**Strategic Export Controls: Country  
Pivot Report**

**1st January 2008 - 31st December  
2008**

**OCTOBER 2019**

**Countries:** All countries

**Case Types:** All case types

**All Cases / Incorporation Cases Only:** All cases

**Ultimate Destinations:** All countries

**Licence Statuses:** All licence statuses

**Reasons for Refusal:** All reasons for refusal

**Case Summaries:** All case summaries

**Ratings:** All control entries

## Introduction

This report covers **export licensing decisions made by Her Majesty's Government (HMG)** between 1st January 2008 and 31st December 2008. Licence applications are submitted to and processed by the Export Control Organisation (ECO), part of the Department for International Trade, through a purpose-built online licensing system called Spire. The ECO issues licences for controlling the export of strategic goods.

Whether or not an export licence is required is determined by four factors, the:

- nature of the goods due to be exported
- destination concerned
- ultimate end use of the goods
- licensability of trade activities of the goods due to be exported

Broadly there are two types of licence, individual and general. Licences can be *standard* or *open*.

Each licence names the goods that can be exported and specifies the destinations to which they can be exported, along with other details and restrictions. *General* licences are pre-published and can be used by all eligible exporters whereas *individual* licences are issued following a successful application and allow only those named on the application to export certain goods. Those exporting under *general* licences must adhere to the terms and conditions of the licence under which they wish to export. Exporters must register with the ECO to use a *general* licence and are subject to regular audits to ensure the licence terms and conditions are being adhered to. Those requiring an *individual* licence must submit an application to the ECO where they wish to make exports not covered by the terms and conditions of a *general* licence.

Generally, *open* licences can be used with fewer restrictions than *standard* licences. *Standard* licences tend to name a specific quantity of specific goods that can be exported to a specific destination whereas *open* licences may include a wider range of goods or destinations and generally do not limit the quantity of goods that can be exported.

**A glossary of key terms follows this introduction** which explains the various licence types and subtypes that can be used or applied for and how information relating to each licence type and subtype is available within this report.

## This report and other sources of information

Each of these quarterly reports (from 2015Q1 published in July 2015) is supplemented by a set of *data tables* in spreadsheet format (plus CSV format) and a *statistical commentary* document in addition to this report. The *data tables* provide the same information as presented in this report but in a different format and for **periods back to 1 January 2008**. CSV spreadsheets use a non-proprietary format that facilitates the manipulation of the data by a variety of software (not just Microsoft Excel) and provide the same information as available from the *data tables*. These outputs can be found alongside this report under the 'Quarterly reports' heading here:

<https://www.gov.uk/government/collections/strategic-export-controls-licensing-data>

The 'New Report' tool on the "Strategic Export Controls: Reports and Statistics" web page can also be used to download data. The tool offers a variety of filters that can be applied to allow users to download data of specific interest, such as licences which name a certain destination or licences for the shipment of goods with a certain rating. The tool is available here (registration required):

<https://www.exportcontroldb.trade.gov.uk/sdb/fox/sdb/SDBHOME>

## Key terminology and data available in this report

Licences types exist for each combination of *open/standard* and *general/individual* , except for *standard general* . The following table summarises the licence types under each of these headings. Each of these licence type has subtypes (more information available under 'Licence types and subtypes').

	Open	Standard
General	OGELs	Not applicable
Individual	OIELs, OITCLs,	SIELs, SITCLs

## Key terms

**Strategic goods** include military goods and a wide range 'dual-use' goods; civilian goods with a military purpose. Goods are assessed against a **consolidated list of goods that require export authorisation**, available here:

<https://www.gov.uk/government/publications/uk-strategic-export-control-lists-the-consolidated-list-of-strategic-military-and-dual-use-items-that-require-export-authorisation>

It is possible for a licence to be for both military and dual-use goods.

**Control Entries** are the codes assigned to each good on the **consolidated list of goods that require export authorisation (herein 'consolidated list')**. For example, all control entries beginning 'ML' (such as ML1, ML8 etc) are control entries for military goods. The process of assigning control entries to goods is called **Rating**.

In some cases goods can be made subject to control if they do not appear on the **consolidated list**. Goods that the exporter has been told, knows or suspects are, or may be, intended for "WMD Purposes" are given the rating "End-Use". Goods that the exporter has been told, knows or suspects are, or may be, intended for use as components in, or production or test equipment for, military equipment in an embargoed destination; or may be intended for use as parts of military goods illegally obtained from the UK, irrespective of destination, are given the rating "MEND". Both of these "end-use" ratings are also sometimes referred to as "catch all" ratings.

**Case summaries** are text descriptions used to classify goods on licences. They are standardised descriptions to explain what the goods are without giving away commercially sensitive details about the goods (such as design or intellectual property). Using standardised descriptions also facilitates comparison and analysis. Often extra detail is communicated by using prefixes. For example, a replacement part for a sporting shotgun may be described as "components for sporting shotguns" rather than just "sporting shotgun".

One or more Control Entry can be used to rate more than one good on a licence. Also, one or more Case Summaries can be used to describe a single Control Entry.

Goods are rated as **Military** (ie, they are assigned a Control Entry from the **UK Military List** within the **consolidated list** ) or they are rated as being **Non-military**. Non-military goods:

- appear on other lists within the **consolidated list** , such as the **UK Dual-Use List** .
- also include goods refused to destinations that are placed under **sanctions**, such as trade sanctions or an arms embargo. Licences relating to the goods affected by the sanction do not get approved but also do not get rated against the **consolidated list**. They are instead rated with a **sanction code**, such as 'RUS' for Russia and 'IRN' for Iran.

**SIELs for Goods covered by Council Regulation 1236/2005** (see 'Licence types and subtypes') concern trade in certain equipment and products which could be used for capital punishment, torture or other cruel, inhuman or degrading treatment or punishment. These are classed as non-military goods but appear separately to the statistics on licences for non-military goods. SIELs for Goods covered by Council Regulation 1236/2005 are

therefore not included in the count of non-military goods for other SIEL subtypes. More information on the Regulation is available here: <https://www.gov.uk/controls-on-torture-goods>

As noted, goods can also be rated even if they don't appear on the **consolidated list**.

Licence applications can be **Refused** (for standard individual licences) or **Rejected** (for open individual licences). Licences are refused/rejected for one or more pre-specified reasons. All applications for licences are assessed on a case-by-case basis against the **Consolidated EU and National Arms Export Licensing Criteria** and a decision made on either approval or refusal. Depending on the nature of the goods, other policy aspects might also be considered. For example, if the exported goods are due to be incorporated into another system, equipment or plant, then the items are also assessed against the UK's incorporation factors policy.

Applications for licences can be refused if it is deemed to fail one or more of the Consolidated EU and National Arms Export Licensing Criteria. These 8 criteria include, for example, *Preservation of regional peace, security and stability (criterion 4)* or *Respect for the UK's international obligations and commitments, in particular sanctions adopted by the UN Security Council or the European Union, agreements on non-proliferation and other subjects, as well as other international obligation (criterion 1)*. More information about the criteria is available here:

<https://www.gov.uk/government/publications/consolidated-eu-and-national-arms-export-licensing-criteria>

Licences can also be **Revoked** at any time after being Issued.

**Case & goods footnotes** are added to certain cases to provide explanation on the end use and/or end user.

**Country footnotes** are added to destinations with the aim to help the user understand why certain goods may have been approved, refused/rejected or revoked in the period.

## Licence types and subtypes

### Export Licences

#### General Licences

Before data are presented per destination, a table summarises the use of **Open General Export Licences (OGELs)** on page 14. OGELs are pre-published licences allowing the export of certain goods to certain destinations. If exporters are eligible to trade under an OGEL then they should register to use that OGEL. Once registered, there is no need for an exporter to submit further applications to trade under the licence they have registered to use.

Some Open General Transshipment licences exist for the **transshipment** of certain goods through the UK en-route from one country to another, providing in all cases that the relevant conditions are met.

There are no Open General licences for the **incorporation** of goods into another product or higher level systems.

#### Individual Licences

The vast majority of this report presents information (where available) per destination relating to *standard individual* licences and open individual licences (SIELs, OIELs, SITLs, SITCLs and OITCLs). All destinations are presented in this report, and if information regarding certain licence types is not presented for a destination then this is because no decisions have been made on such licences in this period.

Exporters should check to see whether they are eligible to use an *open general* licence before applying for either a *standard individual* licence (eg SIEL, SITCL) or *open individual* licence (eg OIEL, OITCL), whichever is most appropriate.

#### Open Individual Licences

**Open Individual Export Licences (OIELs)** are *specific to an individual exporter and cover multiple shipments of specified items to specified destinations and/or, in some cases, specified consignees.* Licences permitting permanent export are generally valid for up to 5 years from the date of issue. However, OIELs covering the export to EU Member States of goods entered on the Military List and Dealer to Dealer OIELs (an OIEL subtype) are generally valid for 3 years.

