1 Introduction

1.1 Structure of this appendix

1.1.1 This document is an appendix to the cultural heritage assessment which forms part of Volume 5 of the Supplementary Environmental Statement 2 (SES2) and Additional Provision 2 Environmental Statement (AP2 ES). The following community areas (CA) are covered in this appendix:

- CA1: Fradley to Colton;
- CA2: Colwich to Yarlet;
- CA3: Stone and Swynnerton;
- CA4: Whitmore Heath to Madeley; and
- CA5: South Cheshire.

1.1.2 The cultural heritage appendices comprise:

- a baseline report (Volume 5: SES2 and AP2 ES Appendix CH-001-000);
- a gazetteer of heritage assets (this appendix); and
- impact assessment (Volume 5: SES2 and AP2 ES Appendix CH-003-000).

1.1.3 In addition survey reports incorporating geophysical survey and remote sensing studies are set out in Background Information and Data¹ (see BID CH-004-000 SES2 and AP2 ES) which accompanies the SES2 and AP2 ES.

1.1.4 This report should be read with reference to the following:

- the High Speed Two (HS2) Phase 2a (West Midlands - Crewe) Environmental Statement (ES)² published in July 2017 (the main ES);
- the High Speed Two (HS2) Phase 2a (West Midlands - Crewe) Background Information and Data (BID)³ published in July 2017 (the main BID reports);
- the High Speed Two (HS2) Phase 2a (West Midlands - Crewe) Supplementary Environmental Statement (SES1) and Additional Provision Environmental Statement (AP1 ES)⁴ published in March 2018;
- the High Speed Two (HS2) Phase 2a (West Midlands - Crewe) Background Information and Data⁵ which accompanied the SES1 and AP1 ES published in March 2018; and

- the High Speed Two (HS2) Phase 2a (West Midlands - Crewe) Background Information and Data which accompanies the SES2 and AP2 ES¹.

1.1.5 In order to differentiate between the original scheme and the subsequent changes, the following terms are used:

- 'the original scheme' – the Bill scheme submitted to Parliament in July 2017, which was assessed in the main ES;
- 'the SES1 scheme' – the original scheme with the changes described in the SES1 submitted in March 2018;
- 'the AP1 revised scheme' – the SES1 scheme as amended by the AP1 submitted in March 2018;
- 'the SES2 scheme' – the SES1 scheme with the changes described in the SES2; and
- 'the AP2 revised scheme' – the SES2 scheme as amended by the AP2.

1.2 Scope and coverage

1.2.1 The information set out in this appendix presents:

- SES2: data defined as a 'SES2 change' as it presents updated and corrected baseline information to supplement the information that was reported in the main ES and SES1; and
- AP2 ES: data to inform an 'AP2 amendment'.

1.2.2 This appendix provides descriptive information for:

- heritage assets that have been identified as the result of surveys carried out since the publication of SES1 in CA1, CA3 and CA4; and
- heritage assets within the AP2 revised scheme areas in CA1, CA2, CA3, CA4 and CA5.

1.2.3 The cultural heritage assessment is detailed in the SES2 and AP2 ES:

- Volume 2: Community area reports;
- Volume 3: Route-wide effects; and
- Volume 5: Appendices.

1.2.4 All identified assets listed in in this report are shown in the SES2 and AP2 ES Volume 5: Cultural heritage Map Book, Map Series CH-01 and CH-02.

1.2.5 The descriptions in this gazetteer relate to identified designated and non-designated heritage assets that lie within the following study areas:

⁵ HS2 Ltd (2018), *High Speed Two (HS2) Phase 2a (West Midlands - Crewe), Background Information and Data that accompanied Supplementary Environmental Statement (SES1) and Additional Provision Environmental Statement (AP1 ES)*, <https://www.gov.uk/government/collections/hs2-phase-2a-supplementary-environmental-statement-and-additional-provision-environmental-statement#background-information-and-data>

- designated assets where the assessment has determined a potential for impacts on setting or significance within 2km of the land required for the AP2 revised scheme and the Zone of Theoretical Visibility (ZTV); and
- all non-designated assets and their settings within the land required for the AP2 revised scheme and within a 100m buffer zone⁶.

