Chapter 4, The Environmental Permitting (England and Wales) Regulations 2016

# Standard rules SR2008No2 - household, commercial and industrial waste transfer station (no building) – existing permits

# Introductory note

This introductory note does not form part of these standard rules.

These standard rules are only available for existing SR2008No2 permit-holders. New applicants should use standard rules SR2015 No5.

When referred to in an environmental permit, these rules will allow the operator to operate a Household, Commercial and Industrial Waste Transfer Station at a specified location, provided that the permitted activities are not carried out within 200 metres of a European Site<sup>1</sup>, Ramsar site or a Site of Special Scientific Interest (SSSI); or within 50m of any well spring or borehole used for the supply of water for human consumption. This must include private water supplies. Furthermore, the permitted activities must not be carried out within 200 metres of any residential dwelling or workplace.

Permitted wastes are limited to non-hazardous wastes and do not include hazardous wastes such as asbestos. The total quantity of waste that can be accepted at the site under these rules must be less than 5,000 tonnes a year. Wastes can be bulked up for disposal or recovery elsewhere and can be manually sorted or separated for recovery but these rules will not allow any waste treatment activities such as screening and crushing. These rules will also not permit the burning of any wastes, either in the open, inside buildings or in any form of incinerator.

These rules do not allow any point source emission into surface waters or groundwater. However, under the emissions of substances not controlled by emission limits rule:

- Liquids may be discharged into a sewer subject to a consent issued by the local water company.
- Liquids may be taken off-site in a tanker for disposal or recovery.
- Clean surface water from roofs, or from areas of the site that are not being used in connection with storing and treating waste, may be discharged directly to surface waters, or to groundwater by seepage through the soil via a soakaway.

This permit allows waste recovery activities. Please note that any processed materials will continue to be regulated as waste until they meet the end of waste test in accordance with Article 6 of Directive 2008/98/EC. You can demonstrate that you have met the end of waste tests by either:

meeting all the criteria set out in any relevant and applicable EU End of Waste regulations; or

<sup>&</sup>lt;sup>1</sup> A candidate or Special Area of Conservation (cSAC or SAC) and proposed or Special Protection Area (pSPA or SPA) in England and Wales.

a case by case assessment taking into account the applicable case law, which includes meeting all
the requirements of a relevant and applicable Quality Protocol or Defined Industry Code of Practice
(e.g. CL:AIRE Development Industry CoP).

# **Rules**

# 1 - Management

# 1.1 General management

- 1.1.1 The operator shall manage and operate the activities:
  - (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, nonconformances, closure and those drawn to the attention of the operator as a result of complaints; and
  - (b) using sufficient competent persons and resources.
- 1.1.2 Records demonstrating compliance with rule 1.1.1 shall be maintained.
- 1.1.3 Any person having duties that are or may be affected by the matters set out in these standard rules shall have convenient access to a copy of them kept at or near the place where those duties are carried out.
- 1.1.4 The operator shall comply with the requirements of an approved competence scheme.

# 1.2 Avoidance, recovery and disposal of wastes produced by the activities

- 1.2.1 The operator shall take appropriate measures to ensure that:
- (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and
- (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
- (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.

The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

- (a) following any fire or if required by the Environment Agency, submit to the Environment Agency for approval within the period specified a fire prevention plan;
- (b) implement the approved fire prevention plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

The fire prevention plan shall as a minimum specify:

- the total amount of waste that will be stored on site at any one time and if more than one type
  of waste is to be stored at the site the total amount of each type of waste;
- (ii) the maximum time each type of waste will be stored on site;
- (iii) the method of storage of each type of waste;
- (iv) the maximum volume of each waste pile in m3;
- (v) the location within the site where each type of waste will be stored;
- (vi) the maximum size of any waste pile stack stipulating the maximum height, width and depth;
- (vii) the minimum separation (fire break) distance between waste piles or storage areas;
- (viii) if fire walls are used in place of fire breaks, full details of the design and construction of such walls;
- (ix) the steps put in place to prevent and minimise the risk of a fire or of it spreading within the site or from the site;
- (x) the steps put in place to extinguish a fire if a fire starts;
- (xi) the steps and procedures to be followed if a fire occurs on site, including how the impact or emissions from a fire that may affect people or the environment will be minimised and mitigated; and
- (xii) the provisions made to enable safe access to the site for fire and rescue services, including how the impact on people or the environment of water used in fighting the fire will be managed and minimised.
  - Specified waste<sup>2</sup> shall be stored and treated on hard standing or on an impermeable surface
    with sealed drainage system. All other waste shall be stored and treated on an impermeable
    surface with sealed drainage system.

### 2.4 The site

# 3 - Emissions and monitoring

# 3.1 Emissions of substances not controlled by emission limits

3.1.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this rule if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.

# 3.2 Odour

3.2.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable, to minimise, the odour.

### 3.2.2 The operator shall:

- (a) if notified by the Environment Agency that the activities are giving rise to pollution outside the site due to odour, submit to the Environment Agency for approval within the period specified, an odour management plan;
- (b) implement the approved odour management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

# 3.3 Noise and vibration

3.3.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but limited to, those specified in any approved noise and vibration management plan, to prevent or where that is not practicable, to minimise, the noise and vibration.

# 3.3.2 The operator shall:

- (a) if notified by the Environment Agency that the activities are giving rise to pollution outside the site due to noise and vibration, submit to the Environment Agency for approval within the period specified, a noise and vibration management plan;
