

Technical Annex DIT public consultation on trade negotiations with New Zealand

(20 July 2018 - 26 October 2018)

Topline results and codeframe for non-campaign responses

This document shows topline results and codeframe for all responses from members of the public and organisations who responded to the 2018 DIT public consultation on trade negotiations with New Zealand.

Analysis of the consultation responses required coding of the data. Coding is the process by which each individual response is matched against a series of themes that DIT and Ipsos MORI compiled, so that the content can be summarised, classified and tabulated. Each of the codes represents a discrete issue or viewpoint raised by a participant or number of participants in their verbatim responses.

Responses in this topline are shown in the form of numbers of responses and not percentages. The topline shows all consultation responses, whether through the online consultation portal, email or by post. The consultation ran between 20 July 2018 and 26 October 2018.

This topline is based on 340 participants, including organisations and members of the public. It excludes campaign responses, which are reported on in a separate document. Base sizes may vary depending on the number of participants who answered each question. Please note that those who responded to the consultation by email or letter did not have closed or tick box questions to answer, and as such are not included in the base for such questions.