1.2.6 Heritage assets have been grouped where appropriate e.g. clusters of listed buildings within conservation areas or groups of archaeological features.

1.2.7 For each asset or group of assets the following information has been provided:

- unique identifier: e.g. FRC001;
- asset type: simple classification of asset type using the following classes:
 - archaeology;
 - built heritage;
 - historic hedgerow;
 - historic landscape; and
 - settlement.
- name: either name used in designation record(s) or other identifiable name;
- description: short description of the asset and, where relevant, its setting;
- period: primary period relating to asset using period classifications from the main ES Volume 5: Appendix CH-001-001 Cultural heritage baseline report;
- grade: where applicable, grade of any designated assets;
- significance / value: score based on Scope and Methodology Report classifications i.e. high, moderate, low, not significant; an 'unknown' category has been introduced in respect of Light Detection and Ranging (LiDAR) and aerial photographic investigation (API) features, in instances where there is presently insufficient evidence to determine significance;
- National Heritage List (NHL) reference: NHL reference for designated assets, where relevant; and
- Historic Environment Record (HER) reference.

⁶ Impacts on non-designated assets within highways extending away from the AP2 revised scheme have been scoped out because the nature of the impacts and the location of the non-designated assets preclude the potential for a significant effect

FRC019	Archaeology	Cropmark complex south of Ashby Sitch	Cropmarks visible on aerial photographs, which may represent a Bronze Age round barrow and three rectilinear enclosures (possibly settlement enclosures) of probable Iron Age or Roman date, located between the Bourne Brook and Ashby Sitch. Also present are a number of linear cropmark boundaries some of which may be contemporary with the enclosures, but others are likely to represent the remains of medieval field boundaries. FRC020	Archaeology	Cropmark complex at Bourne Brook	A cropmark complex visible on aerial photographs, which contains the remains of multiple possible Bronze Age round barrows; probable Iron Age trackways defined by parallel, closely spaced pit alignments and probably contemporary field boundaries defined by both pit alignments and continuous ditches; a probable two-celled rectilinear enclosure of likely Iron Age date defined by pit alignments, contained within a two-celled enclosure defined by continuous ditches of Iron Age or later date; multiple curvilinear enclosures defined by pit alignments, all likely to be of Iron Age date; and multiple square enclosures of likely Iron Age or Roman date. A piece of mortarium dating to approximately AD100 found in a pit to the east of Shaw Lane Farm within this cropmark complex attests to early Roman activity at this location. Also present in the cropmark complex are multiple linear boundaries some of which may be contemporary with the prehistoric and Roman features, but many of which are likely to be medieval and/or post-medieval field boundaries. FRC089	Built heritage	Woodhouse Farmhouse	A mid-18 th century red brick farmhouse with 17 th century timber framed core and 17 th century brick chimneystack with star-shaped shafts. Adjacent to the farmhouse to the north are three ranges of non-designated 19 th century farm buildings arranged around a U-shaped courtyard. The asset's setting is primarily defined by the large working farm complex to the north and north-west, its gardens to the east and south-east and by Pipe Wood Lane, which runs in front of the main elevation of the asset, and the rural landscape beyond towards Quinton's Orchard, Hill Ridware and Rugeley Power Station approximately 3.5km away. STSo64	Archaeology	Buried remains of prehistoric activity indicated by geophysical survey	Partial potential oval or sub-circular ring ditch enclosure and pit clusters identified in a geophysical survey (BID-CH-004-003-Geophysical survey CA03-2354) approximately 500m east of the Rowe and 700m south-east of Stableford. Additional geophysics after the publication of the main ES has increased the known area of the archaeology. Geophysics identified two further linear anomalies (PA03 001 and PA03-001), as well as other anomalies, including a feature comprising two possible concentric circular gullies/ditches. These anomalies are indicative of ditch features and may represent part of a prehistoric enclosure or later land divisions.	Iron Age	Non-designated	N/A	Moderate	N/A	N/A

