1. Introduction

The 2014 to 2020 European Structural and Investment Funds bring the European Regional Development Fund, European Social Fund and part of the European Agricultural Fund for Rural Development together into a single European Union Structural and Investment Funds Growth Programme for England supporting the key growth priorities of innovation, research and development, support for Small and Medium Sized Enterprises, low carbon, skills, employment, and social inclusion.

The Government has confirmed that it will guarantee funding for ERDF projects that are contracted by the end of 2020.

All contracted ERDF projects must be completed by the end of the programme period, 30 June 2023. Each application for ERDF will be required to demonstrate that it delivers good value for money and domestic strategic priorities.

The funds are managed by the Ministry of Housing, Communities and Local Government for the European Regional Development Fund, Department for Work and Pensions for the European Social Fund and the Department for Environment, Food and Rural Affairs for the European Agricultural Fund for Rural Development. These Departments are the managing authorities for each Fund. In London, the Greater London Authority acts as an intermediate body for the European Regional Development Fund and European Social Fund programmes. In some other areas, Intermediate Bodies are being designated by the Ministry of Housing, Communities and Local Government and the Department for Work and Pensions to perform the following tasks:

1. Input into project calls in respect of local development needs (with reference to ESI Funds Strategies); and
2. Assessment of applications against certain selection criteria in relation to fit with local priorities in respect of the European Regional Development Fund and European Social Fund.

The managing authorities and intermediate bodies work closely with local partners on ESI Funds sub-committees in each local enterprise partnership area. Partners on these sub-committees provide:

1. Practical advice and information to the managing authorities to assist in the preparation of local plans that contribute towards operational programme priorities and targets;
2. Local intelligence to the Managing authorities (or intermediate bodies where designated) in the development of project calls that reflect operational programme and local development needs as well as match funding opportunities; and

3. Advice on local economic growth conditions and opportunities within the context of the operational programme and the local European Structural and Investment Funds strategy to aid the Managing authorities' (or intermediate bodies where designated) assessments at outline and full application stage.

This call is issued by the Ministry of Housing, Communities and Local Government and invites outline applications in respect of the European Regional Development Fund for England 2014 to 2020.

2. Call Context

On behalf of the national Growth Programme Board, the Ministry of Housing, Communities and Local Government (the managing authority) invites applications seeking European Regional Development Fund support under:

Priority Axis 2 Enhancing Access To, and Use and Quality of, Information and Communications Technology

Investment Priorities:

- 2b** Developing Information and Communications Technology products and services, e-commerce, and enhancing demand for Information and Communications Technology

The **European Regional Development Fund Operational Programme for England 2014 to 2020** sets out how the European Regional Development Fund will focus on investment to support economic growth and job creation. **Priority Axis 2** of the operational programme aims to enhance access to, and use and quality of, information and communications technology.

Harnessing the power of digital technologies such as Artificial Intelligence (AI) and the data revolution is one of the Grand Challenges transforming the global economy. We want to ensure that enterprises are supported to enhance digital capabilities and utilise data and digital technology to fulfil their growth potential.

Evidence suggests that SMEs with a strong online presence on average grow more than twice as quickly as those with minimal or no presence, export twice as much, and create twice as many jobs¹. However, British SMEs are falling behind their European competitors in using ICT². While UK companies have similar levels of internet access and web presence as those in other European countries, they are less likely to digitise their back-office functions than their peers in other countries. Fewer than 20% of UK enterprises use software to share information across the organisation, compared to

¹ Oxford Economics, 2015. *The UK's £92bn digital opportunity*. Available online at: <https://www.oxfordeconomics.com/recent-releases/the-UKs-digital-opportunity>

² DCMS, 2017. *UK Digital Strategy*. Available online at: <https://www.gov.uk/government/publications/uk-digital-strategy>

40% in France and more than 55% in Germany³, and only 22% of SMEs in the UK use any form of e-commerce⁴. Embracing digital has the potential to make every business in every sector more productive, wherever they are located. A recent survey of 1,000 UK-based businesses found digital capabilities helped boost revenues by 4.4% and reduce costs by 4.3%.

