Civil Service People Survey 2018

Civil Service People Survey 2009 to 2018: Employee engagement and theme scores over time

The Civil Service People Survey has run in October each year since 2009, meaning that 2018 marks our 10 year anniversary. The table and charts below tell you how your average Employee Engagement Index and theme scores have changed over time, for each year your organisation has participated in the survey.

	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018
Engagement Index	-	-	-	-	-	-	-	60%	67%	69%

Wellbeing

Unlike the questions B01-B62 which ask people to rate their agreement from strongly agree to strongly disagree, the four wellbeing questions use a 11-point scale. The scale ranges from 0 to 10 for each question, where 0 is equivalent to 'not at all' (e.g. 'not at all satisfied' or 'not at all worthwhile') and where 10 is equivalent to 'completely satisfied' or 'completely anxious').

For questions W01, W02 and W03 the percent positive is the proportion answering 7, 8, 9 or 10 to each question.	0-4	5-6	7-8	9-10	% Positive	Difference from previous survey	Difference from CS2018	Difference from CS High Performers	
W01 Overall, how satisfied are you with your life nowadays?	10 21		56	13	69%	+5 🔶	+3 🔶	0	
W02 Overall, to what extent do you feel that the things you do in your life are worthwhile?	10 16		52	22	74%	+8 🔶	+3 💠	0	
W03 Overall, how happy did you feel yesterday?	11 24	Ļ	48	17	66%	0	+3 🔶	0	
For question W04 the percent negative is the proportion answering 6, 7, 8, 9 or 10 to the question.	0-1	2-3	4-5	6-10	% Negative				
W04 Overall, how anxious did you feel yesterday?	19	32	20	29	29%	-6 🔶	-4 🔶	-1

Proxy Stress Index and PERMA Index

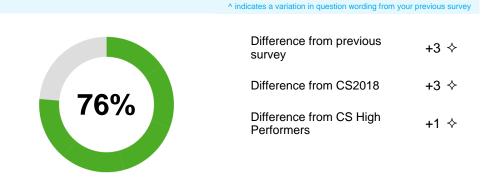

Proxy Stress Index

This index aligns to the Health and Safety Executive's stress management tool, using the 8 questions from the People Survey shown below. We calculate it in the same way as the Employee Engagement Index.

We have 'inverted' the final index so that it is a measure of conditions which can add to stress rather than alleviate stress, i.e. a higher index score represents a more stressful environment.

		% positive
B05	I have a choice in deciding how I do my work	84%
B08	My manager motivates me to be more effective in my job	79%
B18	The people in my team can be relied upon to help when things get difficult in my job	91%
B26	I am treated with respect by the people I work with	86%
B30	I have clear work objectives	86%
B33	I have an acceptable workload	69%
B45	I have the opportunity to contribute my views before decisions are made that affect me $% \left({{\boldsymbol{x}_{i}}} \right)$	60%
E03	During the past 12 months have you personally experienced bullying or harassment at work?	87%

PERMA Index

This index measures the extent to which employees are 'flourishing' in the workplace around the 5 dimensions: Positive emotion, Engagement, Relationships, Meaning and Accomplishment.

The index is computed using the questions from the People Survey shown below and combining them in the same way as the Employee Engagement Index.

A high score represents a greater proportion of employees agreeing with the statements below or rating the two wellbeing questions as high.

		% positive
B01	I am interested in my work	93%
B03	My work gives me a sense of personal accomplishment	81%
B18	The people in my team can be relied upon to help when things get difficult in my job	91%
W01	Overall, how satisfied are you with your life nowadays?	69%
W02	Overall, to what extent do you feel that the things you do in your life are worthwhile?	74%

Returns: 183

Civil Service People Survey 2018

Appendix

Glossary of key term	IS
% positive	The proportion who selected either "agree" or "strongly agree" for a question (or all questions within a theme in the case of Theme score % positive).
Previous survey	Comparisons to the previous survey relate to the results from the 2017 Civil Service People Survey. Where a question is flagged as changed since the last survey comparisons should be treated with caution as changes to wording may affect how people respond to the question.
CS2018	The CS2018 benchmark is the median percent positive across all organisations that participated in the 2018 Civil Service People Survey.
CS High Performers	For each question, this is the upper quartile score across all organisations that have taken part in the 2018 Civil Service People Survey. The 'CS High Performer' comparator for the Proxy Stress Index has been corrected (reissued 23/11/2018).

Rounding

Results are presented as whole numbers for ease of reading, with rounding performed at the last stage of calculation for maximum accuracy. Therefore in some instances, the differences presented in this report will not match the rounded figures of the scores being compared. For example, if your unrounded Engagement Index score is 75.43647583%, your organisation overall's score is 74.63572484% and the difference between the two is +0.800751%, in this report these scores would appear as 75%, 75% and +1.

Statistical significance: 🔶

Statistical testing has been carried out to identify statistically significant* differences between your results and a number of comparators. You can therefore be confident that the difference represents a real difference in opinion between the results.

*Note, there needs to be 30 responses at question level, 20 responses at theme level or 10 responses at index level for statistical testing to be carried out on the corresponding scores.

The employee engagement index

The survey includes five questions that make up the engagement index (B47-B51). The index score represents the average level of engagement in that unit and ranges from 0 to 100. An index score of 0 represents all respondents in that unit saying they strongly disagree to all five engagement questions and a score of 100 represents all respondents saying they strongly agree to all five engagement questions and a score of 100 represents all respondents saying they strongly disagree to all five engagement questions and a score of 100 represents all respondents saying they strongly agree to all five engagement questions.

The drivers of engagement

While the engagement index shows the average level of engagement, it does not show what you can do to improve engagement. A statistical technique (a form of regression) is used to identify the extent to which each question in the survey has an association with engagement. Questions identified as having an association are called 'Drivers of engagement': page 3 of this report shows the questions that had the strongest association with engagement in this unit.

Confidentiality

The survey was carried out as part of the 2018 Civil Service People Survey, which is managed by the Cabinet Office on behalf of all participating organisations. The Cabinet Office commissioned ORC International to carry out the survey. ORC International is a member of the Market Research Society, and is bound by their strict code of conduct and confidentiality rules. These rules do not allow for the breakdown of the results to the extent where the anonymity of individuals may be compromised. Groups of fewer than 10 respondents will not be reported on, however their responses do contribute to the overall scores for the unit and organisation they belong to and the overall Civil Service results.

ORC's Privacy Policy (www.orcinternational.co.uk/privacy) tells you how they keep personal data safe and who to contact to exercise your rights of control under the new GDPR regulations.
