BRITAIN

SPOTLIGHT ON THE UK EXPERTISE:  
SMART CITIES

Withdrawn 16 May 2019

# Welcome to Connected Smart Cities!

---

## Wasim Mir

*Deputy Head of  
Mission - UK in Brazil*

The world is changing. More than half the world's population now lives in cities, and this is projected to increase still further. Cities are drivers of change. They are hubs for people to exchange ideas and to innovate. Recent estimates suggest over 80% of the world's GDP is now generated in cities.

The UK is at the forefront of thinking on smart cities. We are dedicated to making urbanisation manageable and, most importantly, sustainable for the future. Smart technologies will be essential to this - everything from managing how we consume our resources within a city, to how we facilitate the movement of people, to how we design and engineer the spaces in which we live. UK firms are creating innovative solutions in all these areas. In energy, in transport, in waste and water, in architecture and sustainable technologies, amongst others. Some of those firms are listed here. Please do get in touch with them.

As Brazil continues its rapid urbanisation, UK technology can help to create workable, sustainable cities. The Brazilian citizens in the country's over 5000 municipalities are demanding more and more from their governments. UK solutions will help Brazil to realise its vision for future cities.

**Elemental  
Digest  
Systems**

## **Elemental Digest Systems (EDS)**

*UK Registered Office, Southgate House,  
59 Magdalen Street Exeter, Devon, EX2 4HY  
UK*

JOE PRIDAY - Commercial Director

[joepriday@prydis.com](mailto:joepriday@prydis.com)

T: +44 1392 671679

EDS has invented a revolutionary new technology for processing organic waste (including blood / bone / animal faeces) into agronomically sound and safe fertiliser, which the end user can then sell on the open agricultural market, or use it for their own purposes.

The systems are produced and delivered in standard sized shipping containers and operate simple "plug and play" automation systems. The system gives the end user huge financial incentive as the costs of waste disposal is avoided, and a valuable fertiliser commodity is produced.

MARCELO BELLATINI - Business Development Manager

[marcelo.bellatini@sepura.com](mailto:marcelo.bellatini@sepura.com)

T: +44 (0) 1223 877215

The Sepura Group is a global leader in the design, manufacture and supply of digital radio products, systems and applications developed specifically for business and mission critical communications. Founded in the UK in 2002, Sepura expanded rapidly across the world with a network of regional partners selling and providing local support for its products, and quickly achieved the status of market leader in over 30 countries. These wide-ranging and complete solutions enable public safety organisations and users in commercial sectors - including transport, utilities, oil and gas, manufacturing, mining, hospitality and construction - to address the communications challenges they face on a daily basis.

RICARDO MOREIRA - Managing Director

[ricardom@xco2energy.com](mailto:ricardom@xco2energy.com)

T: +44 (0) 20 7700 1000

XCO2 Energy is a specialist low carbon consultancy providing innovative, quantifiable and implementable sustainability solutions to add value to and reduce the environmental impact of building and masterplan developments in the UK and internationally. We achieve this by working closely with architects and teams to integrate efficiency into the design, using technology to quantify and develop our solutions, and clearly communicating our proposals to allow the client to make informed decisions.