By May 2018, Ofcom reported 93% of UK premises had access to superfast broadband (SFB) (30Mbps), while 5% had access to full fibre broadband⁵. However, there still exists wide variation when comparing SFB coverage in urban areas with rural, and limited infrastructure support may still be required in some areas. We are currently unable to support ultrafast broadband infrastructure due to State Aid regulations.

Important guiding principles for the selection of ERDF operations within Priority Axis 2 therefore include:

1. Any application for funding will be required to clearly demonstrate that it provides good value for money and supports domestic strategic priorities, including the 2017 [UK Industrial Strategy](#), the [Business Productivity Review](#) and the [UK Digital Strategy](#).
2. Applications must meet the requirement of, and make a meaningful contribution to, the delivery of the relevant Priority Axis of the [European Regional Development Fund Operational Programme](#) and where appropriate should reflect how such support will aim to improve productivity levels within small and medium sized enterprises.

In addition, applications will be expected to meet identified local development needs, as expressed in the scope of this call and as set out in the [local enterprise partnership area European](#) Structural and Investment Funds strategy, as well as Local Industrial Strategy where available.

Applicants are advised to familiarise themselves with the detail of the operational programme, local European Structural and Investment Funds strategy and the relevant documentation listed in sections 5 through to 8 **prior to** submitting an outline application.

⁵ Ofcom 2018, Connected Nations Update (October 2018)

3. Scope of the Call

1. Scope

This call invites outline applications which support the delivery of Priority Axis 2 of the European Regional Development Fund operational programme and respond to the local development need set out in the [local enterprise partnership area](#) European Structural and Investment Funds strategy.

<p>Indicative fund allocation:</p>	<p>Indicatively, through this call the managing authority expects to allocate up to £890,100</p> <p>The managing authority reserves the right to invite to full application (and subsequently approve) projects that have a cumulative value that is higher or lower than this indicative allocation, subject to the volume and quality of proposals received.</p> <p>There is no indicative allocation of European Regional Development Fund funding between capital and revenue activity, both capital and revenue is eligible dependent on the nature of activities/Investment Priorities set out in the call.</p>
<p>Minimum application level</p>	<p>European Regional Development Fund investment is intended to make a significant impact on local growth. Applications are expected to demonstrate appropriate scale and impact.</p> <p>The managing authority does not intend to allocate less than £500,000 European Regional Development Fund to any single project. Consequently, new projects with a total value of less than £1,000,000 will not normally be supported under this call. Applications for less than £500,000 ERDF for extensions to existing projects will be considered.</p>
<p>Duration of project activity</p>	<p>Projects should plan to complete delivery of project activity by the end of June 2023; however, the managing authority reserves the right to vary this date.</p>
<p>Geographical scope</p>	<p>The England European Regional Development Fund operational programme operates on a national basis. All eligible European Regional Development Fund expenditure must benefit organisations located in England.</p>

	Revenue projects should predominantly support businesses based within the local enterprise partnership area of this call.
Specific call requirements	<p>The aim of this call is to allocate the remaining £890,100 under Priority Axis 2 in our allocation. All activities supported going forward will need to enhance and not duplicate any existing activity currently being provided under this Priority Axis.</p> <p>Please note: Value for Money and alignment with Strategic Domestic Priorities , including the 2017 Industrial Strategy, (or any later publication that amends or supersedes that). will form a key part of the assessment and appraisal of all applications. Therefore proposals should clearly articulate and demonstrate how activities align with domestic strategic priorities and offer good value for money.</p>
Call deadlines	<p>For this specific call, applications will be assessed after the close of the single deadline.</p> <p>Applications received after the published call close date will not be considered. All applications will be assessed following closure of the call.</p>

2. Local development need

Projects must deliver activity which directly contributes to the objectives of Priority Axis 2 of the operational programme, one or more of the relevant Investment Priorities and meet the local development need expressed in the table below.