WHM109	Archaeology	Buried remains of prehistoric activity indicated by geophysical survey	An area in a field approximately 1.2km to the south of Madeley where geophysics has identified a number of possible archaeological features clustered in close proximity. They include a possible round barrow, pits and boundaries. They cover an area of approximately 500m ² . The features are situated in a field overlooking the confluence of tributary streams of the River Lea, on the opposite side of the valley from the substantial extant barrow WHMo28. FRCoo8	Conservation area	Trent and Mersey Canal Conservation Area	The canal was one of the first major inland waterways constructed and formed one of the main arteries of the nation's principal transport and communications system in the late 18 th and first half of the 19 th century. The canal formed a connecting waterway between the rivers Trent and Mersey and therefore the ports at Hull and Liverpool. James Brindley surveyed the route of the canal and its construction was supported by significant members of the industrial elite, including Josiah Wedgwood, and by major landowners across Staffordshire including Thomas Anson of Shugborough Estate. The canal opened in 1777 and immediately significantly reduced the cost of moving raw materials compared with using the existing road network. Use of the canal dwindled following the advent of the railways in the mid-19 th century. The canal lies within a primarily rural landscape setting with some sections running through industrial areas, including Rugeley where the canal was used for transporting coal. Much of the rural landscape has changed little since the construction and initial use of the canal. Towpaths that are now used as public footpaths provide important access to the canal, from which the historic character of the structures and peaceful landscape setting can be appreciated. This asset was reported in the HS2 Phase One ES as WHA340.	Post-medieval	Conservation area	N/A	Moderate	N/A	DST5720
FRCo62	Archaeology	Rugeley and Alrewas Turnpike Road	An approximately 15km (9.5 mile) long toll road, which linked the towns of Rugeley and Alrewas and was a separate branch of the Rugeley and Stone turnpike. The route had two main gates and one side gate and was first recorded in the 19 th century.	Post-medieval	Non-designated	N/A	Low	N/A	MST22377
FRCo84	Archaeology	Pits, linear features and a ring ditch north of Pipe Ridware	A number of pits and ditches, visible as cropmarks on aerial photographs to the north-east of Parva House, Pipe Ridware. Archaeological monitoring during the construction of a pipeline through the area identified the remains of a circular ditch (ring ditch), with an internal diameter of approximately 7m, which contained three charcoal-filled pits. It could not be determined whether the circular-ditched feature represented the remains of a roundhouse or a small burial mound. The cropmark ditches do not align with the boundaries of the post-medieval piecemeal enclosure field system, and may be the remains of an Iron Age or Romano-British field system. FRC095	Archaeology	Rectilinear enclosure, west of Pipe Wood Lane, Pipe Wood, Mavesyn Ridware	A probable Iron Age or Roman rectilinear enclosure and ditch visible as cropmarks on aerial photography. The enclosure is defined by a ditch, aligned on a north-east to south-west alignment and measures approximately 62m by 70m. A linear ditch extends across the north-east side of the enclosure. These cropmarks are partially overlain by later ridge and furrow earthworks.	Iron Age / Roman	Non-designated	N/A	Moderate	N/A	MST22228
FRC117	Archaeology	Earthwork remains of a narrow ridge and furrow, Colton	The surviving earthwork remains of a narrow ridge and furrow identified from satellite images (ArcGIS satellite imagery December 2016), aerial photographs (BID-CH-004-001, Aerial Photograph feature 54) and LiDAR data (BID-CH-004-001, LiDAR features 1084, 1212, 1211 and 1220). FRC131	Built heritage	Newlands Farmhouse and associated barn and stables	An early 18 th century virtual rebuild of a 16 th century farmhouse with red brick used to replace an earlier timber framing. The farmhouse retains much of its original architectural form although some alterations were made in the 19 th and 20 th centuries. Immediately to the north-east of the farmhouse lie its early 18 th barn and stables, which have been designated for group value with the farmhouse.	Post-medieval	Listed building	2 x II	Moderate	1293745, 1038776	N/A
FRC153	Archaeology	Possible site of a medieval deer park, Colton Hall Farm	A deer park, first recorded in 1359 as Colton Park, which probably lay around the site of the later Colton Hall. Several field names in the area shown on a map of 1724 (referenced in HER record) contain the element 'park'.	Medieval	Non-designated	N/A	Low	N/A	MST18591
FRC158	Archaeology	Cropmark complex, Eastfields, Kings Bromley	A cropmark complex visible on aerial photographs, which contains the remains of a possible Bronze Age barrow cemetery, an Iron Age field system defined by pit alignments, and other prehistoric features including enclosures, a dyke, a trackway and boundaries. These features are, in part, overlain by a medieval gravel pit and post-medieval field system. Other linear features and pits of unknown date have also been recorded in the area. FRC173	Built heritage	Colton Hall Farm	Post-medieval farmstead depicted on historic mapping since the 19 th century. Would appear to retain the farmhouse and many of the ranges of historic farm buildings. The setting of the asset is primarily defined by the farmyard and the grounds laid out to the south and west of the farmyard. There are some views to the surrounding rural landscape that forms its wider setting, although the eastern boundary is currently screened with trees.	Post-medieval	Non-designated	N/A	Low	N/A	N/A

