You people think you can over-charge people for ever and get away with it. It's 2017 get a bloody grip. Nobody wants to or should be made to pay, extortion prices, for garbage, scaremongering, biased, bad news that's thrown in our faces daily when we never asked or agreed to it. You can't fool people no more, just watch the backlash. Kodi is not illegal, it never will be and it should never be, only an corrupt government would try create or enforce a so-called law or regulation. Not even Donald Trump would try enforce such a pointless farce law. You greedy corporations doing nothing for people except try to enforce taxes you don't pay yourself and try implement ways to charge us for things we should not have to pay for!!
