Address of hatchery:

III. Destination of the hatching eggs/birds

a) Name and address of consignee:

b) Means of transportation:

IV. Health Information

I, the undersigned, certify that the hatching eggs/birds described above meet the following requirements:

FORM III CONDITIONS

- a) there has been no evidence of any of the following diseases in the flock(s) of origin during the past 12 months:
avian leucosis, Newcastle disease, Salmonella pullorum, salmonellosis, mycoplasmosis;
- b) The flock(s) of origin have been subjected to the tests in Schedule 1 of the Pakistan import conditions, namely Salmonella pullorum and Mycoplasmosis, with negative results; specifically the flock(s) of origin are members of the government supervised Poultry Health Scheme, and as such they are regularly monitored for the presence of **Salmonella pullorum, S.gallinarum, and Mycoplasma gallisepticum** and they have given negative results in every case for the past 6 months;
- c)* (Applies only to day old birds; delete in the case of hatching eggs)the day old birds were hatched in incubators which were properly fumigated and disinfected prior to incubation; and after hatching they were packed for export into clean, new boxes and separators without coming into contact with any birds of lower health status;
- d)* (Applies only to hatching eggs; delete in the case of day old birds)the hatching eggs are derived from flocks which have been subjected to the tests in Schedule 1 of the Pakistan import conditions, namely Salmonella pullorum and Mycoplasmosis, with negative results, as described in paragraph IV (b) above;
- e)* (Applies only to day old birds; delete in the case of hatching eggs)the chicks were hatched from eggs obtained from flocks free from pullorum disease and salmonellosis, as described in paragraph IV (b) above;

GENERAL HEALTH CONDITIONS

- f) no case of **highly pathogenic avian influenza** has been confirmed in the flock(s) of origin, nor at the hatchery, nor within a radius of 25 kms thereof, during the 3 months prior to export.
- g) no case of **Newcastle disease** has been confirmed in the flock(s) of origin, nor at the hatchery, nor within a radius of 25 kms thereof, during the 3 months prior to export.
- h) the flocks of origin are regularly monitored for the presence of **Salmonella enteritidis and S. typhimurium** (salmonellosis) under a statutory government supervised scheme and have given negative results in every case during the past 6 months.
- j)* (delete in the case of hatching eggs)
on (date), being within 24 hours prior to export, I inspected the day old chicks for export and found them to be free from clinical signs of infectious or contagious disease, and in my opinion fit for the intended journey;
- k) on (date), being within 30 days prior to export, the birds comprising the flock(s) of origin have been inspected and found to be free from clinical signs of infectious or contagious disease;

V. This certificate is valid for 10 days.