FRC174	Archaeology	Cropmarks at Colton Hall Farm, Colton	A group of linear, curvilinear and rectangular cropmarks visible on aerial photographs. The cropmarks do not appear to be on previous road or field boundary alignments, and have been interpreted as possibly being associated with the former Colton Hall manor.	Unknown	Non-designated	N/A	Low	N/A	MST1654, MST18884
FRC178	Archaeology	Cropmark enclosure, Cawarden Springs, Mavesyn Ridware	The cropmark, visible on aerial photographs, interpreted as the remains of a rectangular enclosure of probable prehistoric date.	Prehistoric	Non-designated	N/A	Moderate	N/A	MST18883
FRC180	Archaeology	Water meadows north of Brereton and south of Cawarden Springs Wood	The area of a former water meadow largely destroyed by the construction of a golf course, though some drains may survive immediately adjacent to the River Trent (ArcGIS satellite imagery February 2017).	Post-medieval	Non-designated	N/A	Low	N/A	MST18599, MST18609
FRC188	Archaeology	Boothhurst, Rugeley	The site of a now destroyed former farmstead likely to have been established in the late 18 th or early 19 th century.	Post-medieval	Non-designated	N/A	Not significant	N/A	MST11220
FRC189	Archaeology	Possible squatter settlement, Langley Common, Rugeley	The site of a set of now demolished adjoining cottages visible on the 1st and 2nd edition Ordnance Survey maps (1852), which may have represented squatter settlement on common land in this area.	Medieval to Post-medieval	Non-designated	N/A	Not significant	N/A	MST11221
FRC238	Built heritage	Cedar House and Streethay House Farmhouse	Two houses on the northern edge of Streethay overlooking the A5127 (Ryknield Street). They are both substantial mid to late 18 th century brick houses. The key elements of their setting lie in their relationship to each other, the road and the historic core of Streethay.	Post-medieval	Listed building	2 x II	Moderate	1038907, 1294996	MST9238, MST9281
FRC239	Built heritage	Netherstowe House, Stowe	Textile mill and house within an area of extensive modern development on the north-eastern edge of Lichfield. The house probably dates to the late 17 th century or early 18 th century with north range and mill owner's house being 1800s or earlier. Its historic setting has largely been destroyed by the development of the surrounding modern estate.	Post-medieval	Listed building	II	Moderate	1292221	MST10832

