EXPORT OF A *DOG/*CAT TO JAMAICA

◆HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM

CERTIFYING VETERINARIAN: OFFICIAL VETERINARIAN

I. Identification of the animal

Identification Microchip (ISO Standard 11784 or Annex A to standard 11785)	Breed	Sex	Age

II. Origin of the animal

(a) Name and address of exporter:

(b) Address of premises of origin:

(c) Name and address of importer:

(d) Import permit number:

III. Health information

I, the undersigned, certify that the animal described above meets the following requirements:

(a) on (date), being not more than seven (7) days prior to export, the *dog/*cat was examined and found to be in good health, physically sound, free of any evidence of infectious disease and in my opinion is fit to travel;

(b) The *dog/*cat is not under quarantine restriction at the time of export;

(c) The *dog/*cat is not pregnant nor a suckling young animal at the time of export;

(d) **Rabies**

**APPLICATION ONLY
NOT TO BE CERTIFIED**

(i) The *dog/*cat has been vaccinated against the rabies virus with a licenced inactivated virus or recombinant vaccine expressing the rabies virus glycoprotein which is valid, in accordance with the manufacturer's directions, at the time of export; **AND**

*Primary vaccination: the rabies vaccine was administered not less than three months and not more than one year prior to the date of shipment, when the dog or cat was at least three months old;

OR

*Booster vaccination (older animal): the vaccine was given not more than one year prior to the date of shipment;

(ii) The *dog/*cat has achieved a post-vaccination rabies virus neutralizing antibody titre of at least 0.5 IU/ml in serum using a fluorescent antibody virus neutralization (FAVN) test carried out at an OIE/WHO approved rabies reference laboratory (for example Rabies Diagnostic Laboratory, Kansas State University, USA; APHA Weybridge Laboratory) in a sample taken between three months and twelve months before importation into Jamaica;

Date when the blood sample was drawn:

Date of test:

(e) **Helminths**

Faecal examinations were conducted and the *dog/*cat was treated TWICE by an approved veterinarian, at least fourteen (14) days apart with the second treatment given within seven (7) days prior to export. The treatment(s) used were broad spectrum anthelmintic(s) that is/are licenced for use in the United Kingdom and are effective against nematodes, cestodes and trematodes.

Date of 1st Treatment:

Product name:

Active ingredients:

Dose rate:

Date of 2nd Treatment:

Product name:

Active ingredients:

Dose rate:

(f) **External parasites**

examination and treatments were conducted TWICE by an approved veterinarian using products licenced in the United Kingdom for the control of fleas, ticks, lice and mites at the manufacturer's recommended dose. The dog*/cat* was examined at the time of each treatment and was found to be free from external parasites in each case. The first treatment was given within 30 days prior to the date of shipment, at least two weeks before the second treatment, and the second within seven (7) days of export.