##### Other OIELs:

There are several subtypes of OIELs including **Global Project Licences**, as well as **Dealer-to-dealer, Cryptographic, Media and Continental Shelf OIELs.**

**Dealer-to-dealer OIELs (or simply Dealer OIELs)** authorise UK registered firearms dealers to export certain categories of firearms and ammunition solely to other registered firearms dealers on the European Union only, provided that copies of valid documentation are forwarded to the Home Office at least 2 working days before each shipment.

**Cryptographic OIELs** authorise the export of specified cryptography hardware or software and the transfer of specified cryptography technology. These licences do not cover hardware, software or technology which includes certain types of cryptanalytic functions.

**Media OIELs** authorise the export of military helmets, body armour, non-military 4WD civilian vehicles with

ballistic protection and specially designed components for any of these items, mainly for the protection of aid agency workers and journalists in areas of conflict. The licence permits these goods to be exported to all destinations on a temporary basis only, i.e. the goods must be returned to the United Kingdom when no longer required.

**Continental Shelf OIELs** authorise the export of controlled goods to the UK sector of the Continental Shelf for the use only on, or in connection with, offshore installation and associated vessels.

**Global Project Licences (GPL)** are a form of export licence that were introduced by Framework Agreement partners (UK, France, Italy, Sweden, Spain and Germany) to streamline the arrangements for licensing military goods and technologies between them, where these transfers relate to their participation in specific collaborative defence projects. In relation to the collaborative project, each Partner state will, as appropriate, issue their own GPLs to permit transfers of specified goods and technology where these are required for that programme. The GPLs operate on a similar basis to UK Open Individual Export Licences. In the UK, applications for GPLs are assessed against the Consolidated Criteria.

## Standard Individual Licences

**Standard Individual Export Licences (SIELs)** are specific to an individual exporter and generally allow shipments of specified items to a specified consignee up to the quantity specified by the licence.

There are 5 main subtypes; permanent, temporary, incorporation, transshipment and SIELs for Goods covered by Council Regulation 1236/2005.

- **Permanent SIELs** are for items that are for permanent export to a destination. They are generally valid for 2 years from date of issue.
- **Temporary SIELs** are for where the export is temporary, for example for the purposes of demonstration, trial or evaluation, and the licence is generally valid for one year only. The goods must be returned before the licence expires. Temporary SIELs can cover more than one destination and in such cases the licence will be counted once per destination. Therefore users should express caution when summing licence details together across countries.
- **Incorporation SIELs** are for goods that are due to be incorporated ie, installing them into another product or higher level system. For incorporation cases there are two end user types. The 'end user' is the person/organisation incorporating the goods. The 'ultimate end user' is defined as the entity that uses the product or the higher level system into which the exported goods are installed or incorporated.
- **Transshipment SIELs** are needed for the transshipment of certain goods through the UK en-route from one country to another, providing certain conditions are met. This subtype of SIEL is also called a Standard Individual Transshipment Licence (SITL). Most other transshipments (of certain goods through the UK en-route from one country to another) can be made under one of the Open General Transshipment Licences, provided in all cases that the relevant conditions are met. There are no Open Individual licences for transshipments.
- **SIELs for Goods covered by Council Regulation 1236/2005** concern trade in certain equipment and products which could be used for capital punishment, torture or other cruel, inhuman or degrading treatment or punishment. These are classed as non-military goods but appear separately to the statistics on licences for non-military goods. SIELs for Goods covered by Council Regulation 1236/2005 are therefore not included in the count of non-military goods for other SIEL subtypes.

It should be noted that the refusal of an application for an OIEL, amendment to exclude a particular destination(s) and/or item(s), or the revocation of an OIEL, does not prevent a company from applying for a SIEL covering some or all of the items concerned to specified consignees in the relevant destinations. Clearly, however, the factors that led to the original decision would be taken into account in the decision on any such application.

## Other Individual Licences

Information on Other Individual licences is not included as part of this report, or as part of the Excel or CSV spread sheets released alongside this report. Please see separate documentation entitled 'Data for Other Licences' published alongside this, or previous, reports.

## Trade Control Licences

Trade Control licences are required for those brokering the export of strategic goods. Brokering means buying or selling, or arranging or negotiating transactions for the purchase, sale, or supply, of goods located in one third country for transfer to another. There are Open and Standard Trade Control licences

An **Open Individual Trade Control Licence (OITCL)** is *specific to a named trader and covers involvement in trading of a generally unlimited supply of specific goods between specific source and destination countries and/or specified consignors, consignees and end-users*. OITCLs are generally valid for 5 years.

A **Standard Individual Trade Control Licence (SITCL)** is specific to a named trader and covers involvement in trading of a set quantity of specific goods between a specific source and destination country with a specified consignor, consignee and end-user. SITCLs will normally be valid for 2 years. Upon expiry either by time or because the activity has taken place, the licence ceases to be valid and must be returned to the Export Control Organisation. Once the licence expires, a new application must be applied for if further trades are required. Like Individual Export licences, exporters should check to see whether they are eligible to use an OITCL before applying for a SITCL.

## Reporting

### Summary Tables

Before more detailed information is presented by destination on SIELs, OIELs, SITCLs and OITCLs, data summarising the number of licences Issued, Refused/Rejected and Revoked for each licence type within the period are presented.

Following this is some detailed information on Dealer OIELs, Cryptographic OIELs, Media OIELs, Continental Shelf OIELs and Global Project Licences - as generally there are not many of these per quarter so the information is best summarised for all destinations together in one table. Processing statistics are reported, similar to those presented per destination (see below). A table showing registrations, suspensions and de-registrations for the use of OGELs immediately precedes detailed information per destination.

### Information Per Destination

Information for each destination follows the same pattern. The minimum information provided for each destination is processing statistics. Where no such licences decisions were made in the period, there is simply no information presented for such cases.

#### Processing statistics

The time calculated is the initial processing time, ie, the time elapsed from when the application is first received to when it is closed. All closed cases are counted, including those where the licence is issued or refused/rejected, or where the application is stopped or withdrawn, or where there was No Licence Required (NLR) decision made on the licence. Revocations apply to existing licences only, so are not counted. Time spent by the ECO waiting for documents from applicants or any time where the ECO are waiting for the applicant to respond to a request for further information is excluded. Time taken to make any amendments post-decision is not counted. For more information on how processing time is calculated, please consult the Quality and Methodology Report on the Strategic Export Controls licensing statistics web page:

<https://www.gov.uk/government/collections/strategic-export-controls-licensing-data>.

Separately for SIELs, SITCLs, OIELs and OITCLs the following processing statistics are presented per destination:

- Median processing time
- % and number of licences completed in 20 and 60 working days. For SIELs there are government targets to process 70% of applications within 20 working days and 99% within 60 working days. For OIELs and OITCLs there are government targets to process 60% of applications within 60 working days.

#### Licensing statistics

The information within the report covers those licences Issued, Refused/Rejected or Revoked within the period. It does not include information where applications were not fully processed, eg stopped or withdrawn, information on goods where there was No Licence Required (NLR), or certain changes to an existing licence - such as re-opening an application to make changes such as extensions to licences, removing good/s (although this is not done for OIELs), removing country/countries, or amending applicant errors.

If goods / countries are added to an application and subsequently end up on a licence they will be reported as a new issue for that period. The existing items will not be re-reported. The same applies for items removed from an application on an amendment, except in this case it will be reported as revoked.

In a small number of cases there may be a subsequent change of status during the same period. There are two

main reasons for such changes: a licence issued during the period may have been issued then subsequently revoked in the same period, for example because of the imposition of trade sanctions or an arms embargo; or a decision during the period to refuse a licence might be overturned because the applicant later appealed successfully and the licence was issued in a later period. These cases are flagged in this report as Rv and A respectively.

For each destination and for each of Issued, Refused and Revoked the following is data is presented in this report, where available, for each **SIEL** subtype (note: information on SITLs can be found under the heading 'SIELs - Transshipment'):

- A count of the number of licences on which goods were Issued, Refused or Revoked categorised by the type of goods; Military, Non-military or Both Military and Non-military (see 'Key Terms'). Examples of when a licence may be for both military and non-military goods could be where the goods are military body armour and civilian body armour, or where bomb detection goods are being sold for use by the military and for civilian use such as at airports. However, the military and non-military goods will not necessarily be of the same type.
- A count of the number of licences on which goods were Issued, Refused or Revoked per Control Entry. Control Entries are presented per category (Military, Non-military or Both Military and Non-military) based on the licence they relate to. The number given is the number of licences on which a Control Entry was used. Please note that more than one Control Entry can apply to goods on an individual licence and each Control Entry is counted only once per individual licence (regardless of the number of goods that have been rated with that Control Entry).
- Data for Issued SIELs includes the value of the goods in each category. However, note that goods covered by issued SITLs merely pass through the UK and it would therefore be misleading to compare the 'value' for these licences in the report with the value of items originating in the UK.
- Case summaries for each of Issued, Refused and Revoked broken down by category (Mil/Non-mil/Both), listed below the appropriate Control Entry table in which they feature. Case summaries for small arms covered by SIELs issued in the period give the number of units in parentheses. If the number of licences using the case summary in the period is more than one then this is also detailed in parentheses (eg "2 licences"). Items that were allowed for Temporary export are indicated by a "T" preceding the description. Items that were originally allowed for Temporary export but then converted to allow Permanent export are indicated by a "T(P)". Note that more than one Case Summary can apply to a single Control Entry. Note that more than one Case Summary can apply to a single Control Entry.
- The ultimate destination/s for goods that are being incorporated.
- For refusals, the number of times each of the 8 Consolidated EU and National Arms Export Licensing Criteria are used to refuse licence applications for the destination is provided.

