b) Address of premises of destination :

APPLICATION ONLY NOT TO BE CERTIFIED

IV. Health Information

I, the undersigned, hereby certify that:

- a) on _____ (date), being not more than 48 hours prior to the proposed date of export, the dog/cat* was examined and found to be in good health and free from clinical signs of infectious or contagious disease and free from external parasites and, in my opinion, is fit to travel;
- b) the dog has been identified with an implanted microchip transponder, details of which have been given at paragraph **I.**;
- c) on _____ (date), being 3 months of age or older, the dog/cat* was vaccinated against rabies, or in the case of a booster vaccination, was carried out not less than 1 month and not more than 1 year prior to export;
- d) on _____ (date), being at least 30 days after the vaccination carried out at paragraph **IV.** (c) above and not more than 24 months prior to export, a blood sample was taken from the cat/dog* and sent to a Government approved laboratory where it was subjected to a test for rabies antibodies giving a positive result equal or greater than 0.5 IU/ml;
- e) on _____ (date), being not less than 24 hours and not more than 48 hours prior to entry into St Lucia, the dog*/cat* was treated for internal parasites, including tapeworm, with a licensed broad spectrum anthelmintic as follows:

Name of product

Active ingredient

- f) on _____ (date), being not less than 24 hours and not more than 48 hours prior to entry into St Lucia, the dog*/cat* was treated for external parasites, including ticks, with the following licensed product and is visibly free from evidence of external parasites;

Name of preparation

Active ingredient

- g) **IN THE CASE OF A DOG**

- (i) being not less than 2 weeks prior to export the dog was fully vaccinated against the following diseases in accordance with the manufacturer's recommendations and the dates of the vaccination are as follows:

| Name of disease | Date of vaccination |
|-----------------------------|---------------------|
| Canine distemper: | |
| Leptospirosis: | |
| Hepatitis/Adenovirus | |
| Parainfluenza: | |
| Parvovirus: | |

APPLICATION ONLY NOT TO BE CERTIFIED

(ii) on _____ (date), a blood sample was taken from the dog and sent to the Veterinary Laboratories Agency (VLA), Weybridge, where it was tested for Lyme disease with negative results;

(iii) on _____ being within 30 days prior to the scheduled date of export, blood samples were taken from the dog and sent to the Veterinary Laboratories Agency (VLA), Weybridge, and subjected to both an antigen ELISA test and the microfilaria concentration test for **Dirofilaria immitis** (Heartworm), with a negative result in each case;

AND

on _____, being within 4 days prior to the scheduled date of export, the dog was treated with one of the following licensed products:

*EITHER 1. Milbemycin at 0.5 mg/kg

*OR 2. Moxidectin at a therapeutic dose rate in accordance with manufacturer's recommendations;

(h) **IN THE CASE OF A CAT**

being not less than 2 weeks prior to export, the cat was fully vaccinated against the following diseases in accordance with the manufacturer's recommendations and the dates of the vaccination are as follows:

| Name of disease | Date of vaccination |
|--------------------------------|---------------------|
| Feline Leukaemia: | |
| Feline Rhinotracheitis: | |
| Feline Calicivirus: | |
| Feline Panleukopenia: | |
| Feline Pneumonitis: | |

(j) I have received a written declaration from the exporter stating that the dog*/cat* will be transported by air using the most appropriate and direct route from the point of departure to St Lucia, and will not be allowed to come into contact with any animal of a lower health status.
