

Monthly publication of Official Statistics on the incidence and prevalence of tuberculosis (TB) in Cattle in Great Britain – to end November 2018

These statistics and accompanying datasets were released on Wednesday 13 February 2019 at 9:30. The next monthly notice will be published on Wednesday 17 April 2019.

The next quarterly statistical notice which includes headline measures and charts will be published on Wednesday 13 March 2019.

Short term changes in TB statistics should be considered in the context of long term trends in incidence and prevalence, [presented in the September 2018 quarterly statistical notice published in December 2018](#).

Key tables summarising data to November 2018

Table 1: New herd incidents¹ and incidents where OTF status has been withdrawn²

	New herd incidents			New herd incidents where OTF status is withdrawn (OTFW)		
	12 months to end Nov 17	12 months to end Nov 18	Year-on-year change	12 months to end Nov 17	12 months to end Nov 18	Year-on-year change
England	3,887	3,646	-6%	2,650	2,339	-12%
High risk area	3,101	2,806	-10%	2,189	1,900	-13%
Edge area	654	714	9%	406	405	0%
Low risk area	132	126	-5%	55	34	-38%
Scotland	37	39	5%	12	12	0%
Wales	798	753	-6%	439	419	-5%
High West	346	330	-5%	180	182	1%
High East	298	258	-13%	192	165	-14%
Intermediate North	59	65	10%	31	27	-13%
Intermediate Mid	70	63	-10%	27	31	15%
Low	25	37	48%	9	14	56%

1. Herds which were previously Officially TB free (OTF) but either had cattle that reacted to a tuberculin test or had a tuberculous animal disclosed by routine meat inspection at slaughter, during the period shown. This is the preferred figure to measure the number of new breakdowns. Figures for Wales include incidents where OTF status has been withdrawn for epidemiological reasons only.
2. New herd incidents where OTF status was withdrawn from the herd due to the detection of typical lesions of TB during post-mortem examination of one or more test reactors or inconclusive reactors, or where samples from one or more reactor, inconclusive reactor or a slaughterhouse case produce positive culture results for *Mycobacterium bovis* (the causative bacterium of bovine TB). Figures for Wales do not include incidents where OTF status has been withdrawn for epidemiological reasons only, in the absence of post-mortem confirmation.

Table 2: Herds not officially TB free at the end of the period due to a bovine TB incident (non-OTF herds)³

	end Nov 17	end Nov 18	Year-on-year change
England	3,086	2,975	-4%
High risk area	2,567	2,355	-8%
Edge area	460	557	21%
Low risk area	59	63	7%
Scotland	22	19	-14%
Wales	657	673	2%
High West	336	356	6%
High East	229	206	-10%
Intermediate North	41	48	17%
Intermediate Mid	37	43	16%
Low	14	20	43%

3. Herds which were not officially TB-free (i.e. herds with an open breakdown with OTF status suspended or withdrawn) due to a TB incident, at the end of the period shown.

Table 3: Total animals slaughtered⁴

	12 months to end Nov 17	12 months to end Nov 18	Year-on-year change
England	33,005	32,935	0%
High risk area	26,156	24,764	-5%
Edge area	5,933	7,512	27%
Low risk area	916	659	-28%
Scotland	246	535	117%
Wales	10,326	10,840	5%
High West	6,727	7,271	8%
High East	2,343	2,245	-4%
Intermediate North	689	685	-1%
Intermediate Mid	454	439	-3%
Low	113	200	77%

4. Reactors slaughtered + Inconclusive reactors slaughtered (Wales only since April 2017) + Direct contacts Slaughtered.

Further information

The publication 'Quarterly TB in cattle in Great Britain statistical notice' contains charts on trends in TB as well as data tables, detailed commentary and background information. This and the related datasets can be found at - <https://www.gov.uk/government/collections/bovine-tb>

A wide range of other statistics is available at:

<https://www.gov.uk/government/organisations/department-for-environment-food-rural-affairs/about/statistics>

Data

These statistics are obtained from the Animal and Plant Health Agency (APHA) work management IT support system (Sam), used for the administration of TB testing in GB. They are a snapshot of the position on the date on which the data were extracted. These statistics may be subject to regular revision until all test results are available. In particular figures from 2016 onwards will be subject to further revision as test and incident records are completed.

Methodology

For a description of the data sources and methodology used in the calculation of the TB statistics, together with notes on data revisions policy etc, please refer to the 'Background and Methodology' annex document at - <https://www.gov.uk/government/statistics/data-and-methodology>

Additional information on bovine TB