The Control Entries supplied are less detailed than those listed in the **consolidated list of goods that require export authorisation**. For example, we report ML1 but there are more specific codes such as ML1a, ML1b, ML1c and ML1d. Here is an example to explain how we would count the number of licences containing goods rated ML1:

<b>Issued licences for a given destination</b>	<b>Control Entries applied to goods on licence</b>
Licence 1	ML1a, ML1a, ML1b, ML1c
Licence 2	ML1a, ML2a
Licence 3	ML1a
Licence 4	ML1c
Licence 5	ML2a
<i>Total number of licences containing goods rated ML1</i>	<b>4</b>

In the example the number of licences containing goods rated ML1 is 4 because the more detailed codes (eg ML1a, ML1b etc) are treated as though they are the broader code ML1. Also, each Control Entry is counted a maximum of once per licence, so licence 1, 2, 3 and 4 each have a count of 1 for ML1.

The data on refused SIEL applications does not include those refused during this period following an appeal against an earlier refusal. The SIELs data also does not cover goods that were removed from an application before a licence was issued, applications that were withdrawn or stopped before a decision was reached, or applications where it was determined that no licence was required or that the goods could be exported to the

destination concerned under an Open General Export Licence (OGEL).

In the case of SIELs refused or revoked, only the rating of the goods is provided.

Values are shown to the nearest pound. It should be noted that the actual value of exports made under the licences is likely to be less than shown because some of these licences will not be used to make all of the exports authorised and others will not be used at all. In addition, some items are exported only temporarily and are later returned to the UK.

In some cases SIELs may be issued identifying more than one destination. This normally arises where a licence is issued for the temporary export of items for exhibition or demonstration in more than one destination. Details of these licences are included in the information for each relevant destination. This means that the total number of SIELs issued is lower than the sum of all SIELs issued shown across all the destination pages.

For each destination and for each of Issued, Refused and Revoked the following data is presented in this report, where available, for each OIEL subtype:

- A case summary description of the goods covered by each OIEL, with the items that were allowed for temporary export indicated by a "T" preceding the description, for Issued, Rejected and Revoked licences.

Case summaries are provided for all licences issued in the period or where the coverage of an existing licence was amended during the period by the inclusion or reinstatement of this destination or by the addition of goods. Case summaries are provided for licences fully revoked, refused in full or whose coverage was amended during the period by the removal of items and/or destinations. The destination coverage of an OIEL may be amended for a variety of reasons, but mainly in the light of recommendations received from advisory government departments. Sometimes amendments follow the imposition of an arms embargo, but they may also reflect general concerns about the destination or a relevant change in circumstances there. A decision to exclude a particular country from the coverage of an OIEL does not mean that country is permanently excluded. Where the concerns that led to the original decision are no longer relevant, it might be decided to reinstate that destination.

The OIELs data does not cover applications from which specific goods or destinations were removed before an OIEL was issued, or applications withdrawn before a decision was reached, it was determined that no licence was required or that the items could be exported to the destination concerned under an OGEL.

The information does not cover OIELs whose period of validity was extended temporarily during the period pending a decision on an application for a new OIEL. Such cases amount to a temporary extension of an OIEL granted in an earlier period. The decision on the new application will be covered in this or a future report, depending on the timing of the decision. As OIELs cover multiple shipments of specified goods to specified destinations or specified consignees, exporters holding OIELs are not asked to provide details of the value of goods they propose to ship under an OIEL and it is therefore not possible to provide information on the total value of OIELs issued.

As well as the data presented on SIELs and OIELS, data is presented on **SITCLs and OITCLs:**

- The number of SITCLs or OITCLs (presented separately) Issued, Refused (for SITCLs)/Rejected (for OITCLs) and Revoked in the period

## Overall Processing Statistics

	All licence applications	Issued	Refused/ Rejected	Revoked	Applications completed in 20 working days	% applications completed in 20 working days	Applications completed in 60 working days	% applications completed in 60 working days	Median processing time
SIELs	9978	9755	202	21	9074	71	11935	94	12 days
- Permanent Standard	8435	8225	189	21	7664	70	10225	93	13 days
- Temporary Standard	898	895	3	0	860	82	1035	99	11 days
- Transhipment	6	6	0	0	12	75	15	94	9 days
- Incorporation	628	618	10	0	532	79	650	96	10 days
- For goods covered by EC Reg 1236/2005 (Permanent or Temporary)	11	11	0	0	6	55	10	91	19 days
SITCLs	125	117	8	0	100	56	160	90	18 days
OIELs	200	173	14	13	153	42	250	68	32 days
- Standard	158	131	14	13	106	37	187	65	37 days
- Dealer-to-dealer	39	39	0	0	41	59	55	80	11 days
- Cryptographic	0	0	0	0	n/a	n/a	n/a	n/a	n/a
- Media	1	1	0	0	2	67	3	100	2 days
- Continental Shelf	2	2	0	0	4	80	5	100	8 days
Global Project Licences	0	0	0	0	1	100	1	100	10 days
OITCLs	28	24	4	0	17	38	33	73	26 days

**Table notes:**

SIEL and OIEL sub-types are mutually exclusive. SIEL Transhipments and Incorporations are permanent, but counted separately to Standard Permanent and Standard Temporary licences.

Data in the first four columns are not based on the same licences as the rest of the columns in the table.

In the first four columns, counts of licence applications Issued, Refused/Rejected and Revoked count the decisions made during the period on the licence, whenever the case has been closed or re-opened then re-closed.

The processing statistics (in the other columns) are calculated based on all licences closed during the period. All closed cases are counted, including those where the licence is issued or refused/rejected, or where the application is stopped or withdrawn, or where there was No Licence Required (NLR) decision made on the licence. Revocations apply to existing licences only, so are not counted. Time spent by the ECO waiting for documents from applicants or any time where the ECO are waiting for the applicant to respond to a request for further information is excluded. Time taken to make any amendments post-decision is not counted. For more information on how processing time is calculated, please consult the Quality and Methodology Report on the Strategic Export Controls licensing statistics web page: <https://www.gov.uk/government/collections/strategic-export-controls-licensing-data>.

## Open General Export Licences (OGLs)

OGLs can be used to export certain goods to certain destinations providing the terms and conditions of the OGL are met. See further information on military goods OGLs (<https://www.gov.uk/military-goods-ogels>) and dual-use goods OGLs (<https://www.gov.uk/dual-use-open-general-export-licences-explained>).

OGL Name	Registrations in this period	Suspensions in this period	Deregistrations in this period
EU GEA 001 (EU001)	208	0	0
EU GEA 002 (EU002) - exports of certain dual-use items to certain destinations	0	0	0
EU GEA 003 (EU003) - export after repair/replacement	0	0	0
EU GEA 004 (EU004) - temporary export for exhibition or fair	0	0	0
EU GEA 005 (EU005) - telecommunications	0	0	0
EU GEA 006 (EU006) - chemicals	0	0	0
Chemicals	8	0	0
Cryptographic Development	21	0	0
Export After Exhibition: Dual-Use Items	8	0	0
Export After Repair/Replacement Under Warranty: Dual-Use Items	48	0	0
Export For Repair/Replacement Under Warranty: Dual-Use Items	31	0	0
Dual-Use Items: Hong Kong Special Administrative Region	16	0	0
Open General Export Licence (International Non-Proliferation Regime Decontrols: Dual-Use Items)	0	0	0
Low Value Shipments	20	0	0
OIL and GAS Exploration: Dual-Use Items	23	0	0
Technology for Dual-Use Items	43	0	0
Turkey	13	0	0
X	6	0	0
Military and Dual Use Goods: UK Forces deployed in embargoed destinations	18	0	0

OGL Name	Registrations in this period	Suspensions in this period	Deregistrations in this period
Military and Dual-Use Goods: UK Forces deployed in non-embargoed destinations	26	0	0
Exports of non-lethal military and Dual-Use Goods: To UK Diplomatic Missions or Consular Posts	2	0	0
Access Overseas to Software and Technology for Military Goods: Individual Use Only	150	0	0
Export After Exhibition or Demonstration: Military Goods	47	0	0
Export After Repair/replacement Under Warranty: Military Goods	166	0	0
Export For Repair/Replacement Under Warranty: Military Goods	119	0	0
Exports or transfers in Support of UK Government Defence Contracts	98	0	0
OGEL (Certified Companies)	0	0	0
OGEL (Exports under the US-UK Defence Trade Co-operation Treaty)	0	0	0
OGEL (International Non-proliferation Regime Decontrols: Military Items) (Rv)	0	0	0
Historic Military Goods	10	0	0

5A002	2	£16,030,083
6A203	2	£165,686

biotechnology equipment.  
components for corrosion resistant chemical manufacturing equipment.  
electronics cooling fluids.  
equipment employing cryptography (2 licences).  
fibrous/filamentary materials (4 licences).  
human pathogens.  
radiation hardened TV camera lenses (2 licences).  
radiation hardened TV cameras.  
vibration test equipment.

