Document reference of application SCR	EDRM : Application Surrender - Forms and Supporting Information
Date and version of application SCR	Update to site report dated 31/10/2005

Surrender SCR Evaluation Template

If you haven't already completed previous sections 4.0 to 7.0, do so now before assessing the surrender.

8.0 Decommissioning and removal of pollution risk To be completed by EM/PPC officers
Has the applicant demonstrated that decommissioning works have been undertaken and that all pollution risks associated with the site have been removed? Has any contamination of land that has occurred during these activities been investigated and remediated?
<p>From: Area Regulatory Officer Sent: 26 March 2018 11:50 To: Permitting Officer Subject: RE: Longcliffe Quarries - surrender of EPR/PP3033LV</p> <p>This is as straight forward as it seems as the site never fully operated it's permitted areas and was very much keeping the permit "just in case". Potential increases under SROC persuaded them it was worth surrendering but there are no issues that I am aware of.</p> <p>From: Permitting Officer Sent: 21 March 2018 14:47 To: Area Regulatory Officer Subject: RE: Longcliffe Quarries - surrender of EPR/PP3033LV</p> <p>I know you did the surrender inspection back in October and confirmed this to be a low-risk surrender – so this seems straightforward but please give a shout if there's anything else you think we need to be aware of or discuss.</p>

9.0 Reference data and remediation (where relevant)

To be completed by GWCL officers

Has the applicant provided details of any surrender reference data that they have collected and any remediation that they have undertaken?

(Reference data for soils must meet the requirements of policy 307_03 Chemical test data on contaminated soils – quantification requirements). If the surrender reference data shows that the condition of the land has changed as a result of the permitted activities, the applicant will need to undertake remediation to return the condition of the land back to that at permit issue. You should not require remediation of historic contamination or contamination arising from non-permitted activities as part of the permit surrender.

Not Required – Low Risk Surrender

10.0a Statement of site condition

To be completed by EM/PPC officers

Has the applicant provided a statement, backed up with evidence, confirming that the permitted activities have ceased, decommissioning works are complete and that pollution risk has been removed and that the land and waters at the site are in a satisfactory state?

Clarification received from area regulatory officer – low risk surrender / site never fully operated.

10.0b Statement of site condition

To be completed by GWCL officers

Has the applicant provided a statement, backed up with evidence, confirming that the permitted activities have ceased, decommissioning works are complete and that pollution risk has been removed and that the land and waters at the site are in a satisfactory state?

Yes – within application “Forms and Supporting Information” > “Statement of Current Site Condition – Document 8”

Surrender SCR decision summary To be completed by GWCL officers and returned to NPS	Tick relevant decision
Sufficient information has been supplied to show that pollution risk has been removed and that the site is in a satisfactory state – accept the application to surrender the permit; or	✓
Insufficient information has been supplied to show that pollution risk has been removed or that the site is in a satisfactory state – do not accept the application to surrender the permit. The following information must to be obtained from the applicant before the permit is determined:	
Date and name of reviewer	Mark Taylor (Anke O'Donnell) 26/03/2018
