

Table of stakeholder engagement

June 2018 to February 2019

The table below shows stakeholder engagement with the reduction and reformulation programmes covered by Public Health England (PHE) between June 2018 and February 2019. This engagement covers, for example, attendance at the calorie reduction stakeholder forums in October 2018 and subsequent business 1:1's, discussions on baby food reformulation, and meetings with the eating out of home sector that had not yet engaged with the reduction and reformulation programme.

It is our understanding that many stakeholders are working towards achieving the aims and ambitions of the programmes but would not have necessarily had direct engagement with PHE during this timeframe. The programmes are at different stages and this is reflected in the level and focus of engagement with businesses and wider stakeholders in the table below. For example, given the sugar reduction programme is established, work on sugar reduction did not form the focus of PHE's engagement during the time frame covered here and instead PHE concentrated on engaging stakeholders most relevant to programmes that are at an earlier stage of development (for example, calorie reduction, baby food reformulation) and/or with industry sectors where engagement is more mixed.

Although every effort has been taken for this table to be comprehensive there may be some instances where this has not been possible.

¹ 'Out of home' covers businesses such as quick service restaurants, casual dining restaurants, contract caterers (foodservice), cafés and coffee shops, sandwich and bakery led shops, pubs, vending, retail food on the go, takeaway and delivery services.

² Engagement includes but is not limited to: PHE led 1:1 meetings with quick service and casual dining restaurants not previously engaged with the reduction and reformulation programmes based on market share, and on-going engagement across the out of home sector. Generally, the content of these meetings includes the breadth of the reduction and reformulation programmes.

³ The Obesity Health Alliance is a coalition of over 40 organisations who have joined together to reduce obesity. It may be represented at meetings by its members.