### OIELs (excluding Other OIELs)

#### Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	anti-friction bearings
2 (Rv)	P	software enabling equipment to function as military communications equipment, technology for software enabling equipment to function as military communications equipment
3	P	cryptographic software
4 (Rv)	T	software for military communications equipment, technology for the use of software for military communications equipment

Rv - Some or all of which have subsequently been revoked.

#### Rejected

Applications to this destination refused in full.		
No.	Type	Goods Summary
1	P	ballistic shields, body armour, civil body armour, components for body armour, military helmets

#### Country Footnotes

1. No licences shall be granted for any military or dual-use goods and technology being supplied to military end-users in Argentina, except in exceptional circumstances. This decision will not affect licences for items intended for end-users other than the Argentine military.

## Armenia

### Processing Statistics

Median processing time SIELs	23 days

### SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

#### Issued

Types of goods on licence	No. of licences	Value
Military	2	£15,109
Total	2	£15,109

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

### Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML7	1	£3,900
PL5001	2	£11,209

anti-riot shields (2 licences).  
NBC respirators.

 military devices for initiating explosives.

### Country Footnotes

- Arms trade sanctions against Rwanda were invoked by UN Security Council resolution 918 (amended by 997 and 1011). Resolution 997 extended this embargo to cover arms exports to countries neighbouring Rwanda (Burundi, DR Congo, Uganda and Tanzania) where their intended use was within Rwanda. UNSCR 1823 (2008) terminated the remaining provisions of the arms embargo related to Rwanda - implemented in the UK by The United Nations Arms Embargoes (Rwanda) (Amendment) Order 2008 which came into force 13 December 2008.

All exports for Burundi were approved in accordance with the sanctions in place.

 improvised explosive device disposal equipment (12 licences).  
 military improvised explosive device disposal equipment.

## Country Footnotes

1. A declaration by the Madrid European Council on 27 June 1989 established an arms embargo on China. The embargo applies to: lethal weapons such as machine guns, large calibre weapons, bombs, torpedoes, rockets and missiles; specially designed components of these items and ammunition; military aircraft and helicopters, vessels of war, armoured fighting vehicles and other such weapons platforms; any equipment which might be used for internal repression. All exports for this destination were approved in accordance with the sanctions in place.

## Case & goods Footnotes

1. Approval granted for use by a public safety bureau for the legitimate disposal of explosives.
2. Approval granted as these components have a purely civil end use to aid in the detection of flaws in steel instruments.
3. Approval granted for small calibre sporting ammunition for the growing sports target shooting market in China. Export is for credible quantities and no military end use is involved.
4. Approval based on the fact that these are spare parts for a radar system currently owned by the end user, and judged to not lead to an enhancement in offensive military capabilities.
5. Approval based on the fact that these components are for an emergency rescue helicopter for legitimate civil end use only.

 linear cutting explosive charges.  
 military devices for initiating explosives.

### Country Footnotes

- Arms sanctions against DRC are currently in place under UN Security Council resolution 1807 (amended by UNSCR 1857). The embargo prohibits the supply, sale or transfer of arms and related materiel (and the provision of assistance) to all non-governmental entities and individuals operating in the DRC (subject to strict exemptions for UN/humanitarian end-use).

All exports for this destination were approved in accordance with the sanctions in place.

2. Arms trade sanctions against Rwanda were invoked by UN Security Council resolution 918 (amended by 997 and 1011). Resolution 997 extended this embargo to cover arms exports to countries neighbouring Rwanda (Burundi, DR Congo, Uganda and Tanzania) where their intended use was within Rwanda. UNSCR 1823 (2008) terminated the remaining provisions of the arms embargo related to Rwanda - implemented in the UK by The United Nations Arms Embargoes (Rwanda) (Amendment) Order 2008 which came into force 13 December 2008.

All exports for DRC were approved in accordance with the sanctions in place.

## Denmark

### SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

#### Issued

Types of goods on licence	No. of licences	Value
Military	2	£49,825
Non-military	3	£15,017
Total	5	£64,842

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

#### Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML4	2	£49,185
ML11	1	£640

components for military firing sets.  
CS hand grenades.  
equipment for the use of military firing sets.  
military firing sets.

#### Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1C350	1	£1,165
2B350	2	£13,852

chemicals used for electroplating processes.  
corrosion resistant chemical manufacturing equipment (2 licences).

## OIELs (excluding Other OIELs)

### Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	cryptographic software
2	P	hydrophones, towed hydrophone arrays

### SITCLs

Source	Issued	Refused	Revoked
China, Hungary, Switzerland	1	0	0
Serbia	1	0	0
South Africa	1	0	0

### Issued

anti-riot guns.  
components for general purpose machine guns.  
crowd control ammunition.  
CS hand grenades.  
equipment for the use of general purpose machine guns.  
general purpose machine guns (4).  
gun mountings (2 licences).  
pepper sprays for self protection.  
semi-automatic pistols (2000).  
small arms ammunition (2 licences).  
tear gas/irritant ammunition.  
technology for the use of general purpose machine guns.  
technology for the use of gun mountings.  
weapon cleaning equipment.

Total	21	£3,341,091

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

#### Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	5	£1,731,060
ML7	1	£2,538
ML10	3	£1,100,660
ML13	2	£11,760
ML15	5	£294,580
ML18	4	£41,864

body armour (2 licences).  
components for chemical agent detection equipment.

- components for military infrared/thermal imaging equipment (5 licences).
- components for military utility helicopters.
- components for weapon night sights (2 licences).
- T components for weapon night sights.
- equipment for the production of weapon night sights.
- T military training aircraft.
- production equipment for military infrared/thermal imaging equipment.
- production equipment for weapon night sights (2 licences).
- T unmanned air vehicles.
- T unmanned air vehicles control equipment.
- weapon sights (2 licences).

**Non-military**

Control Entry	No. of licences with goods rated using Control Entry	Value
PL8001	1	£70,629

- T improvised explosive device detection equipment.

**Both Military and Non-military**

Control Entry	No. of licences with goods rated using Control Entry	Value
ML7	1	£61,000
ML11	1	£2,000
ML21	1	£2,000
PL8001	1	£23,000

- T biological agent detection equipment.
- T chemical agent detection equipment.
- T equipment for the use of chemical agent detection equipment.
- T improvised explosive device detection equipment.
- T software for the use of chemical agent detection equipment.

**OIELs (excluding Other OIELs)**

**Issued**

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	military utility aircraft
2	P	software for the use of military communications equipment, technology for the use of software for the use of military communications equipment
3	P	ballistic shields, body armour, civil body armour, components for body armour, military helmets
4	P	aerial target equipment, airborne electronic warfare equipment, components for aerial target equipment, components for airborne electronic warfare equipment, components for electronic countermeasures equipment, components for military training aircraft, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, military training aircraft, technology for the use of aerial target equipment, technology for the use of airborne electronic warfare equipment, technology for the use of electronic countermeasures equipment, technology for the use of military training aircraft, technology for the use of training equipment for electronic countermeasures equipment, training equipment for electronic countermeasures equipment
5	P	aerial target equipment, airborne electronic warfare equipment, components for aerial target equipment, components for airborne electronic warfare equipment, components for electronic countermeasures equipment, components for military training aircraft, components for training equipment for electronic countermeasures

		equipment, electronic countermeasures equipment, military training aircraft, technology for the use of aerial target equipment, technology for the use of airborne electronic warfare equipment, technology for the use of electronic countermeasures equipment, technology for the use of test equipment for aerial target equipment, technology for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for electronic countermeasures equipment, technology for the use of training equipment for electronic countermeasures equipment, test equipment for aerial target equipment, test equipment for airborne electronic warfare equipment, test equipment for electronic countermeasures equipment, training equipment for electronic countermeasures equipment
6	P	command communications control and intelligence software
7	P	components for sporting rifles, unfinished products for sporting rifles, weapon sights
8	P	command communications control and intelligence software, software for the use of command communications control and intelligence software, software for the use of software to simulate the function of command communications control and intelligence software, software to simulate the function of command communications control and intelligence software
9	T	software for military communications equipment, technology for the use of software for military communications equipment
10	P	components for NBC clothing, NBC clothing
11	P	components for improvised explosive device detection equipment, improvised explosive device detection equipment

### **SIELs - Incorporation**

#### **Issued**

Types of goods on licence	No. of licences	Value
Military	1	£12,500
Non-military	3	£53,716
Total	4	£66,216

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

#### **Military**

Control Entry	No. of licences with goods rated using Control Entry	Value
ML13	1	£12,500

armoured plate.

#### **Non-military**

Control Entry	No. of licences with goods rated using Control Entry	Value
1C202	1	£13,373
2B350	1	£26,343
7A103	1	£14,000

components for corrosion resistant chemical manufacturing equipment.  
inertial equipment.  
metal alloy tubes.

