	ORT OF MILK AND MILK PRODUCTS TO SUDAN
HEAL	TH CERTIFICATE
EXPO	ORTING COUNTRY: UNITED KINGDOM
FOR	COMPLETION BY: OFFICIAL VETERINARIAN
I.	IDENTIFICATION OF CONSIGNMENT
a)	Description of the products:
b)	Name of the product:
c)	Species from which the milk originates:
d)	Nature of packing:
e)	Net weight:
f)	Number of packages:
g)	Date of manufacturing:
h)	Code/batch number of the consignment:
i)	Health mark/s applied to the consignment:
	ORIGIN OF PRODUCTS
II. a)	Name, address and official approval/registration number of plant of production:
ω,	name, address and criticial approval, regression named of praise of praises.
	•
b)	Name and address of exporter:

III. DESTINATION OF PRODUCTS

a) The product was despatched from United Kingdom to:

(country and place of destination)

b) Name and address of consignee:

c) Means of transportation:

IV. HEALTH INFORMATION

- I, the undersigned, certify that:
- *a) the milk, or the milk from which the milk product was prepared, was subjected to an initial pasteurisation (at least 72°C for at least 15 seconds) in accordance with the European Union (EU) legislation laying down hygiene rules for food of animal origin and their official controls, followed by one of the following:
 - *i) treatment by high temperature pasteurisation (at least 72°C for at least 15 seconds), UHT (at least 135°C for at least 1 second) or sterilisation (verified by random sampling and incubation tests);

or

*ii) a drying process which includes a heat treatment with an equivalent effect to the above treatments:

or

- *iii) treatment whereby the pH is lowered to below 6.0 and held there for at least one hour;
- *b) the milk product has been subjected to heat treatment of at least 72°C for 15 seconds or an equivalent treatment;
- the United Kingdom has a comprehensive programme in place to monitor radioactivity in food and the environment. The results demonstrates that even the most exposed members of the UK public received radiation doses from consumption of local food and exposure to environmental radioactivity (due to discharges and direct radiation) that were below the statutory EU annual dose limit to members of the public of 1 millisievert per year from artificially-produced radionuclides as set in the Council Directive 96/29/Euratom of 13 May 1996.
