# About Public Health England

Public Health England exists to protect and improve the nation's health and wellbeing, and reduce health inequalities. We do this through world-leading science, knowledge and intelligence, advocacy, partnerships and the delivery of specialist public health services. We are an executive agency of the Department of Health and Social Care, and a distinct delivery organisation with operational autonomy. We provide government, local government, the NHS, Parliament, industry and the public with evidence-based professional, scientific and delivery expertise and support.

# Introduction

The National Drug Treatment Monitoring System (NDTMS) data helps drug treatment demonstrate the outcomes it achieves for the people it treats and in doing so aids accountability for the money invested in it. NDTMS is a national standard and is applicable to young people and adults within community and secure setting based treatment providers.

This document establishes the technical definition (data schema) for data that is collected as part of the NDTMS criminal justice data set.

It establishes for each item:

- section number:
  1. Client
  2. Episode
  3. Sub intervention review (SIR)
  4. Referral to structured treatment
  5. Outcomes profiles – TOP
- field description
- CSV file header
- layout
- verification rules
- CDS introduced

The criminal justice dataset is a national standard and is applicable to adults within community based treatment providers.

This document is intended to be a definitive and accessible source for use. It is not intended to be read from end to end, rather as a reference document, which is utilised by a variety of readers including:

- interpreters of data provided from PHE systems
- suppliers of systems to PHE
- suppliers of systems which interface to PHE systems
- PHE/National Drug Treatment Monitoring System (NDTMS) personnel

This document should not be used in isolation, it is part of a package of documents supporting the NDTMS data set and reporting requirements.

Please read this document in association with:

- **CJIT CSV file format specification** – defines the format of the CSV file used as the primary means of inputting the core data set into NDTMS including the naming standard and layout to be used
- **CJIT reference data** – provides permissible values for each data item
- **NDTMS geographic information** – provides the locality information eg DAT of residence, Local Authority etc.
- **CJIT business definitions** – provides the explicit definition of each of the fields we collect to ensure data is consistent

To assist with the operational handling of CSV input files, each significant change to the NDTMS data set is allocated a letter.

The latest version (commonly referred to as the NDTMS data set O) for national data collection will come into effect 1 April 2018.

## Data entities

The data items listed in this document may be considered as belonging to 1 of 5 different sections which are used throughout this document. These are:

- client
- episode
- sub intervention review (SIR)
- referral to structured treatment
- outcomes profiles - TOP

In general, all data is required. Fields marked as 'mandatory' must be provided on all records, all other fields should be provided as and when the client progresses through their treatment.

Note, that if the client has not given consent for the data to be shared with NDTMS, then only AGENCY, CONSENT and CLIENTID need to be provided – for further clarification please refer to Section 3 below.

CLIENTID, EPISODID, MODID, SUBMID, REFERID and TOPID are included in this document for technical support purposes. It is expected that these values are unique and static and the nature of their population will depend upon the clinical software used by the agency which produces the NDTMS CSV extract.

All data items should be provided in code values only. Only headers and items relevant to the dataset letter being submitted should be present in the CSV file.

## Extraction criteria for no consent records

All extraction criteria are covered in the NDTMS CSV file format specification.

Where the client has **not given consent** for their data to be shared with NDTMS, then the CONSENT field should be populated with “N” and the CLIENTID field populated with an identifier which uniquely identifies the client in the source system – apart from AGENCY no other fields for this record should be populated.

Within a secure setting, where the service wishes to hold back records from the extraction process on a case by case basis for protecting the identity of any high profile prisoners or those on witness protection, then CONSENT should be populated with “N” and CLIENTID populated with an identifier which uniquely identifies the client in the source system – apart from AGENCY no other fields for this record should be populated.

Note CLIENT and CLIENTID must be unique and not contain any attributable information; a possible source for this field could be the row number of the client in the source system.

Note: Consent is at the episode level, so it is possible that a client could consent to 1 episode and then not consent to another (in which case, there would be 2 records).

Software suppliers should produce 1 record for each no consent episode. If a client had 3 episodes (2 of which are no consent) then the software supplier should produce 2 no consent records eg 1 record per no consent episode and the full consented to episode.