The items being incorporated in this destination are ultimately destined for all or some of the following:

Belgium  
France  
United States of America

### **OIELs (excluding Other OIELs)**

#### **Issued**

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	general naval vessel components
2	P	general naval vessel components
3	P	equipment employing cryptography
4	P	anti-friction bearings
5	P	components for military training aircraft
6	P	components for combat aircraft, components for military utility helicopters
7	P	components for military aero-engines, equipment for the use of military aero-engines, military aero-engines, military aircraft ground equipment, technology for the use of military aero-engines
8	P	software enabling equipment to function as military communications equipment, technology for software enabling equipment to function as military communications equipment
9	P	cryptographic software
10	P	accessories for semiconductor process equipment, components for semiconductor process equipment, software for the use of semiconductor process equipment
11	P	bathymetric survey systems, heading sensors for hydrophone arrays, imaging cameras, inertial equipment, magnetometers, marine position fixing equipment, sonar log equipment, submersible equipment, submersible vehicles, underwater electronic imaging systems, underwater sonar navigation systems, underwater telecommunications systems
12	P	cryptographic software, equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography

### Country Footnotes

1. European Council Common Position 2007/140/CFSP, adopted on 27 February 2007, imposed a ban on the export of items on the Nuclear Suppliers Group and Missile Technology Control Regime lists. Common Position 2007/246/CFSP, adopted on 23 April 2007, imposed an embargo on the export to Iran of arms and related materiel of all types, including weapons and ammunition, military vehicles and equipment, paramilitary equipment and spare parts for the aforementioned. An exception is made for armoured vehicles for use by personnel of the EU and its Member States in Iran. EC Regulation 423/2007, adopted on 19 April 2007 (amended on 10 November 2008 through EC Regulation 1110/2008), made licensable, to Iran alone, goods or technology that could contribute to Iran's enrichment-related, reprocessing or heavy water-related activities; the development of nuclear weapon delivery systems by Iran; or the pursuit by Iran of activities related to other topics about which the IAEA has expressed concerns or identified as outstanding.

Following UNSCR 1803 Common Position 2008/632/CFSP was adopted on 8 August 2008. This put in place further restrictive measures including an additional embargo on certain goods and technology which could contribute to enrichment-related, reprocessing or heavy water-related activities. Further restraint concerning new commitments for public provided financial support for trade, vigilance over the activities of EU financial institutions with banks domiciled in Iran and their subsidiaries, branches and other financial entities outside Iran, inspection of and prior information requirement on certain cargoes to and from Iran. As stated above the corresponding Regulation was adopted on 10 November 2008 - EC Regulation 1110/2008.

All exports for this destination were approved in accordance with the sanctions in place.

 armoured all-wheel drive vehicles (2 licences).

## Country Footnotes

1. General trade sanctions against Iraq, except prohibitions related to the sale or supply of arms and related materiel, were revoked by the UN Security Council resolution 1483 (22 May 2003), implemented in UK legislation on 14 June 2003 by the Iraq (United Nations Sanctions) Order 2003 [S.I. 2003/1519]. UNSCR 1546 (2004) continues the embargo on arms and related materiel against Iraq, but provides exemptions for equipment required by the Government of Iraq or the Multinational Force to serve the purposes of UNSCR 1546 (2004).

All exports for this destination were approved in accordance with the sanctions in place.

### SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

## Issued

Types of goods on licence	No. of licences	Value
Military	49	£2,266,280
Non-military	28	£140,072,611
Both Military and Non-military	1	£21,869
Total	78	£142,360,759

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

## Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	7	£60,859
ML2	2	£45,240
ML3	1	£7,500
ML4	2	£66,317
ML5	6	£506,517
ML7	10	£122,150
ML8	2	£112,185
ML10	7	£100,587
ML11	10	£441,976
ML16	1	£778,521
ML18	1	£6,450
PL5017	2	£17,977

T airborne electronic warfare equipment.  
T anti-g/pressure suits.  
T attack alerting/warning equipment.  
binders/plasticizers/monomers/polymers for energetic materials.  
chemical agent detection equipment (6 licences).  
components for airborne electronic warfare equipment.  
components for airborne radars.  
components for aircraft radars.  
components for anti-armour missiles.  
components for chemical agent detection equipment (8 licences).  
components for ground based radars (2 licences).  
components for military communications equipment.  
components for military training aircraft (3 licences).  
components for military utility helicopters.  
components for naval electronic warfare equipment.  
components for semi-automatic pistols (2 licences).  
components for shotguns.  
components for sniper rifles.  
components for unmanned air vehicles.  
deactivated assault rifles (1).  
deactivated general purpose machine guns (40).  
deactivated general purpose machine guns (99).  
deactivated heavy machine guns (1).  
deactivated heavy machine guns (3).  
deactivated mortars.  
deactivated rifles (5).  
deactivated rifles (24).  
deactivated sporting rifles (4).

- deactivated submachine guns (13).
- deactivated submachine guns (102).
- demolition charges.
- T equipment for the development of military sonar detection equipment.
- equipment for the use of chemical agent detection equipment.
- T general military aircraft components.
- gun silencers.
- T large calibre artillery.
- military electronic equipment (3 licences).
- military navigation equipment.
- naval navigation equipment.
- non-sporting shotgun ammunition.
- pyrotechnics/fuels and related substances.
- rangefinding equipment.
- semi-automatic pistols (2) (2 licences).
- sporting rifles (1).
- test equipment for large calibre artillery.
- test equipment for military infrared/thermal imaging equipment.
- unfinished products for chaff.

**Non-military**

Control Entry	No. of licences with goods rated using Control Entry	Value
0C002	7	£139,350,000
0E001	11	£55
1C352	1	£150
1E001	1	£1
5A002	1	£7,500
5D002	1	£0
5E002	1	£0
6A001	4	£192,505
9B001	2	£522,400

- animal pathogens.
- cryptographic software.
- equipment employing cryptography.
- marine acoustic projectors.
- materials containing enriched uranium (6 licences).
- production equipment for gas turbines (2 licences).
- products containing enriched uranium.
- technology for the development of electrolytic cells for fluorine production.
- technology for the development of nuclear reactor fuel element fabrication equipment (8 licences).
- technology for the production of nuclear reactor fuel element fabrication equipment (2 licences).
- technology for the production of products containing enriched uranium (2 licences).
- technology for the production of products containing plutonium-239 (2 licences).
- technology for the use of cryptographic software.
- technology for the use of nuclear reactor fuel element fabrication equipment (10 licences).
- towed hydrophone arrays (3 licences).

**Both Military and Non-military**

Control Entry	No. of licences with goods rated using Control Entry	Value
1A004	1	£3,675
ML7	1	£18,194

- civil NBC protection clothing.
- components for NBC respirators.
- NBC clothing.

**OIELs (excluding Other OIELs)**

## Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	software for the use of military communications equipment, technology for the use of software for the use of military communications equipment
2	P	components for air-to-air missiles, components for anti-armour missiles, components for anti-ship missiles, components for combat aircraft, components for combat helicopters, components for fire control equipment, components for guided missile decoying equipment, components for imaging countermeasures equipment, components for laser rangefinders, components for military infrared/thermal imaging equipment, components for optical target acquisition equipment, components for optical target surveillance equipment, components for optical target tracking equipment, components for periscopes, components for weapon day and night sights, components for weapon sights, general military aircraft components
3	P	air guns, components for shotguns, components for sporting rifles, shotguns, small arms ammunition, sporting rifles, weapon sights
4	P	command communications control and intelligence software
5	P	bomb suits, general military vehicle components
6	T	software for military communications equipment, technology for the use of software for military communications equipment
7	P	hydrophones, towed hydrophone arrays
8	P	general military aircraft components

#### Country Footnotes

- Arms trade sanctions against Lebanon were adopted by UN Security Council resolution 1701, of 11 August 2006 and by European Council Common Position 2006/625/CFSP. Exceptions to the arms embargo cover the supply of arms and related materiel or the provision of assistance authorised by the Government of Lebanon or by UNFIL. All exports for this destination were approved in accordance with the sanctions in place.

### Country Footnotes

1. The arms embargo against Liberia was renewed by UN Security Council resolution 1521 (2003) and extended most recently until 19 December 2009 by UNSCR 1854 (2008). Strict exceptions to the embargo exist for certain purposes - e.g. humanitarian purposes, goods destined for UNMIL and assistance programmes.

All exports for this destination were approved in accordance with the sanctions in place.

- T bomb suits.
- T civil NBC protection clothing.
- T components for improvised explosive device disposal equipment.
- T components for military improvised explosive device disposal equipment.

T	devices for initiating explosives.
T	direct view imaging equipment.
T	equipment for the use of military firing sets.
T	equipment for the use of weapon sights.
T	explosives.
T	imaging cameras.
T	improvised explosive device detection equipment.
T	improvised explosive device disposal equipment (2 licences).
T	linear cutting explosive charges.
T	military firing sets.
T	military helmets.
T	military improvised explosive device disposal equipment.
T	NBC clothing.
T	NBC filters.
T	NBC respirators.
T	shotguns (2).
T	technology for the use of improvised explosive device disposal equipment.
T	technology for the use of weapon sights.
T	training equipment for explosive ordnance disposal equipment.
T	weapon night sights.