Local Development Need
<p>Local growth priorities:</p> <p>Access to the internet for work purposes is now universal. However, the Leicester and Leicestershire Business Survey 2017 highlighted that, whilst many local businesses had an online presence to showcase their goods and services and provide their business contact details to customers (94%), only half of them were able to take bookings and orders through their websites. In around half of these cases, payments also had to be made off-site. The survey also highlighted that two fifths of establishments (40%) had plans to introduce or extend their use of any digital technologies in the next two years, with nearly 50% of all businesses recognising that they would need to develop the skills required in their existing workforce. A total of 21% of those surveyed also stated that they would need to</p>

recruit new skills into their business. As a result of these findings, the Leicester and Leicestershire Enterprise Partnership (LLEP) would welcome applications which seek to support our local businesses to improve their business models in order to make better use of online trading. There are also particular emerging opportunities from developments in technology and global demand, particularly linked to advanced manufacturing, life sciences, logistics, and digital content. As a result we will be looking to support applications that help businesses address these issues going forward.

For the LLEP, enhancing productivity will be an important focus of our new [Local Industrial Strategy](#), which is currently in development. Population projections indicate that the dependant population (under-16s and over-65s) within the LLEP area is expected to increase by 38% between 2011 and 2036, while the working age population is only expected to increase by 11% over the same period. Higher productivity will therefore be needed to address this lower dependency ratio. Recent [skills research](#) undertaken within the LLEP area has also forecast that around 19,500 new jobs will be created across Leicester and Leicestershire in the period up to 2023, while a further 146,000 job vacancies will need to be filled due to replacement demand. As a result we need to support businesses to invest in new digital technologies and processes to make them become more efficient in order to counteract the effects of the declining working age population and relatively high employment levels within the LLEP area.

The LLEP has also identified several transformational priorities where it is establishing a number of innovation-led sector opportunities through its [Enterprise Zones](#) together with major development opportunities across Leicester and Leicestershire. These areas could be enhanced by activating and utilising Information Communication Technology opportunities for businesses.

There appears to be a small but significant wave of new businesses which are offering online products and services to both business and the public sector through the creation of new software tools and online business processes ("Information Services" can be defined as a sub-sector and includes four components: software consultancy and supply; data processing; other computer related services; and data base activities). These form part of a diverse Professional and Business Services sector across the county, with a strong focus on the city, but with some potential to agglomerate out into the county area. There is a strong expertise in all three of our local universities, where big data, high speed computing and digital and creative industries are significant areas of focus.

Activities must be complementary to the existing ERDF-funded projects. These could as a result present opportunities for innovation and experimentation with technologies and models of co-operation between businesses as well as between businesses and other organisations where eligible under the UK's ERDF Operational Programme.

Whilst this call of £890,100 is a relatively small investment, it is very much a cross-cutting theme that will be supported by activities across our entire ERDF which has seen a total investment of over £50m.

For further information contact our European Structural and Investment Funds Programmes Manager Mary-Louise.Harrison@llep.org.uk.

Local priorities:

Proposals should demonstrate alignment with local development need and priorities including:

- **Support for small and medium-sized enterprises to update or introduce new Information Communication Technology business models which will drive business performance.** Here the LLEP is looking for projects to support businesses in introducing, or updating, new Information Communication Technology models which have a discernible impact within the business and support sustainable growth. We envisage a programme consisting of the latest systems and communication technologies
- **Provision of coaching, advice, consultancy, mentoring and support for small and medium sized enterprises to access new markets through improved Information Communication Technology connections / Provision of coaching, advice, consultancy, mentoring and support for small and medium sized enterprises to develop Information Communication Technology skills strategies and particularly productivity improvements from use of Information Communication Technology.** Here the LLEP is looking for activities to support one to many provision supported by one-to-one advisor support services, also signposted on through to the LLEP Business Gateway, to help with the design, procurement, implementation and monitoring of the impacts of the Information Communication Technology project.
- **Demand-side voucher schemes.** Here the LLEP is keen for programmes to take advantage of outcomes delivered via Superfast Leicestershire, Broadband connection as well as the Transformational Information Communication Technology programme of the previous ERDF programme and be complementary to the recently launched ERDF backed “Digital Growth Programme in Leicester and Leicestershire”. Projects may wish to consider activity that allows firms or clusters to pool resources to take advantage of advancing communication opportunities, including measures to reduce financial burdens on businesses that need faster synchronous speeds.
- In addition to the Voucher Scheme, **a small scale Information Communication Technology development grant scheme** would be welcome (capital/revenue up to £10,000 match funded or £20,000 total project) to help encourage additional businesses to take up broadband with speeds of at least 30Mbps and develop new information communication