FRC240	Built heritage	The Hill Farm	Mid-18 th century to early 19 th century red brick farmhouse with tiled roofs and a complex T-shaped plan. Two storey with an attic. The asset derives its significance from its architectural value. The most important elements of its setting lie in the group relationship with surrounding farm buildings and with surrounding agricultural landscape.	Post-medieval	Listed building	II	Moderate	1038849	N/A
FRC241	Built heritage	Ashmore Brook House and Ashmore Brook Farmhouse	Two brick farmhouses c.1km north-east of Lichfield, either side of Cross in Hand Lane. One has 16 th /17 th century timber-framed core with later additions, one is 19 th century. Their settings are defined by the groups of surrounding farm buildings, the lane and the agricultural landscape beyond.	Post-medieval	Listed building	2 x II	Moderate	1038887, 1374274	MST10147, MST 13975
FRC242	Built heritage	Lea Grange	A farmhouse reputedly with a 16 th century core, refaced in mid-19 th century and extended and altered in the 20 th century. Rendered brickwork with a tiled roof and tall ridge stack inset from the ends. Although it lies only a short distance outside Lichfield it retains a rural setting, including a group of surrounding historic brick farm buildings.	Post-medieval	Listed building	II	Moderate	1038882	N/A
FRC243	Built heritage	Milepost at SK 102 115	Possible early 20 th century cast iron milepost on the A515, less than a kilometre north of Lichfield. It is triangular, standing to c.600mm inscribed "Elmhurst/ Parish". The left face is inscribed "Handsacre, Abbots- Bromley, Otoxetter" and right face "Lichfield". Its setting is defined by its relationship with the adjacent road.	Post-medieval	Listed building	II	Moderate	1188116	MST10138
FRC244	Settlement	Stychbrook Deserted Settlement	Stychbook deserted settlement located north edge of Lichfield, consists largely of woodland. Shown on the first edition OS maps as a substantial farmstead with associated fishpond, its likely to be the location of a deserted medieval settlement.	Medieval	Non-designated	N/A	Moderate	N/A	MST2079
FRC245	Built heritage	The Mill Farm, Farewell	Early 19 th century red brick corn mill with tiled roof, two storeys and a deep attic lying on Cross in Hand Lane, immediately outside the village of Farewell. Mill wheel (now missing) probably undershot and housed in lower addition to the right. Machinery remains fairly complete to upper floors including fixed lower grinding stones. Its relationship with the lane, Bilson Brook and the village are the essential elements of its setting.	Post-medieval	Listed building	II	Moderate	1038847	N/A