### OIELs (excluding Other OIELs)

#### Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1 (Rv)	P	components for military transport aircraft, equipment for the use of military transport aircraft, military aircraft ground equipment, software for the use of military transport aircraft, technology for the use of military transport aircraft
2 (Rv)	P	software enabling equipment to function as military communications equipment, technology for software enabling equipment to function as military communications equipment
3 (Rv)	T	software for military communications equipment, technology for the use of software for military communications equipment
4	P	cryptographic software, equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography

Rv - Some or all of which have subsequently been revoked.

#### Rejected

Applications to this destination refused in full.		
No.	Type	Goods Summary
1	P	components for sporting rifles, gun mountings, small arms ammunition, sporting rifles, unfinished products for sporting rifles, weapon sights
2	T	military utility aircraft

#### SITCLs

Source	Issued	Refused	Revoked
Ireland	1	0	0
Pakistan	1	0	0
Ukraine	0	1	0

#### Issued

anti-riot guns.  
 components for improvised explosive device detection equipment.  
 improvised explosive device detection equipment.  
 shotguns (4).  
 sporting gun ammunition.  
 technology for the use of improvised explosive device detection equipment.

**Refused**

assault rifles (130000).  
 components for assault rifles.  
 weapon cleaning equipment.

**Liechtenstein**

**Processing Statistics**

Median processing time OIELs	5 days
% and number of OIELs completed in 20 working days	67% (2)
% and number of OIELs completed in 60 working days	100% (3)
% [as a % of all OIELs cases processed] and number of OIELs refused	0% (0)

**OIELs (excluding Other OIELs)**

**Issued**

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	components for equipment employing cryptography, cryptographic software, equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography

**Lithuania**

% and number of OIELs completed in 60 working days	43% (6)
% [as a % of all OIELs cases processed] and number of OIELs refused	7% (1)

**SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)**

**Issued**

Types of goods on licence	No. of licences	Value
Military	3	£169,982
Non-military	3	£3,031,028
Both Military and Non-military	2	£295,704
Total	8	£3,496,714

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

### Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML3	1	£6,050
ML4	1	£69,432
ML13	1	£94,500

body armour.  
 components for body armour.  
 military helmets.  
 signal flares.  
 training small arms ammunition.

### Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
0B006	1	£3,022,500
0C002	1	£250
1A227	1	£0
2B225	1	£0
6A203	1	£0
PL8001	1	£8,277

components for nuclear fuel reprocessing equipment.  
 devices for initiating explosives.  
 firing sets.  
 nuclear fuel reprocessing equipment.  
 products containing plutonium-239.  
 radiation hardened TV camera lenses.  
 radiation hardened TV cameras.  
 radiation shielding windows.  
 remote manipulators.

### Both Military and Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1A004	1	£26,950
6A003	1	£125,000
ML1	1	£114,000
ML7	1	£3,960
ML11	2	£4,750

ML15	1	£20,000
ML21	1	£1,000
PL5017	1	£44

T	chemical agent detection equipment.
T	civil NBC detection systems.
T	equipment for the use of chemical agent detection equipment.
T	imaging cameras.
T	military electronic equipment.
T	military infrared/thermal imaging equipment.
T	software for the use of chemical agent detection equipment.
T	weapon day and night sights.
T	weapon night sights.
T	weapon sights.

### OIELs (excluding Other OIELs)

#### Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.

### SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

## Issued

Types of goods on licence	No. of licences	Value
Military	1	£393,000
Non-military	1	£50,150
Total	2	£443,150

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

## Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML6	1	£393,000

components for military utility vehicles.  
military utility vehicles.

## Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
5B002	1	£50,150

equipment for evaluating and validating information security functions.

# Papua New Guinea

**SIELs - Incorporation**

**Issued**

Types of goods on licence	No. of licences	Value
Military	6	£266,624
Non-military	2	£184,006
Total	8	£450,630

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

### Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML5	3	£240,203
ML6	1	£4,459
ML10	2	£17,602
ML11	1	£4,360

components for armoured fighting vehicles.  
 components for combat aircraft (2 licences).  
 components for military electronic equipment.  
 components for weapon night sights (2 licences).  
 components for weapon sights.

### Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1C202	1	£171,058
2B350	1	£12,948

corrosion resistant chemical manufacturing equipment.  
 metal alloy cylindrical forms.

The items being incorporated in this destination are ultimately destined for all or some of the following:

India  
 United Arab Emirates  
 United Kingdom  
 United States of America  
 Vietnam

### OIELs (excluding Other OIELs)

#### Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	cryptographic software
2	P	equipment employing cryptography
3	P	anti-friction bearings

4	P	equipment for the use of missile jamming equipment, software for the use of equipment for the use of missile jamming equipment
5	P	equipment employing cryptography, software for the use of equipment employing cryptography
6	P	software enabling equipment to function as military communications equipment, technology for software enabling equipment to function as military communications equipment
7	P	ballistic shields, body armour, civil body armour, components for body armour, military helmets
8	P	accessories for semiconductor process equipment, components for semiconductor process equipment, software for the use of semiconductor process equipment
9	P	bathymetric survey systems, heading sensors for hydrophone arrays, imaging cameras, inertial equipment, magnetometers, marine position fixing equipment, sonar log equipment, submersible equipment, submersible vehicles, underwater electronic imaging systems, underwater sonar navigation systems, underwater telecommunications systems
10	P	components for equipment employing cryptography, cryptographic software, equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
11	P	components for military aircraft pressurised breathing equipment, components for military communications equipment, components for military electronic equipment, military aircraft pressurised breathing equipment, military communications equipment, military electronic equipment, military flying helmets, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of military flying helmets
12	P	cryptographic software, equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography

### **SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)**

#### **Issued**

Types of goods on licence	No. of licences	Value
Military	11	£1,281,647
Non-military	4	£14,228
Total	15	£1,295,875

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

#### **Military**

Control Entry	No. of licences with goods rated using Control Entry	Value
ML4	2	£58,963
ML6	3	£1,050,000
ML13	7	£172,684

armoured all-wheel drive vehicles (2 licences).  
armoured plate.  
body armour (6 licences).  
components for body armour.  
components for explosive ordnance disposal equipment.  
demolition devices.  
explosive ordnance disposal equipment.  
military devices for initiating explosives.  
military firing sets (2 licences).  
military helmets (4 licences).

military utility vehicles.

### Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
5A002	2	£6,227
PL8001	2	£8,001

components for firing sets.  
devices for initiating explosives.  
equipment employing cryptography (2 licences).

### Rejected

armoured all-wheel drive vehicles.

### Country Footnotes

1. Arms trade sanctions against Somalia were invoked by UN Security Council resolution 733 in 1992 and were amended in 2002 by Security Council resolution 1425. Resolution 1356 adopted in 2001, provided for exemptions to the measures by allowing for supplies of non-lethal military equipment approved in advance by the Sanctions Committee intended solely for humanitarian or protective use. All exports for this destination were approved in accordance with the sanctions in place.

## South Africa

### Processing Statistics

Median processing time SIELs	13 days

## SIELs - Incorporation

### Issued

Types of goods on licence	No. of licences	Value
Military	8	£1,039,989
Non-military	1	£147,938
Total	9	£1,187,927

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where

the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry');

### Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML5	1	£25,000
ML10	7	£1,014,989

components for combat aircraft.  
 components for ground based radars.  
 components for military training aircraft (6 licences).

### Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
2B350	1	£147,938

corrosion resistant chemical manufacturing equipment.

The items being incorporated in this destination are ultimately destined for all or some of the following:

Indonesia  
 Norway  
 Turkey

### SIELs - Transshipment

#### Issued

Types of goods on licence	No. of licences	Value
Non-military	1	£5,745
Total	1	£5,745

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry');

### Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
3A230	1	£5,745

high speed pulse generators.