Technology systems to improve business performance in collaboration with others. Grants to include purchase of equipment (software / hardware/ related technology) and associated consultancy when required, ensuring effective use of Information Communication Technology. Specific new business start-ups or one or more area-based business communities may be a real opportunity moving forwards. Activities above must not duplicate current business support activities under our Priority Axis 3 small scale grant schemes to help small and medium-sized enterprises innovate and take up innovation expertise from specialist providers which could be from any specialist institution (international, national or local, public and private). For further information go to [How to Access Finance](#)

- **Demonstration and pilot projects, showcasing how small and medium sized enterprises can stimulate innovation through smart use of Information Communication Technology / Support for diffusion of results from demonstration and pilot projects.** A project could be developed with regulators, or arts creative, cultural communities, or potentially with a university or research organisation, to create a business support or business productivity collaboration pilot to demonstrate innovative business practices and strengthen competitive opportunities for small and medium-sized enterprises.
- **Support for the integration of small and medium sized enterprises in digital supply chains through the smart use of Information Communication Technology.** Here the LLEP would welcome the delivery of a Business: Information Communication Technology Analysis. This should include an assessment of the business's ICT usage and potential for growth with an emphasis on communications to inform and develop local shared solutions and business opportunities.
- The LLEP Business Gateway is the Growth Hub for Leicester and Leicestershire. The Gateway brings together all Business Support provision available within the LLEP area into one place, supporting business to know what support is available and connecting them to service providers who can meet their growth needs. Each service provider will be required to demonstrate their commitment to working within the scope of the [LLEP Business Gateway](#) Partnership Protocols. Activities are to target small and medium-sized enterprises, including social enterprises.
- Projects should predominantly support businesses based within Leicester and Leicestershire Enterprise Partnership area. However, applicants are encouraged to consider corresponding bids under the neighbouring South East Midlands Local Enterprise Partnership priority axis call where proposed activities also address the priorities of that local enterprise partnership as expressed in the call and support could be provided to businesses in that local enterprise partnership area.

3. Operational programme investment priorities

Applications must specify the activities to be delivered and must directly contribute to one or more of the following investment priorities:

Investment priority	2b – Developing Information and Communications Technology products and services, e-commerce, and enhancing demand for Information and Communications Technology.
Specific objectives	<p>Increase the number of small and medium sized enterprises making productive use of digital technologies.</p>
Indicative actions	<p>The support provided through this specific objective will help small and medium sized enterprises to be able to understand and use information and communication technology products and services appropriate for their business. It will complement action under the other investment priority in this axis as well as action under priority axes 1 and 3:</p> <p>Under this investment priority, actions that the European Regional Development Fund may support include:</p> <ul style="list-style-type: none"> • Support for small and medium sized enterprises to update or introduce new information and communication technology business models which will drive business performance; • Provision of coaching, advice, consultancy, mentoring and support for small and medium sized enterprises to access new markets through improved information and communication technology connections; • Provision of coaching, advice, consultancy, mentoring and support for to develop information and communication technology skills strategies; • Provision of coaching, advice, consultancy, mentoring and support to implement productivity improvements from use of information and communication technology; • Demand-side voucher schemes; • Demonstration and pilot projects, showcasing how small and medium sized enterprises can stimulate

	<p>innovation through the smart use of information and communication technology;</p> <ul style="list-style-type: none"> • Support for diffusion of results from demonstration and pilot projects; and • Support for the integration of small and medium sized enterprises in digital supply chains through the smart use of information and communication technology. <p>Activities will target small and medium sized enterprises, including social enterprises.</p>
--	---

4. Required Outputs under this Call

Applicants will need to demonstrate how the eligible activity, funded by the European Regional Development Fund will achieve the programme-level outputs for Priority Axis 2.

For projects proposing to deliver activity against more than one investment priority, the appropriate outputs should be selected. Project will be required to report on, and evidence, the achievement of the outputs separately under each investment priority.

