EXPORT OF BOVINE GELATINE / COLLAGEN INTENDED FOR USES OTHER THAN LIVESTOCK
FEED TO CANADA

HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM

FOR COMPLETION BY: OFFICIAL VETERINARIAN

I. IDENTIFICATION OF PRODUCT(S)

(a) Description of the products:

(b) Type and number of packages:

(c) Identification marks on packaging (e.g. lot/batch numbers):

(d) Net weight of consignment:

II. ORIGIN OF PRODUCTS

(a) Address of the processing plant:

(b) Name and address of exporter:

(c) Place of loading:

III. DESTINATION OF PRODUCTS

(a) Name and address of consignee:

(b) Means of transportation:

IV. HEALTH INFORMATION

I, the undersigned, hereby certify that:

*1. the gelatine and collagen described above was derived from bovine, hides, skins or bone from the following countries having **negligible risk** for bovine spongiform encephalopathy in accordance with the OIE Terrestrial Animal Health Code:

;

*2. the *gelatine and *collagen described above was derived solely from **bovine hides and skins** from the following countries having **controlled or undetermined risk** for BSE in accordance with the OIE Terrestrial Animal Health Code:

;

and the product was:

(a) derived solely from bovine hides and skins (not from bovine bones) and that the hides and skins from the head (face plates only) of bovine animals aged 30 months or older, which were stunned with a penetrating device, were:

* (i) removed;

or

* (ii) trimmed of hide to a minimum of 2.5 cm around the stun hole and a minimum of 2.5 cm around all parts of the face plate which were visibly contaminated with brain tissue;

or

* (iii) washed, scraped, vacuumed, or otherwise processed to remove visible brain materials;

(b) produced using an alkalization process (i.e. liming or a NaOH step or a combination of the two processes);

*3. the *gelatine and *collagen described above was derived from **bovine bones** from the following countries having **controlled or undetermined risk** for BSE in accordance with the OIE Terrestrial Animal Health Code:

;

and the bones used to prepare the product:

(a) were derived from bovine animals that were not subjected to a stunning process prior to slaughter, with a device injecting compressed air or gas into the cranial cavity, or to a pithing process, and were subjected to and passed ante-mortem and post-mortem inspection;

and

(b) do not include skulls and vertebrae (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum) from bovine animals 30 months of age or older;

and

(c) have been subjected to a process that includes **all** of the following steps:

- (i) pressure washing (degreasing);
- (ii) acid demineralization;
- (iii) acid or alkaline treatment;
- (iv) filtration;
- (v) sterilization at a temperature of at least 138°C for a minimum of four seconds.

*Delete as appropriate to accurately reflect the consignment