### OIELs (excluding Other OIELs)

## Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	cryptographic software
2	P	anti-friction bearings
3	P	components for patrol craft, equipment for the use of patrol craft, production equipment for patrol craft, technology for the production of patrol craft, technology for the use of patrol craft
4	P	equipment for the use of missile jamming equipment, software for the use of equipment for the use of missile jamming equipment
5	P	equipment employing cryptography, software for the use of equipment employing cryptography
6	P	components for combat aircraft, production equipment for combat aircraft, technology for the production of combat aircraft
7	P	software enabling equipment to function as military communications equipment, technology for software enabling equipment to function as military communications equipment
8	P	components for frigates, components for naval sonar equipment, equipment for the use of frigates, equipment for the use of naval sonar equipment, maintenance equipment for frigates, maintenance equipment for naval sonar equipment, naval sonar equipment, technology for the production of frigates, test equipment for frigates, test equipment for naval sonar equipment
9	P	accessories for semiconductor process equipment, components for semiconductor process equipment, software for the use of semiconductor process equipment
10	P	bathymetric survey systems, heading sensors for hydrophone arrays, imaging cameras, inertial equipment, magnetometers, marine position fixing equipment, sonar log equipment, submersible equipment, submersible vehicles, underwater electronic imaging systems, underwater sonar navigation systems, underwater telecommunications systems
11	P	components for equipment employing cryptography, cryptographic software, equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
12	P	components for military aircraft pressurised breathing equipment, components for military communications equipment, components for military electronic equipment, military aircraft pressurised breathing equipment, military communications equipment, military electronic equipment, military flying helmets, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of military flying helmets
13	P	cryptographic software, equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography, technology for the use of software for the use of equipment employing cryptography
14	P	cryptographic software, equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography
15	P	components for combat aircraft, components for ejector seats, components for military distress signalling equipment, components for military parachutes, components for military training aircraft, components for signal flares, ejector seats, military aircraft ground equipment, military distress signalling equipment, military parachutes, signal flares, technology for the development of ejector seats, technology for the development of military aircraft ground equipment, technology for the development of military distress signalling equipment, technology for the development of military parachutes, technology for the development of signal flares, technology for the production of ejector seats, technology for the production of military aircraft ground equipment, technology for the production of military distress signalling equipment, technology for the production of military parachutes, technology for the production of signal flares, technology for the use of ejector seats, technology for the use of military aircraft ground equipment, technology for the use of military distress signalling equipment, technology for the use of military parachutes

		parachutes, technology for the use of signal flares
16	P	software for the use of inertial equipment
17	P	cryptographic software
18	P	production technology for civil aero-engines, technology for the development of civil aero-engines
19	P	components for landing craft, components for patrol craft, equipment for the production of landing craft, equipment for the production of patrol craft, equipment for the use of landing craft, equipment for the use of patrol craft, technology for the production of landing craft, technology for the production of patrol craft, technology for the use of landing craft, technology for the use of patrol craft
20	T	software for military communications equipment, technology for the use of software for military communications equipment

military devices for initiating explosives.

## Rejected

armoured all-wheel drive vehicles.

## Country Footnotes

1. Arms trade sanctions were imposed by UN Security Council resolutions 1556 and 1591 to cover the Darfur region, and furthered by EU Common Positions 1994/165/CFSP and 2005/411/CFSP which apply to the whole of Sudan. All exports for this destination were approved in accordance with the sanctions in place.

### SIELs - Incorporation

#### Issued

Types of goods on licence	No. of licences	Value
Military	10	£699,034
Total	10	£699,034

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

#### Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML2	1	£4,898
ML6	2	£6,033
ML10	6	£242,103
ML13	1	£446,000

armoured plate.  
 components for anti-aircraft guns.  
 components for armoured fighting vehicles.

components for military aircraft pressurised breathing equipment (2 licences).  
 components for military training aircraft (3 licences).  
 general military vehicle components.  
 military aircraft pressurised breathing equipment.

The items being incorporated in this destination are ultimately destined for all or some of the following:

Australia  
 Belgium  
 Brazil  
 Romania  
 Saudi Arabia  
 Singapore  
 Spain

### OIELs (excluding Other OIELs)

#### Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	software for the use of military communications equipment, technology for the use of software for the use of military communications equipment
2	P	components for air-to-air missiles, components for anti-armour missiles, components for anti-ship missiles, components for combat aircraft, components for combat helicopters, components for fire control equipment, components for guided missile decoying equipment, components for imaging countermeasures equipment, components for laser rangefinders, components for military infrared/thermal imaging equipment, components for optical target acquisition equipment, components for optical target surveillance equipment, components for optical target tracking equipment, components for periscopes, components for weapon day and night sights, components for weapon sights, general military aircraft components
3	P	command communications control and intelligence software
4	P	bomb suits, general military vehicle components
5	T	software for military communications equipment, technology for the use of software for military communications equipment
6	P	components for NBC clothing, NBC clothing
7	P	general military aircraft components
8	P	components for improvised explosive device detection equipment, improvised explosive device detection equipment

#### Rejected

Applications to this destination refused in full.		
No.	Type	Goods Summary

### Country Footnotes

- Arms trade sanctions against Rwanda were invoked by UN Security Council resolution 918 (amended by 997 and 1011). Resolution 997 extended this embargo to cover arms exports to countries neighbouring Rwanda (Burundi, DR Congo, Uganda and Tanzania) where their intended use was within Rwanda. UNSCR 1823 (2008) terminated the remaining provisions of the arms embargo related to Rwanda - implemented in the UK by The United Nations Arms Embargoes (Rwanda) (Amendment) Order 2008 which came into force 13 December 2008.

All exports for Tanzania were approved in accordance with the sanctions in place.

### SIELs - Incorporation

#### Issued

Types of goods on licence	No. of licences	Value
Non-military	1	£30,000
Total	1	£30,000

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

#### Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
3A001	1	£30,000

general purpose integrated circuits.

The items being incorporated in this destination are ultimately destined for all or some of the following:

Denmark

### OIELs (excluding Other OIELs)

#### Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	cryptographic software
2	P	anti-friction bearings
3	P	software enabling equipment to function as military communications equipment, technology for software enabling equipment to function as military communications equipment

4	P	bathymetric survey systems, heading sensors for hydrophone arrays, imaging cameras, inertial equipment, magnetometers, marine position fixing equipment, sonar log equipment, submersible equipment, submersible vehicles, underwater electronic imaging systems, underwater sonar navigation systems, underwater telecommunications systems
5	P	components for military aircraft pressurised breathing equipment, components for military communications equipment, components for military electronic equipment, military aircraft pressurised breathing equipment, military communications equipment, military electronic equipment, military flying helmets, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of military flying helmets

#### Country Footnotes

1. Arms trade sanctions against Rwanda were invoked by UN Security Council resolution 918 (amended by 997 and 1011). Resolution 997 extended this embargo to cover arms exports to countries neighbouring Rwanda (Burundi, DR Congo, Uganda and Tanzania) where their intended use was within Rwanda. UNSCR 1823 (2008) terminated the remaining provisions of the arms embargo related to Rwanda - implemented in the UK by The United Nations Arms Embargoes (Rwanda) (Amendment) Order 2008 which came into force 13 December 2008.

All exports for Uganda were approved in accordance with the sanctions in place.

Control Entry	No. of licences with goods rated using Control Entry
5A002	1
End Use	2

- biotechnology equipment.
- components for pumps.
- T cryptanalytic equipment.
- pressure monitoring equipment.

Information on the Criteria used (from the Consolidated EU and National Arms Export Licensing Criteria) for the above refusals (refusals under WMD are covered by Criterion 1).

Criteria	Number of times the Criteria were used
1	2
5	1

**OIELs (excluding Other OIELs)**

## Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	airborne refuelling equipment, components for airborne refuelling equipment, components for aircraft military communications equipment, components for aircraft radars, components for military airborne cargo handling equipment, components for military aircraft ground equipment, components for military aircraft pressurised breathing equipment, components for military transport aircraft, components for tanker aircraft, general military aircraft components, military airborne cargo handling equipment, military aircraft ground equipment, software for the use of airborne refuelling equipment, software for the use of aircraft military communications equipment, software for the use of aircraft radars, software for the use of military airborne cargo handling equipment, software for the use of military aircraft ground equipment, software for the use of military transport aircraft, software for the use of tanker aircraft, technology for the use of airborne refuelling equipment, technology for the use of aircraft military communications equipment, technology for the use of aircraft radars, technology for the use of general military aircraft components, technology for the use of military airborne cargo handling equipment, technology for the use of military aircraft ground equipment, technology for the use of military transport aircraft, technology for the use of tanker aircraft
2	P	equipment for the use of missile jamming equipment, software for the use of equipment for the use of missile jamming equipment
3	P	components for military aero-engines, equipment for the use of military aero-engines, military aero-engines, military aircraft ground equipment, technology for the use of military aero-engines
4	P	components for military cargo vehicles
5	P	components for equipment employing cryptography, cryptographic software, equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography
6	P	software enabling equipment to function as military communications equipment, technology for software enabling equipment to function as military communications equipment
7	P	cryptographic software
8	P	ballistic shields, body armour, civil body armour, components for body armour, military helmets
9	P	components for military aircraft pressurised breathing equipment, components for military communications equipment, components for military electronic equipment, military aircraft pressurised breathing equipment, military communications equipment, military electronic equipment, military flying helmets, technology for the use of military aircraft pressurised breathing equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of military flying helmets
10	P	equipment employing cryptography, software for the use of equipment employing cryptography
11	P	components for equipment employing cryptography, cryptographic software, equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of equipment employing cryptography
12 (Rv)	P	components for military engineer vehicles, military engineer vehicles
13 (Rv)	T	software for military communications equipment, technology for the use of software for military communications equipment
14	P	cryptographic software, equipment employing cryptography, software for the use of equipment employing cryptography, technology for the use of cryptographic software, technology for the use of equipment employing cryptography
15	P	components for improvised explosive device detection equipment, improvised explosive device detection equipment
16	P	technology for the development of civil unmanned air vehicles, technology for the development of equipment for manned aircraft to UAV conversion, technology for the development of UAV control equipment, technology for the development of UAV guidance equipment, technology for the development of UAV remote control equipment

Rv - Some or all of which have subsequently been revoked.