For projects coming forward under this call the expected outputs and results are:

Investment Priority 2b	
Output reference	Name
C1	Number of enterprises receiving support
C5	Number of new enterprises supported
C29	Number of enterprises supported to introduce new to the firm products
P4	Additional businesses taking up broadband with speeds of at least 30Mbps

The managing authority expects the level of outputs proposed within outline applications to be realistic and achievable and to deliver good value for money. The application should clearly state the methodology used to determine the levels of outputs proposed.

Projects will only be supported if they demonstrate good value for money. An important consideration when assessing value for money is the level of European Regional Development Fund outputs that the project would deliver.

The managing authority has not set specific output targets for this Call and does not publish average or expected unit costs.

The local European Structural and Investment Fund strategy for each local enterprise partnership area includes details of the local, notional European Regional Development Fund allocation to each priority axis and the type and number of European Regional Development Fund outputs that are expected in return for this investment.

All operations will be required to report regularly on progress toward achievement of targets. This will need to include both quantitative and qualitative data relevant to the appropriate geographical areas. Applicants will need to explain how they will collect and record this information to maintain a fully evidenced audit trail. It should be noted that if an operation fails to deliver contracted outputs, a performance penalty may apply.

5. Application Process and Prioritisation Methodology

There are two stages to the European Regional Development Fund application process:

1. Outline application and, if successful
2. Full application.

Acceptance of an outline application to progress to full application stage does not in any way indicate or constitute an offer of European Regional Development Fund grant.

Applicants must fully complete the [outline application](#) which will be assessed by the managing authority against all of the national [selection criteria](#) except where an intermediate body has been designated to assess against some of the selection criteria. Where an intermediate body has been designated to undertake delegated tasks, the intermediate body will undertake the assessment against the selection criteria in relation to fit with local priorities.

Outline applications will be assessed in two stages, Gateway assessment and Core assessment.

The Gateway assessment is undertaken by the managing authorities and considers:

- Applicant eligibility;
- Activity and expenditure eligibility; and

- Fit with the National operational programme and the local development need set out in section 2.

Applications that fail the Gateway assessment undertaken by the managing authority will be rejected. Applications which pass the Gateway assessment will then be assessed by the managing authority in relation to all Core assessment criteria.

In areas where an intermediate body has been designated, the intermediate body will assess the application against the Local strategic fit assessment criteria.

The intermediate body will also provide advice to the managing authority to assist the managing authority to make its assessment against the following Core selection criteria:

1. Value for money; and
2. Deliverability

Having assessed projects against these criteria the relevant local enterprise partnership area European Structural and Investment Funds sub-committee will advise the managing authority or intermediate body as relevant on the contribution to local economic growth conditions and opportunities within the context of the operational programme and local European Structural and Investment Funds strategy to aid the managing authority's assessments (at outline and full application stage).

Having concluded their assessments the managing authority and the intermediate body will prioritise the applications they wish to proceed based on their assessment against their respective selection criteria. Only projects that the managing authority and the intermediate body each agree should proceed, based on their respective core selection criteria, will be invited to submit a full application. Subsequently only those full applications that the managing authority and the intermediate body each agree should proceed, based on their respective selection criteria, will be approved.

Please note that the managing authority's decision is final and there are no appeals. If you wish to complain about the calls and application process, please follow the procedure set out at <https://www.gov.uk/government/organisations/department-for-communities-and-local-government/about/complaints-procedure>

Potential applicants / applicants may wish to take advantage of information and support services funded through European Regional Development Fund Technical Assistance and available to assist the design and development of compliant projects / applications for the European Regional Development Fund. Details of your local Technical Assistance funded project can be found on the [Technical Assistance website page](#).

6. General Information

1. National Eligibility Rules

When developing an application, Applicants must refer to the [National Eligibility Rules](#) setting out the requirements of the 2014 to 2020 European Regional Development Fund Programme. It is the responsibility of the applicant to ensure that the National Eligibility Rules are adhered to both at application stage and following approval. Failure to do so can lead to financial penalties leading to recovery of up to 100% of the grant value. If in doubt on any of the requirements, applicants are strongly advised to seek specialist advice.

European Regional Development Fund eligibility rules apply to **all** project spend within the eligible costs, including match funding.

