b) Means of transportation:

IV. Health Information

I, the undersigned, certify that the birds*/eggs* described above meet the following requirements:

- a) the birds comprising the flock(s) of origin have been inspected and found to be free from clinical signs of infectious disease;
- b) in so far as can be determined, there has been no evidence of the following diseases at the premises of origin during the past 6 months: **fowl pox, fowl cholera, ornithosis/psittacosis, Marek's disease, avian leukosis, infectious laryngotracheitis, infectious bronchitis, infectious avian encephalomyelitis or mycoplasmosis (chronic respiratory disease);**
- c)* (applies only to day old chicks; delete in the case of hatching eggs) in so far as can be determined and based on information provided in a written declaration received from the owner/exporter, the said birds have been double vaccinated against **Mareks disease** using Rispens + HVT which is a licensed product in accordance with the manufacturer's instructions;
- d) the said day old chicks*/hatching eggs* have not been treated or fed with any natural or synthetic hormonal substances, antibiotics or toxic substances carcinogenic or otherwise which exceed European Union maximum permitted levels; neither do they originate from parent flocks that have been treated or fed with these substances;
- e) the flock(s) of origin are members of a Government supervised poultry health scheme and are considered free from **Salmonella pullorum** (pullorum disease) and **Salmonella gallinarum** (fowl typhoid);
- f) no outbreak of **Newcastle disease** or **avian influenza** has been confirmed in poultry at the farm of origin and within a radius of 10kms thereof during the past 3 months.
- g) the United Kingdom practises a stamping out policy for **avian influenza** (fowl plague). Neither the farm(s) of origin nor the hatchery are situated in any zone (county) which have been subject to
