

## EXPORT OF OVINE AND CAPRINE EMBRYOS TO THE DOMINICAN REPUBLIC

### NOTES FOR GUIDANCE FOR OFFICIAL VETERINARIANS AND EXPORTERS

#### IMPORTANT

These notes provide guidance to Official Veterinarians (OV's) and exporters and should have been issued to you together with export certificate 8133EHC and its continuation 8133CON. These Notes for Guidance (NFG) are not intended to operate as a standalone document but in conjunction with certificates 8133EHC and 8133CON.

Exporters are strongly advised to verify the requirements of the importing country by contacting the veterinary authorities, or their representatives in the UK, in advance of each consignment.

#### 1. Scope of the Certificate

Export health certificate 8133EHC may be used for the export of ovine and caprine embryos from the United Kingdom to the Dominican Republic.

Please note that the export health certificate 8133EHC is in two parts, 8133EHC PART A and 8133CON PART B. Both parts must be signed, dated and stamped on the day of shipment.

#### 2. Certification by an Official Veterinarian (OV)

In Great Britain, this certificate may be signed by a Veterinary Officer of the Department or by an authorised Official Veterinarian (OV) appointed to the appropriate panel for export purposes by the Department for Environment, Food and Rural Affairs (Defra), the Scottish Government or the Welsh Government, or who holds the appropriate Official Controls Qualification (Veterinary) (OCQ(V)) authorisation.

In Northern Ireland, this certificate may be signed by an Authorised Veterinary Inspector (AVI) appointed as an OV to the appropriate export panel for export purposes by the Department of Agriculture, Environment and Rural Affairs (DAERA).

OVs must sign and stamp the health certificate with the OV stamp in any ink colour **OTHER THAN BLACK**.

A certified copy of the completed certificate must be sent to the Animal Plant and Health Agency (APHA) Centre for International Trade at Carlisle within seven days of signing, or in the case of Northern Ireland to DAERA, Dundonald House, Belfast.

The OV should keep a copy for his/her own records.

#### 3. Schedules

Paragraph I. refers: Separate schedules may be used to identify the animals certified. These schedules must contain the same information as that required in paragraph I. and paragraph I. must be annotated "See attached schedules". Each page of the schedules must bear a page number and the health certificate reference number and must be signed, dated and stamped by the Official Veterinarian (OV).

The schedules must be stapled inside the health certificate and the OV should "fan" and stamp over the pages of the schedule and certificate. The top stapled corner of the schedules and certificate should be folded over and stamped also. Any blank spaces in the schedules or in paragraph I. must be deleted with diagonal lines.

#### 4. Import permit

Paragraph III.(e) refers: The exporter/agent should be aware of the requirements of the importing country particularly with respect to the requirement for an import permit. The import permit number should be given in the health certificate at paragraph III.(e).

5. **Notifiable disease clearance (form 618NDC)**

Paragraph IV.a refers: OVs may certify paragraph IV.a. on behalf of the Department provided written authority to do so has been obtained on form 618NDC from the APHA Specialist Service Centre - Exports - at Carlisle or the issuing office of DAERA in Northern Ireland.

6. **Embryo collection and processing (Paragraphs IV.n), s), v) and w) refer)**

IV.n) and w)

The Embryo Transfer team must be approved by Defra, and the embryo collection, treatment, freezing and storage procedures must comply with any conditions stipulated in Chapter 4.7 of the OIE Terrestrial Animal Health Code Appendix at:

[http://www.oie.int/index.php?id=169&L=0&htmfile=chapitre\\_coll\\_embryo\\_equid.htm](http://www.oie.int/index.php?id=169&L=0&htmfile=chapitre_coll_embryo_equid.htm)

In practice, if the Team has been approved by DEFRA or DAERA, the OIE requirements are deemed to have been complied with.

IV.s), v) and w)

The manual of the International Embryo Transfer Society is available to IETS members at

[https://www.iets.org/pub\\_manual.asp?autotry=true&ULnotkn=true](https://www.iets.org/pub_manual.asp?autotry=true&ULnotkn=true)

The embryo transfer team leader is responsible for complying with the relevant collection and processing conditions in this manual.

7. **Additional Support Assurances required to enable certain paragraphs to be signed by the Official Veterinarian.**

Paragraphs IV.d), IV.f), IV.g), IV.h), IV.j), IV.k), IV.l), IV.m), IV.o), IV.p), IV.q), IV.r), IV.t), IV.x) and IV.y) refer. OVs may certify these paragraphs based on personal knowledge of the embryo collection centre, or supporting certification from the embryo team veterinarian. If further guidance is required, CIT / DAERA should be contacted.

Paragraph IV. c) refers.

This paragraph can be signed as animals derived from approved establishments in IV.b) are in compliance with REGULATION (EC) No 999/2001.

IV.b) and IV.f)

With respect to Scrapie

To comply with IV.b) and IV.f) including the OIE recommendations, the donors have to originate from holdings which have a classical scrapie negligible risk status (ie have undergone active monitoring for at least 7 years) as listed in the Scottish Rural College (SRUC) Scrapie Monitoring Scheme (SMS) -

[http://www.sruc.ac.uk/info/120113/premium\\_sheep\\_and\\_goat\\_health\\_scheme/s/511/diseases\\_covered/5](http://www.sruc.ac.uk/info/120113/premium_sheep_and_goat_health_scheme/s/511/diseases_covered/5)

Scrapie Support Certificate 8133SPT for completion by the owner of the donors, the official / centre veterinarian and the APHA/DAERA veterinarian should be used to complete the certification of IV.b) and IV.f).

8. **Laboratory tests**

The OV must ensure that any laboratory carrying out pre-export testing is officially approved for this purpose by DEFRA or DAERA.

In Great Britain (England, Wales and Scotland), the majority of pre-export testing is carried out at the APHA Laboratory, New Haw, Weybridge, Addlestone, Surrey, KT15 3NB, (Tel: 01932 341111). Some tests are carried out at APHA Lasswade, Pentlands Science Park, Bush Loan, Penicuik, Midlothian, EH26 0PZ, (Tel: 0131 445 6169). Certain specialist tests are carried out at regional APHA laboratories.

In Northern Ireland, the majority of pre-export testing is carried out at the Veterinary Sciences Division (VSD) Laboratory, Stormont, Belfast, BT4 3SD (tel: 028 9052 0011).

For operational reasons however, the laboratories involved may change periodically. Accordingly, the OV is advised to check with the VLA or VSD to determine to which laboratories samples should be sent for testing. Samples should always be sent to the laboratory concerned sufficiently in advance of the export date to enable the tests to be carried out and reported. If in doubt as to the procedures for collection, the requirement for transport medium if any, dispatch of samples and the length of time a test is likely to take, the OV should seek the advice of the relevant laboratory.

**9. Sealing of the transport container**

Paragraph III.c) refers: The semen must be secured within a cryogenic container by a tamperproof seal applied in such a way that the container cannot be opened without breaking the seal. The number on the seal and the date of sealing must be entered at paragraph III.c) on the health certificate.

If it is necessary to top up the container, the additional liquid nitrogen used must meet the requirements of the certificate. Topping up should be done in the presence of an Official Veterinarian (OV) who must apply a new tamperproof seal. The OV must endorse paragraph III.c) on the health certificate with the new seal number, giving name and signature and dating and stamping the endorsement in the margin of the certificate in any ink colour **other than black**.

**10. Disclaimer**

This certificate is provided on the basis of information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country.

If these do not match, the exporter should contact the APHA Centre for International Trade at Carlisle, via the link below:
