# Technology Services 2
- CCS has got it covered

dedicated projects and programmes lot

enables a one-stop-shop

extensive suite of services

SME friendly

Why work with us

If you're a public sector buyer our Technology Services 2 framework is the perfect solution for all your ICT service requirements. Whatever your technology needs we are confident that **we have got it covered.**

we have the right mix of quality tested suppliers, to provide all of your technology services needs, we also offer flexibility and choice with contract lengths to suit your requirement

we cater for a variety of market strategies from disaggregation to single outsource vendor deals, and we have a dedicated projects and programmes lot for your large scale, complex or high risk requirements

we have provided a one-stop-shop where you can use agency rights for your prime or Service Integration And Management (SIAM) to access all of our other technology framework agreements

What's on offer

The Technology Services 2 framework offers you a choice of **4 lots** to source your technology services requirements at all government security classification levels:

1 Technology Strategy and Service Design

For assistance and support at any level with your ICT strategy and service design; this lot provides access to the specialists in this area, from business capability assessments through to the specification of the applications and toolsets to deliver your ICT services.

2 Transition and Transformation

For implementing your ICT strategy or services, site relocation or transition from your current services agreement; this lot provides all of the transition and transformational activities required, including legacy service decommissioning.

3 Operational Services

For services, processes and tools needed to manage the provision of your technology environment; this lot offers all of your operational service needs in 4 distinct service groupings. From end user support, operational security, supply chain management through to data related activities and DevOps.

4 Programmes and Large Projects

If you have a large programme or project, particularly with high financial investment, this is the lot for you. All aspects of lots 1-3 are included in this offering, as well as the ability to deliver programmes and projects at Secret and Top Secret government security classification.
