II. ORIGIN OF PRODUCTS

III. DESTINATION OF PRODUCTS

(a) The product will be despatched from: UNITED KINGDOM to:

(country and place of destination)

- (b) Name and address of consignee:
- (c) Means of transportation:

IV. HEALTH INFORMATION

- I, the undersigned, certify that:
 - 1. the products described at paragraph I are fit for human consumption and the dairy ingredients used were produced in accordance with European Union (EU) legislation in an establishment approved for intra-Community trade; Hazard Analysis and Critical Control Point (HACCP) system is applied at the establishment in which the products were produced; the establishment of production has in place an auditable standard operating procedure which ensures that the hygiene and other standards required in EU legislation are met and recorded, in accordance with HACCP principles;
 - 2. the products do not contain milk which originates from holdings on which an Office International des Epizooties (OIE) List A disease to which the species of origin is susceptible has been confirmed at the time of collection of the milk;
 - 3. United Kingdom law prohibits the sale or supply of milk from cows affected or suspected of being affected with Bovine Spongiform Encephalopathy;
 - 4. the feeding of ruminant protein to ruminants has been prohibited in Great Britain since July 1988 and in Northern Ireland since January 1989;
 - 5. the products have undergone, or contain dairy ingredients which have undergone, treatment in accordance with European Union legislation on the health rules on the production of milk and milk products, and meet the microbiological criteria laid down therein, including freedom from salmonella and other pathogenic organisms associated with milk;
 - 6. all the necessary precautions were taken after treatment to prevent contamination of the products;
 - 7. on the basis of the United Kingdom radiation monitoring programme, the products are considered to be free from harmful radiation;
 - 8. on the basis of the United Kingdom residue surveillance programme, the products, or the milk from which the products were manufactured, are considered to be free from harmful levels of residues of antibiotics (below the Maximum Residue Limit MRL), hormones (below MRL), pesticides (below MRL), or any other substances known to be harmful to human health, including arsenic and dioxins.

pesticides (below MRL), human health, including	or any other substances known to be harmful to arsenic and dioxins.
