¹ LoS 'x' means 'LoS greater than or equal to x but less than x+1'. So 'LoS21', for example, is the chance of personnel serving more than or equal to 21 years but less than 22 years.

² Chance of promotion having already achieved the preceding rank considers males in the branch as a whole and is not specific to LoS. It is based on trained and untrained male personnel within the branch.

³ Average Return of Service is the average length of service for male personnel on exit. It considers male personnel in the branch as a whole and is not specific to rank or LoS.

Notes:

a. These data are based on the seven year span of actual data 2011/12 – 2017/18. By considering a cohort of individuals with the similar characteristics - **male Sqn Ldr** into the **WSO** branch with **19 years LoS** - average career projections have been calculated.

b. Defence Statistics' career forecasts are not based on the actual experience of any one individual, but rather are based on the historical behaviour of individuals with similar characteristics.
