I. IDENTIFICATION OF PRODUCTS

- a) Description of the product:
- b) Name of the product:
- c) Species from which the milk originates:
- d) Nature of packing:
- e) Net weight:
- f) Number of packages:
- g) Date of manufacturing:
- h) Code/batch number of the consignment:
- i) Health mark/s applied to the consignment:

II. ORIGIN OF PRODUCTS

- a) Name and address of exporter:
- b) Name, address and official approval/registration number of plant of production:

III. DESTINATION OF PRODUCTS

- a) The product was despatched from United Kingdom to:

(country and place of destination)
- b) Name and address of consignee:
- c) Means of transportation:

IV. HEALTH INFORMATION

I, the undersigned, certify that the products described at paragraph I comply with the following requirements:

- *a) the milk, or the milk from which the dairy product was prepared, was subjected to an initial pasteurisation (at least 72°C for at least 15 seconds), followed by one of the following:
 - *i) treatment by high temperature pasteurisation, UHT or sterilisation, so as to produce a negative reaction to the peroxidase test;
 - or
 - *ii) a drying process which includes a heat treatment with an equivalent effect to the above treatments;
 - or
 - *iii) treatment whereby the pH is lowered to below 6.0 and held there for at least one hour;
 - *b) the dairy product has been subjected to heat treatment of at least 72°C for 15 seconds or an equivalent treatment;
 - c) the treatments specified in paragraphs IV. a) and b) above are suitable to destroy the foot and mouth disease virus;
 - d) the products identified at paragraph I. above are derived from animals free from contagious diseases communicable to human beings through milk, and are fit for human consumption and may lawfully be sold in the United Kingdom;
 - e) the production premises named at II. b) above is approved under the relevant regulations in the UK and is under the supervision of the competent authority;
 - f) UK legislation prohibits the manufacture of products from milk which contains residues, antibiotics, hormones, pesticides or any other substances known to be harmful to human health;
 - g) the United Kingdom has a comprehensive programme in place to monitor radioactivity in food and the environment. The results demonstrates that even the most exposed members of the UK public received radiation doses from consumption of local food and exposure to environmental radioactivity (due to discharges and direct radiation) that were below the statutory EU annual dose limit to members of the public of 1 millisievert per year from artificially-produced radionuclides as set in the Council Directive 96/29/Euratom of 13 May 1996.
- * Delete as appropriate
