Geoarchaeology update

Route-wide strategies

- Deposit model completed for Area North January 2019
- G.I. review completed in Area Central and 12 locations identified for further geoarchaeological investigation
- S2 strategy focusing on the River Pinn and New Years Bourne in S2 combining geoarchaeology and geophysics
- Peat deposits dating to the Early Neolithic at Denham
- Upcoming Palaeolithic meeting (Feb 2019)
- Environmental Archaeology round-table (Jan 2019)

G.I. and MWCC

- EWC scoping with Main Works Contractors
-

20 SEP Late Prehistoric and Roman settlement

by John Halsted in Categories One

Ongoing geophysical survey results in Area Central are regularly identifying what appear to be Late Prehistoric and/ or Romano-British settlement. Is a pattern emerging? How do these results compare with what we know already about forms and patterns of settlement in these periods?
