GELATIN FOR HUMAN CONSUMPTION AND/OR LABORATORY USE TO CANADA

EXPORTING COUNTRY: UNITED KINGDOM

FOR SIGNATURE BY: OFFICIAL VETERINARIAN

**I. Identification of the consignment**

a) Description of the products:

b) Type and number of packages:

c) Net weight of consignment:

d) Shipping marks:

**II. Origin of the products**

a) Name and address of exporter:

b) Name and address of manufacturing plant:

**III. Destination of the consignment**

a) Name and address of consignee:

b) Means of transportation:

**IV. Health Information:**

I have received a written declaration from the exporter mentioned at part II., stating that:

a)\* In the case of products that contain only lactose that are not in the final packaging:

the product was not prepared using the following Specified Risk Materials (SRM) or any protein products derived from them:

- i) the skull including the brain, trigeminal ganglia and eyes, the spinal cord and the vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum), from all animals aged 30 months or older;
- ii) the small intestine and tonsils from animals of all ages;

b)\* In the case of products containing gelatine prepared from bones that are not in the final packaging:

the bones used to prepare the product:

- i) do not include skulls or vertebrae (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum), from bovine animals aged 30 months or older;
- ii) have been subjected to a process which includes all of the following steps:
  - a) pressure washing (degreasing);
  - b) acid demineralization;
  - c) prolonged alkaline treatment;
  - d) filtration;
  - e) sterilization at a temperature of at least 138 degrees C for a minimum of 4 seconds.
