Why work with us

If you're a buyer for the public sector, our **Network Services framework** is the solution to your networking and telecommunications needs.

innovative services – we work with suppliers to stay up to date with the latest technology

all your requirements covered – buy services from more than one lot for a total solution

we can save you time – we have searched the country to ensure we have the best suppliers on board

flexibility and choice – contract lengths to suit you, with offerings from a wide range of suppliers

What's on offer

Our Network Services framework agreement offers 10 services, from a wide range of suppliers to provide you with the best deals for:

- 1) data access services** – services enabling site to site or site to cloud interconnectivity, including terrestrial, wireless, IP connectivity, ISP and internet services
- 2) local connectivity services** – single site connectivity such as LAN, SAN, wired or wireless
- 3) traditional telephony services** – voice services enabling local traditional telephony equipment to be connected to the PSTN, includes SIP trunks, DDI ranges, CPS
- 4) inbound telephony services** – for established call centre functions
- 5) IP telephony services** – end-to-end IP telephony with ability to connect to PSTN - strictly IP based
- 6) mobile voice and data services** – includes SMS, voicemail, mobile data
- 7) paging services** – range of paging and mobile messaging services
- 8) video conferencing services** – traditional and IP based conferencing services
- 9) audio-conferencing services** – including a wide range of connected services
- 10) integrated communications** – to provide a consistent user interface cross range of end user devices
