

Current Baseline

Proposed Scheme

Technical Information

Description
View looking south east towards the site of the railhead at Ashby. The image shows the earthworks associated with the creation of the railhead

Key Plan

This visualisation is provided for illustration purposes only to help inform the DRC events. These are produced as a snapshot of the current work in progress as the Proposed Scheme may be subject to change through ongoing design development and in response to consultation.

For the Hybrid bill submission, the supporting Environmental Statement will include full details of the visual impact assessment at the select viewpoints in Volume 5 of the Environmental Statement. A number of verified photomontages will be produced to provide an illustration of how the Proposed Scheme may look in the opening years and/or 15 years after opening to help inform the visual impact assessment.

Where new planting is proposed, it has been shown as immature plants which would mature over time to further integrate the Proposed Scheme into the landscape. At this scale the images do not lend themselves to direct comparison out in the field.
