EXPORT TO THE REPUBLIC OF SOUTH AFRICA OF MILK AND MILK PRODUCTS INTENDED
FOR ANIMAL CONSUMPTION

NO:

VETERINARY IMPORT PERMIT NUMBER:

HEALTH CERTIFICATE

EXPORTING COUNTRY: UNITED KINGDOM

FOR COMPLETION BY: OFFICIAL VETERINARIAN

I. Identification of the products

- (a) Species of origin:
- (b) Description of the products:

(c) Type and number of packages:

(d) Net weight of consignment:

(e) Container number:

(f) Seal number:

II. Origin of products

(a) Name, address and approval number of the approved establishment:

(b) Name and address of exporter:

III. Destination of the products

(a) The products were despatched to:

(Country and place of destination)

(b) Name and address of consignee:

(c) Means of transportation:

IV. Health information

I, the undersigned, certify that the milk or milk-based product described above:

1. was produced from **either**:

* 1.1 milk or milk-based products, derived from animals kept in herds in the United Kingdom which were not under restrictions due to foot and mouth disease or rinderpest;

or

* 1.2 milk or milk-based products, legally imported into the United Kingdom, from facilities in the European Union (EU) registered for trade within the Union (complying with all the relevant EU legislation) or Norway, which were not under restrictions due to foot-and-mouth disease or rinderpest;

or

* 1.3 milk or milk-based products, legally imported into the United Kingdom, from one or more of the following countries: New Zealand, Australia, Switzerland, United States of America and Canada;

2. was processed at an officially approved manufacturing plant and subjected to **one** of the following processes before being introduced onto South African territory:

either:

* 2.1 in the case of milk or milk-based products originating from areas where no outbreak of foot-and-mouth disease has occurred within the last 12 months and where vaccination against foot-and-mouth disease has not been carried out in the last 12 months:

* 2.1.1 ultra high temperature treatment at 132°C for 1 second;
and/or

* 2.1.2 pasteurised at 72°C for 15 seconds or at 60°C for 30 minutes;
and/or

* 2.1.3 heat sterilised for 30 minutes at a pressure of 15 pounds (100kpa);
and/or

* 2.1.4 an acidification process such that the pH value is lowered and kept below 6 for at least 1 hour;

or:

* 2.2 in the case of milk or milk-based products originating from areas where an outbreak of foot-and-mouth disease has occurred within the last 12 months, or which have carried out vaccination against foot-and-mouth disease in the last 12 months:

- * 2.2.1 ultra high temperature treatment at 132°C for 1 second;
and/or
- * 2.2.2 an initial heat treatment having an effect at least equivalent to that achieved by a pasteurisation at a temperature of at 72°C for 15 seconds, so as to produce a negative reaction to the phosphatase test, followed by:
 - * (i) a second heat treatment by high temperature pasteurisation, UHT or sterilisation, so as to produce a negative reaction to the peroxidase test:
or
 - * (ii) in the case of milk powder or a dry milk based product, a second heat treatment having an effect at least equivalent to that achieved by the first heat treatment, so as to produce a negative reaction to the phosphatase test followed by a drying process;
or
 - * (iii) an acidification process such that the pH is lowered and kept below 6.0 for at least one hour;

3. do not contain any products derived from animals other than bovine milk or milk-based products;
4. do not, to the best of my knowledge and belief, constitute any danger of introducing infectious or contagious diseases into South Africa.

* **delete as appropriate**