# Criminal justice data set fields

1. Client details					
Col no.	Field description	CSV file header	Layout	Verification rules	Introduced in CDS
1	Initial of client's first name	FINITIAL	A(1)	1; 2	CDS – L/Jan 14
2	Initial of client's surname	SINITIAL	A(1)	1; 2	CDS – L/Jan 14
3	Client date of birth	DOB	YYYYMMDD <sup>1</sup>	1; 2; 3; 6; 7	CDS – L/Jan 14
4	Client sex at registration of birth	SEX	N(1)	1; 2	CDS – L/Jan 14
5	Nationality	NATION	C(3)	1	CDS – L/Jan 14
6	Ethnicity	ETHNIC	C(2)	1	CDS – L/Jan 14
7	CJIT Agency code	AGNCY	C(5)	1; 2	CDS – L/Jan 14
8	Client reference number	CLIENT	C(36)	1; 2; 47	CDS – L/Jan 14
9	Client ID	CLIENTID	C(36)	1; 2; 20; 47	CDS – L/Jan 14

2. Episode details					
Col no.	Field description	CSV file header	Layout	Verification rules	Introduced in CDS
10	Software system and version ID	CMSID	C(50)	1; 2	CDS-N / Apr 17
11	Consent for NDTMS	CONSENT	A(1)	1; 2; 20	CDS – L/Jan 14

<sup>1</sup> This shows how all dates should be formatted, programming languages and the implementation of how the `YYYYMMDD` string is generated is left entirely to the 3rd party software supplier

<b>2. Episode details</b>					
<b>Col no.</b>	<b>Field description</b>	<b>CSV file header</b>	<b>Layout</b>	<b>Verification rules</b>	<b>Introduced in CDS</b>
12	Episode ID	EPISODID	C(36)	1; 2; 47	CDS – L/Jan 14

**Key**

<b>N</b>	Numeric
<b>A</b>	Alphabetic (upper case)
<b>C</b>	Alphanumeric
<b>DD</b>	Numeric day (including a leading zero, if relevant)
<b>MM</b>	Numeric month (including a leading zero, if relevant)
<b>YYYY</b>	Numeric year

## Verification rules

When the data is received by NDTMS, it is subjected to a validation process. Each data item will be subjected to none, 1 or more verification rules. Note this list refers to the most significant validations performed only.

Rule no.	Description
1	There must be no leading or trailing spaces in any field
2	Field is mandatory
3	Must be a valid date, down to the day (eg in the form YYYYMMDD)
4	Item is mandatory if any items in this section are not null
6	Date of Birth must be after 1902, and before Date of the event which prompted this contact, reporting period end date (1 year plus 1 day before Date of the event which prompted this contact)
7	Date must be historic (ie on or before the current date)
9	Contact/Assessment date must occur on or after the Date of the event which prompted this assessment and before Closure Date
10	Closure Date must occur on or after the Date of the event which prompted this assessment and Contact/Assessment Date
13	Closure Reason must be provided if Closure Date is present (and vice versa)
14	Caseload Start Date must occur on or after the Contact/Assessment date and on or before Closure Date
20	If Consent for NDTMS is not Y then Client ID must be given and an agency code
23	Number of days must be a value between 0 and 28 (inclusive)
24	Units of Alcohol must be a value between 0 and 200 (inclusive)
27	Drinking Days must be provided if Units of Alcohol is present (and vice versa)
28	The Post Outcode and the Post Incode) Only partial postcodes should be submitted and must be separated by a space (eg NW7 3). For NFA the postcode should be ZZ99 3.
29	Number of days in previous 28 days. Value must be between 0 and 28 (inclusive) or 99 (not answered)
30	Client reported score between 0 and 20. Value must be between 0 and 20 (inclusive) or 99 (not answered)
31	Date must be on or after Date of Birth (plus 1 year and 1 day)
32	TOP date must occur on or after Date of the event which prompted this assessment and on or after Contact/Assessment date
33	TOP (with a classification of a treatment stage of Treatment Start) must be before all Review TOP dates. TOP dates; must be before all Post Treatment Exit TOP dates; must be on or before the (episode) closure date.
37	Must be Y or N or 99 (Not answered)

Rule no.	Description
41	Field must contain a value if TOP/AOR data is being provided (TOP date is present)
42	A value of IV Drug Use = 0 and Sharing = yes is not permissible
43	Only 1 TOP can be submitted per episode for Treatment Start TOP
47	Must be unique, static and not hold or be composed of attributers which might identify the individual
80	Field must contain a value if sub intervention data is being provided (sub intervention date is present)
81	Must be populated if agency code is given
82	The DAT/LA area or prison transferred from should not be populated If closure reason is not “client transferred to another service area or prison prior to care plan” or “client transferred to another service area or prison”
83	The DAT/LA area or prison transferred to is mandatory when the closure reason is populated with either “client transferred to another service area or prison prior to care plan” or “client transferred to another service area or prison”
84	An episode should only be extracted if it has a caseload start or closure date. (Extract criteria)
85	A referral to structured treatment cannot be added after the episode closure date. (Extract criteria)
86	A referral should only be saved with a caseload start
87	The closure date cannot be saved without a closure reason and inversely the closure reason cannot be saved without a closure date
88	The referral date cannot be entered after closure date
89	A sub intervention cannot be entered after the caseload closure date
90	A sub intervention should only be saved with a caseload start
91	The sub intervention assessment date should be before the caseload closure date
92	The sub intervention assessment date cannot be before the caseload start
93	When selected gender is male, pregnant should be null
