

Department for
Business, Energy
& Industrial Strategy

The latest provisional monthly energy production, consumption and prices statistics produced by the Department for Business, Energy and Industrial Strategy were released on 26 September 2019.

Energy production and consumption statistics are provided in total and by fuel and provide an analysis of the latest 3 months data compared to the same period a year earlier. Energy price statistics cover domestic price indices, prices of road fuels and petroleum products and comparisons of international road fuel prices.

Energy production and consumption

Highlights for the 3-month period May 2019 to July 2019, compared to the same period a year earlier include:

- **Primary energy consumption in the UK on a fuel input basis rose by 0.4%, on a temperature adjusted basis consumption fell by 0.4%. ([table ET 1.2](#))**
- **Indigenous energy production fell by 1.5%, with rises in oil, bioenergy, wind and hydro output offset by falls in output from coal, gas, nuclear and solar. ([table ET 1.1](#))**
- **Electricity generation by Major Power Producers down 1.6%, with coal down 65% but gas up 1.5%. Renewables up 24%, boosted by strong growth from wind.* ([table ET 5.4](#))**
- **Gas provided 51.2% of electricity generation by Major Power Producers, with renewables at 28.2%, nuclear at 19.5%, and coal at a record low of 0.4%. * ([table ET 5.4](#))**
- **Low carbon share of electricity generation by Major Power Producers down 1.0 percentage points to 47.7%, whilst fossil fuel share of electricity generation stood at 51.8%.* ([table ET 5.4](#))**

*Major Power Producers (MPPs) data published monthly, all generating companies data published quarterly.