The European Regional Development Fund is governed by European regulations and national rules. Applicants are advised to familiarise themselves with the relevant documentation, (Section 8 Key Document refers) prior to submitting an outline application. If successful at the full application stage, Applicants will enter into [a Funding agreement](#) and must abide by the standard terms and conditions contained therein. Once a Funding agreement has been issued it should be signed and returned within 30 days, unless otherwise agreed with the managing authority. Applicants are therefore strongly advised to read these terms and conditions to ensure that they are able to enter into such an agreement prior to responding to the call.

2. Eligible Applicants

Section 4 of the [National Eligibility Rules](#) sets out who is eligible to apply. Financial Due Diligence checks will be undertaken on non-public sector applicants that are successful at the outline application stage. Checks will be carried out following notification of a successful outline application and may exclude applicants from further consideration. These checks will include assessment of the applicant's financial standing including ability to deal with cost overruns, the ability to cash flow a project in arrears and absorb a financial irregularity.

Applicants must be legally constituted at the point of signing a funding agreement. If the application is approved the applicant organisation will enter into a legally binding funding agreement and therefore will carry the liability for ensuring that the terms and conditions of the funding agreement are met.

If there is more than one organisation applying for the funds, a lead organisation must be selected to become the applicant (and grant recipient) with the remaining organisation(s) acting as delivery partner(s). In this situation the applicant would be

responsible and liable for the delivery partner(s) and ensuring the project is operating compliantly.

During the application process the managing authority will consider the applicant's track record, both positive and negative. If the applicant has been involved in the delivery of previous European grants and any irregularities have been identified, the managing authority will expect to see what steps have been taken to ensure that the risk of further irregularities in the future is mitigated. It is acknowledged that some organisations will be new to European Structural and Investment Funds funding and will not have a track record.

3. Contribution rate and match funding

European Regional Development Fund investment must not be used to replace existing funding sources. European Regional Development Fund investment must enable activity to take place that would not otherwise happen or to increase the scope, scale or intensity of activity. The level of European Regional Development Fund awarded will be the minimum in order for the project to proceed

The maximum contribution rate is 50% of the total eligible project costs subject to State Aid regulations.

The remaining 50% or more must come from other eligible sources as specified under section 6 of the National Eligibility Rules. During the application process applicants will need to satisfy the managing authority that they have, or are able to put in place eligible match funding for the balance of costs. Other EU funds cannot be used as a source of match funding.

European Regional Development Fund investment is limited by State Aid regulations and where the award of European Regional Development Fund would constitute State Aid the European Regional Development Fund grant rate may fall below the 50% maximum.

European Regional Development Fund is paid quarterly in arrears and expenditure must be defrayed prior to the submission of any grant claims. Applicants may be asked to demonstrate how they are able to cash flow the operation.

4. Project timescales

Projects approved through this call will normally be expected to:

- Submit a detailed and complete full application within three months of formal selection at outline stage. Projects which fail to meet this deadline may be deselected;
- Commence delivery within the agreed timescale as stated in the Grant Funding Agreement; and
- Have completed the delivery of project activity by the end of June 2023.

5. Project extensions

Existing grant recipients whose projects:

1. Do not involve the direct development of premises or infrastructure under Investment Priority 2a;
2. Address the priorities set out in section 2.

May apply for a second phase of delivery – this will be expected to be in the same form as the current project (i.e. a genuine continuation of activity) but may reflect improvement/some change to reflect experience of the first phase of the project. The application must be made using the standard outline application form. Where changes to the first phase of the project are significant, these should be presented as a new application. The relevant Growth Delivery Team will apply judgment in considering the significance of any change.

Applications in respect of the development of premises or other infrastructure should be presented as new projects, this includes applications that have a link to an existing European Regional Development Fund project e.g. further phases of the development of sites or premises.

Please note - extensions to existing projects will be assessed against the criteria set out in this call in the same way as ‘new’ projects. There is no guarantee that extensions will be selected. Extension requests that do not meet the requirements set out in this call will be rejected. The applicant’s track record and the performance of existing contracts will be taken into account during the assessment process.

6. Capital projects

In developing the budget for the outline application, applicants seeking European Regional Development Fund to support a capital project should note that:

1. New build projects will normally be expected to achieve the Building Research Establishment Environmental Assessment Method (BREEAM) rating of ‘excellent’; however BREEAM ‘very good’ will be accepted where this is the maximum feasible standard;
2. Refurbishment projects will normally be expected to achieve the BREEAM rating of ‘Very Good’; and
3. Infrastructure projects will normally be expected to achieve the Civil Engineering Environmental Quality Assessment rating of ‘Very Good’.