FRC246	Built heritage	Church of St. Bartholomew, Farewell including Ashmall memorial	Parish church dating from the 1300s, largely rebuilt in the mid-18 th century and restored mid-19 th century. Chancel, nave and west tower built with a mix of stone, red brick and tiled roof. Pedestal stone tomb of Robert Ashmall (of Farewell Hall), who died in 1810. The relationship of the church with the surrounding village is the most important aspect of its setting.	Medieval	Listed building	II*, II	High	1374273, 1294894	MST10141, MST 10142
FRC247	Built heritage	Farewell Manor and Farewell Hall	Farewell Manor, a mid-18 th century red brick farmhouse, with substantial early 19 th century additions. Farewell Hall, a large early 18 th century red brick farmhouse that was a rebuilding of a 17 th century house with minor 20 th century alterations. Their relationship with one another, the nearby church and surrounding countryside are the most important aspects of their setting.	Post-medieval	Listed building	II*, II	High	1038886, 1188143	MST10144, MST 5214
FRC248	Archaeology	Linear earthwork, Streethay	Linear earthworks in Streethay in the form of a large ridge running north-east to south-west. Possibly a trackway or causeway associated with the potential Roman Villa site (FRC249) which lies to the north-east of the linear earthwork.	Roman	Non-designated	N/A	Low	N/A	MST4663
FRC249	Archaeology	Possible Roman Villa site, Curborough	The possible site of a villa or settlement site with a possible kiln, identified from the large number of finds of Roman date recovered from this area. Evidence for mid to late prehistoric activity (from the Mesolithic through to the Iron Age) along with early medieval and medieval assemblages.	Roman	Non-designated	N/A	High	N/A	MST4660
FRC250	Built heritage	Curborough Farm / Old Hall Farm, cart shed, cowhouse and stable, farmhouse, farm building and barn, Watery Lane, Curborough	A late 18 th century courtyard farm with a brick farmhouse and cow shed. The farmhouse is a detached L-shaped building. The cow shed, which also faces onto the courtyard, has 8 bays. There are a number of surrounding modern farm buildings.	Medieval	Non-designated	N/A	Low	N/A	MST22154
FRC251	Archaeology	Moated Site, Curborough	Possible moated site and former site of Curborough Hall. Curborough was the focus for a medieval settlement, first mentioned in documentary sources in the 13 th century, although it is possible that there was some continuity of settlement from the Roman period onwards. FRC298	Built heritage	Hawkesyard Hall moated site, including Hawkesyard Priory Park, Armitage Park	Hawkesyard Hall moated site is the remnant of a 14 th century hall now in ruins below the rebuilt Spode House. Armitage Park has been used as a hunting ground since 1270. A landscape park around Hawkesyard House, which was probably created gradually through the successive purchase of land by Nathaniel Lister from the mid- 18 th century onwards. The park has a number of surviving features including a fishpond, icehouse, glasshouses, plus formal gardens including a large sunken garden like complex. A fishpond which was extant by the late 19 th century. It has been suggested that this may have been used as a fire pool. The fishpond is also heavily associated with the designation of a portion of Armitage Park as a priory in 1898, until the early 20 th century when it became a monastery and boarding school until 1988. The eastern half of the park is now a golf course. This area is now known as Hawkesyard Priory Park.	Post-medieval	Non-designated	N/A	Moderate	N/A	MST6006

COY019	Archaeology	Enclosure, Tolldish Lane, Colwich	A sub-rectangular enclosure of uncertain date, identified as a cropmark feature on aerial photography from 1979 to the south of Tolldish Lane, Tolldish, Colwich. The enclosure may be late prehistoric or Roman in origin.	Bronze Age, Iron Age, Roman	Non-designated	N/A	Low	N/A	MST4278
COY045	Archaeology	Hoo Mill cropmarks	Cropmarks immediately west of Hoo Mill, including two ring-ditches (possibly Early Bronze Age burial mounds) as well as Iron Age and/or Romano-British settlement/field systems (BID-CH-004-002-Aerial Photograph feature 88, 90). The asset lies adjacent to the road with open fields to the north. Possible contemporary features lie to the north (COY048).	Bronze Age, Iron Age, Roman	Non-designated	N/A	High	N/A	N/A
COY046	Archaeology	Trent water meadows	Extensive traces of post-medieval water meadows in the floodplain of the Trent Valley to the north of Great Haywood. These irrigation networks were probably constructed in the 18 th century. These comprised networks of brick channels designed to flood the fields in winter/early spring, creating meadows with soils enriched by the silts deposited by the river water. They appear to have been significantly degraded in recent years as a result of plough damage (BID-CH-004-002-Aerial Photograph feature 86; LiDAR feature 1067). The current setting is still largely open agricultural land with the settlement of Great Haywood to the south-east.	Post-medieval	Non-designated	N/A	Low	N/A	N/A
COY048	Archaeology	Ingestre gravels cropmarks	A group of cropmarks found on the gravels on the west side of the River Trent and to the east of Ingestre Park, including three ring-ditches, probably the external ditches of Bronze Age burial mounds (one of these is exceptionally large, approximately 20m diameter, with a second external ditch). There are also linear cropmarks apparently indicative of Iron Age/Romano-British rural settlements, including a potential square barrow and a double pit alignment, possibly indicating a former hollow way. Two Neolithic polished axes were found together in this area. The asset is situated within a rural landscape on the western edge of the river valley. Areas of woodland adjoin the asset to the west and east. Possible contemporary features lie to the south (COY045) and north-west (COY051).
