NO:

EXPORT OF LIVE INTESTINAL MICROFLORA DERIVED FROM SPF CHICKENS TO CHILE

HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM

FOR SIGNATURE BY: OFFICIAL VETERINARIAN

I. IDENTIFICATION OF CONSIGNMENT

(a) Description of the products:

(b) Type and number of packages:

(c) Net weight of consignment:

(d) Shipping marks:

(e) Container No.:

(f) Batch (lot) No.:

II. ORIGIN OF PRODUCTS

(a) District(s) of origin:

(b) Name and address of exporter:

(c) Name and address of manufacturing plant:

III. DESTINATION OF PRODUCTS

(a) The product was despatched from the United Kingdom to:

(country and place of destination)

(b) Name and address of consignee:

(c) Means of transportation:

IV. HEALTH INFORMATION

I, the undersigned, certify that:

- (a) the donor hens, from which the product is derived, have been reared in isolation under veterinary supervision;
- (b) the donor hens have been subjected to veterinary ante-mortem and post-mortem examination at the time of slaughter and no signs of infectious disease or associated pathological change were detected;
- (c) the master culture derived from the donor hens and used in the manufacture of the competitive exclusion product, AVIGUARD, has been examined in an approved laboratory and a report issued confirming that it does not contain any of the pathogenic micro-organisms listed in paragraph (d) (1) and (2) below;
- (d) the batch (lot) of the product described at paragraph I. overleaf has been examined for the bacteria listed in (1) and viruses and mollicutes listed in (2) below with negative results:

- (1) Bacteria
 - Campylobacter spp
 - Clostridium botulinum
 - Clostridium colinum
 - Clostridium difficile
 - Clostridium perfringens types A and C
 - Erysipelothrix rhusiopathiae
 - Escherichia coli
 - serotypes 01:K1, 02:K1, 0157, 078:K80
 - Haemophilus gallinarum
 - Listeria spp
 - Pasteurella multocida
 - Salmonella spp
 - Shigella spp
 - Staphylococcus aureus
 - Vibrio cholerae
 - Yersinia spp
 - Chlamydophila spp

- (2) Viruses and Mollicutes
 - Avian adenoviruses
 - Avian encephalomyelitis virus (AE chicken)
 - Avian infectious bronchitis (IB) virus
 - Avian infectious bursal disease
 - Avian influenza Type A virus
 - Avian lymphoid leucosis (A&B)
 - Avian nephritis virus
 - Avian reovirus
 - Avian reticuloendotheliosis
 - Chicken anaemia agent (CAA)
 - Egg-drop syndrome 76 virus (EDS)
 - Fowl Pox virus
 - Infectious laryngotracheitis (ILT) virus
 - Marek's disease virus
 - Newcastle disease virus
 - Rhinotracheitis virus
 - Mycoplasma gallisepticum
 - Mycoplasma synoviae

- (e) the premises of origin of the donor hens (from which the master or working and production seed cultures were derived) named at II (a) above and the production site named at II (b), are at the centre of an area with a diameter of 20km within which no case of Newcastle disease or any other notifiable disease of poultry has been confirmed within the 90 days prior to shipment;
- (f) the product has been packed in new packaging material under controlled conditions;
- (g) the product has been stored and transported, prior to shipment, in a manner to prevent it being contaminated with agents known to cause infectious diseases of domestic poultry.
