

To whom it may concern

We would like to express our complete agreement in all points highlighted by the CMA in this process. We admire the thoroughness that has been displayed and the deep understanding of this unique market.

We believe a merge between Tobii Dynavox and Smartbox would be very destructive both for the users of AAC and for the market internationally.

In terms of an alternative owner of Smartbox, we would like to mention the need for a long term partner with intentions beyond turnover. That is difficult find. However, a foundation of a certain size would be a good match. They have the funds to acquire the company and the long term goal of making this investment worthy of both the end user and the profit margin.

Best regards
