Schedule Reasons for Refusal

We are not satisfied that Midwest Solutions Limited (“the Proposed Transferee”) is competent to operate a regulated facility and comply with the conditions of any permit. As such we are therefore required to refuse the application for transfer of a permit in accordance with paragraph 13 of part 1 of schedule 5 to the Environmental Permitting (England & Wales) Regulations 2016 (“EPR”) as the regulated facility would not be operated in accordance with any permit.

The previous compliance history of the nominated TCM gives us doubts that the Proposed Transferee would operate in compliance with the permit creating an unacceptably high risk of pollution to the environment.

There are grounds to consider that the Proposed Transferee will not be financially able to comply with the permit conditions.

On the information currently supplied, we are not satisfied that the Proposed Transferee would be the operator for the purposes of regulation 7 EPR.

For the reasons stated above, the application is refused.