7. Cross Cutting Themes / Horizontal Principles

All applications selected as a result of this call will be required to demonstrate how the Cross Cutting Themes have been addressed in the project design and development. Cross Cutting Themes for European Regional Development Fund are

'equality and anti-discrimination' and 'sustainable development'. Further information is available in Section 11 of the [European Regional Development Fund Operational Programme](#).

Information and communications technology issues are likely to impact more on older people and disabled people, so digital infrastructure investments under priority axis 2 should be accompanied by relevant skills support.

8. Additionality, duplication and displacement

Additionality is a core principle of European Regional Development Funding. Applicants must be able to demonstrate that the activity paid for out of European Regional Development Funding adds value to new or existing activity.

European Regional Development Funding cannot support activities that duplicate existing provision / services within the region.

Applications need to identify and evidence how the beneficiaries will use the service and demonstrate that the project does not displace other activity available in the market place.

9. State Aid and revenue generation

Applicants are required, in the outline application, to provide a view on how their proposal complies with State Aid law. Applicants must ensure that projects comply with the law on State Aid. Grant funding to any economic undertaking which is State Aid can only be awarded if it is compatible aid, in that it complies with the terms of a notified scheme under the General Block Exemption Regulation (EU) 651/2014.

Only if this is not possible should applicants use the De minimis regulation or 'no aid'. [Guidance for grant recipients](#), explaining more about State Aid, is available; it is important that Applicants take responsibility for understanding the importance of the State Aid rules and securing their full compliance with them throughout the project, if it is selected into the Programme.

The managing authority is not able to give legal advice on State Aid. It is the responsibility of the applicant to ensure that the operation is State Aid compliant.

10. Procurement

All costs claimed by the applicant (grant recipient and / or delivery partner(s)) must be recovered on an actual cost basis. Other costs must be procured in line with National (including [Public Procurement Regulation 2015](#)) and EU regulations. Procurement will be subject to audit and verification and any irregularity will result in a financial penalty of up to 100% of the grant paid. Robust and transparent procurement is required to ensure that grant recipients:

- Consider value for money;
- Maximise efficient use of public money; and
- Maintain competitiveness and fairness across the EU.

It is **strongly recommended** that applicants seek and follow legal advice in respect of procurement requirements. Procurement irregularities remain the most substantive cause of error and clawback of grants.

7. Support

Please note that this is a competitive call and to preserve impartiality the managing authority and, where appropriate, the intermediate body are unable to enter into correspondence with applicants over their outline application. Details of where guidance can be found are contained throughout this call document. In exceptional circumstances, if there are issues with accessing this guidance, please contact: EM.ERDFENQUIRIES@communities.gov.uk

Whilst the decision of the managing authority is final, if you think consideration of your application has not followed the published ERDF process, please refer to the MHCLG complaints procedure available on GOV.UK.

8. Key Documents

- European Regional Development Fund Operational Programme;
- Outline application form;
- Outline application form guidance;
- Local enterprise partnership area's European Structural and Investment Funds strategy;
- Eligibility guidance;
- Target definitions;
- Funding agreement (revenue and / or capital);
- Summative assessments guidance; and
- 2017 [Industrial Strategy](#) (or any later publication that amends or supersedes that).

9. Document Checklist

Incomplete applications will be rejected. Please ensure the following information (documents) are submitted.

Outline stage:

- Fully completed outline application;
- Financial tables; and
- Outputs, results and indicators tables.

10. Document Submission

Completed outline applications must be submitted via email to the address in Section 7. Applicants are asked to quote the call reference and project name in the subject line of your email as this will greatly assist the managing authority.

Outline application forms not received by the deadline will not be assessed. Outline applications which are not fully completed will be excluded.

The managing authority will normally acknowledge receipt of your application by email. For this call applications will normally be required to **commence delivery/activity within three months** of the award of a Funding Agreement.

Any changes related to the deadline for the submission of the outline application form will be notified on the [European Growth Funding](#) website pages.
