<http://news.sky.com/story/govt-cuts-stakes-on-crack-cocaine-betting-terminals-in-gambling-review-11106636>

I am really disappointed that the review didn't go far enough regards LOBT Terminals

.
I've worked within the Amusement industry since 1992 and have found since the introduction of AGC centres that we've been absolutely hammered on regulations and tax .

You the government created the problems by allowing the £100 maximum stake whilst capping the AGC centres sole on a maximum £2 stake.

This is totally unfair and it certainly need to be addressed so we have a even playing field.

I would also ask you to increase the FEC jackpot to at least £8/£10 as this hasn't been visited since the £8 token was abolished for the £5 cash jackpot.

I would like to assure you the Amusement industry has got its house in order to protect problem addiction gamblers unlike the bookmakers.

I hope this helps you in your decision.

I've worked within the amusement industry since 1992 and I can honestly inform successive governments have decimated our industry through over regulation and excessive taxes imposed.

All we ask is parity with the stakes / prizes with the bookmakers which there is clearly not.

I would suggest this is a sensible solution:

£10 = £500

£5 = £300

£2 = £250

£1 = £100

Regarding cat D machines I would suggest to increase the jackpot level to £8 cash this is because our customer have informed me £5 is outdated now .

Perhaps you can consider this proposal I've put forward?

I hope the solutions I've put forward helps you make a decision.

I would like to suggest a increase in B3 units within a AGC centre from the current 20% to 40% as this world help the smallest operator and generate more revenue for the treasury.

Regards cat C machines they should have a jackpot of £200 with a maximum stake of £2.