### SITCLs

Source	Issued	Refused	Revoked
Jordan	1	0	0
Turkey	1	0	0

### Issued

air guns (1830).  
armoured all-wheel drive vehicles.

### OITCLs

Source	Issued	Refused	Revoked
Italy	1	0	0
Jordan	1	0	0
Jordan, United Kingdom	1	0	0
South Korea	1	0	0

### Issued

aerial target equipment.  
armoured all-wheel drive vehicles (2 licences).  
military training aircraft.  
unmanned air vehicles.

## United Kingdom

### Processing Statistics

Median processing time SIELs	4 days
% and number of SIELs completed in 20 working days	91% (41)
% and number of SIELs completed in 60 working days	98% (44)
% [as a % of all SIEL cases processed] and number of SIELs refused	0% (0)

Median processing time OIELs	119 days
% and number of OIELs completed in 20 working days	25% (1)
% and number of OIELs completed in 60 working days	25% (1)
% [as a % of all OIELs cases processed] and number of OIELs refused	0% (0)

Median processing time OITCLs	58 days
% and number of OITCLs completed in 20 working days	0% (0)
% and number of OITCLs completed in 60 working days	50% (1)
% [as a % of all OITCLs cases processed] and number of OITCLs refused	0% (0)

### SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

### Issued

Types of goods on licence	No. of licences	Value
Military	7	£58,534
Non-military	1	£200,000
Total	8	£258,534

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

### Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	5	£26,394
ML3	2	£32,140

T components for semi-automatic pistols [See footnote 1].  
 components for shotguns [See footnote 1].  
 shotguns (1) (2 licences) [See footnote 1].  
 shotguns (2).  
 small arms ammunition (2 licences) [See footnote 1].  
 sporting rifles (2) [See footnote 1].

### Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
PL8001	1	£200,000

devices for initiating explosives [See footnote 1].

### OIELs (excluding Other OIELs)

#### Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	bellows sealed valves, software for the use of bellows sealed valves, software for the use of uranium isotope separation equipment, technology for the use of bellows sealed valves, technology for the use of uranium isotope separation equipment, uranium isotope separation equipment
2	P	cryptographic software
3	T	technology for the development of nuclear reactors, technology for the production of nuclear reactors

#### OITCLs

Source	Issued	Refused	Revoked
Italy	1	0	0
United Kingdom	1	0	0

## Issued

aerial target equipment.  
air-to-surface missiles.  
surface-to-surface missiles.  
unmanned air vehicles.

## Case & goods Footnotes

1. This licence is actually for export to the Channel Islands. (It was issued to the United Kingdom due to an error in the application.)

## United States Minor Outlying Islands

### Processing Statistics

Median processing time SIELs	1 day
% and number of SIELs completed in 20 working days	100% (1)
% and number of SIELs completed in 60 working days	100% (1)
% [as a % of all SIEL cases processed] and number of SIELs refused	0% (0)

Median processing time OIELs	4 days
% and number of OIELs completed in 20 working days	100% (2)
% and number of OIELs completed in 60 working days	100% (2)
% [as a % of all OIELs cases processed] and number of OIELs refused	0% (0)

## United States of America

### Processing Statistics

Median processing time SIELs	8 days
% and number of SIELs completed in 20 working days	89% (890)
% and number of SIELs completed in 60 working days	98% (978)
% [as a % of all SIEL cases processed] and number of SIELs refused	0% (0)

Median processing time SITCLs	10 days
% and number of SITCLs completed in 20 working days	83% (5)
% and number of SITCLs completed in 60 working days	100% (6)
% [as a % of all SITCL cases processed] and number of SITCLs refused	0% (0)

Median processing time OIELs	34 days
% and number of OIELs completed in 20 working days	37% (25)
% and number of OIELs completed in 60 working days	72% (48)
% [as a % of all OIELs cases processed] and number of OIELs refused	0% (0)

Median processing time OITCLs	20 days
% and number of OITCLs completed in 20 working days	60% (3)
% and number of OITCLs completed in 60 working days	80% (4)

% [as a % of all OITCLs cases processed] and number of OITCLs refused	0% (0)

PL5006	7	£15,382,909
PL5017	33	£7,349,812

accessories for weapon night sights.  
air guns (520).  
aircraft military communications equipment.  
aircraft radars.  
anti-riot shields.  
armoured fighting vehicles (2 licences).  
armoured personnel carriers (5 licences).  
armoured plate (6 licences).

artillery fire location equipment.  
 assault rifles (1) (2 licences).  
 assault rifles (2).  
 assault rifles (3).  
 assault rifles (5000).  
 assault rifles (10000).  
 assault rifles (20000).  
 assault rifles (25000).  
 assault rifles (30000).  
 assault rifles (69500).  
 biological agent detection equipment.  
 T biological agent detection equipment.  
 calibration equipment for military infrared/thermal imaging equipment.  
 chemical agent detection equipment (2 licences).  
 chemical mixtures for NBC decontamination.  
 combat aircraft (2 licences).  
 combat helicopters.  
 combination rifle-shotguns.  
 command communications control and intelligence software (5 licences).  
 T command communications control and intelligence software.  
 components for air-to-air missiles.  
 components for air-to-surface missiles (2 licences).  
 T components for air-to-surface missiles.  
 components for airborne electronic warfare equipment.  
 components for airborne radars (3 licences).  
 components for aircraft carriers.  
 components for aircraft military communications equipment (3 licences).  
 components for aircraft radars (5 licences).  
 components for anti-aircraft guns.  
 components for anti-ship missiles (7 licences).  
 components for armoured fighting vehicles (4 licences).  
 T components for armoured fighting vehicles.  
 components for armoured personnel carriers.  
 components for artillery fire location equipment.  
 components for assault rifles (14 licences).  
 components for attack alerting/warning equipment.  
 components for avalanche control projectiles.  
 components for bombs (9 licences).  
 components for chemical agent detection equipment (2 licences).  
 components for combat aircraft (37 licences).  
 components for combat helicopters (3 licences).  
 components for constructions for ballistic protection of military systems.  
 T components for control equipment for surface-to-air missiles.  
 components for control equipment for unmanned air vehicles.  
 components for decoy flares.  
 components for destroyers (2 licences).  
 components for electronic countermeasures equipment (2 licences).  
 components for electronic warfare equipment.  
 T components for electronic warfare equipment.  
 components for general purpose machine guns (8 licences).  
 T components for global navigation satellite systems jamming equipment.  
 components for ground based radars (2 licences).  
 components for guided missile decoying equipment.  
 components for heavy machine guns.  
 components for helmet mounted display equipment (4 licences).  
 T components for helmet mounted display equipment.  
 components for large calibre artillery (9 licences).  
 components for laser rangefinders (2 licences).  
 T components for laser rangefinders (2 licences).  
 components for laser warning detectors.  
 components for launching equipment for air-to-air missiles (2 licences).  
 components for launching equipment for anti-ship missiles (5 licences).  
 components for launching equipment for munitions.  
 T components for launching equipment for surface-to-surface missiles.  
 components for military aero-engines (32 licences).  
 T components for military aero-engines (2 licences).  
 components for military aircraft ground equipment.  
 components for military aircraft head-up displays (4 licences).  
 components for military aircraft navigation equipment.  
 components for military aircraft pressure refuellers (2 licences).

components for military aircraft pressurised breathing equipment.  
 components for military communications equipment (19 licences).  
 components for military communications equipment (2 licences).  
 components for military distress signalling equipment (2 licences).  
 components for military electronic equipment (12 licences).  
 components for military electronic equipment (2 licences).  
 components for military firing sets.  
 components for military improvised explosive device disposal equipment (2 licences).  
 components for military improvised explosive device jamming equipment.  
 components for military improvised explosive device jamming equipment (2 licences).  
 components for military infrared/thermal imaging equipment (9 licences).  
 components for military navigation equipment (4 licences).  
 components for military parachutes.  
 components for military surveillance aircraft (3 licences).  
 components for military training aircraft (17 licences).  
 components for military transport aircraft (13 licences).  
 components for military transport aircraft.  
 components for military utility aircraft.  
 components for military utility helicopters (23 licences).  
 components for military utility helicopters (3 licences).  
 components for military utility vehicles (4 licences).  
 components for mortar bombs.  
 components for mortars (2 licences).  
 components for naval communications equipment (3 licences).  
 components for naval engines (2 licences).  
 components for naval radars.  
 components for NBC clothing (2 licences).  
 components for NBC decontamination equipment.  
 components for NBC respirators.  
 components for night vision goggles.  
 components for optical target surveillance equipment.  
 components for periscopes (2 licences).  
 components for recognition/identification equipment (2 licences).  
 components for rifles.  
 components for shotguns.  
 components for simulators for combat aircraft (2 licences).  
 components for small calibre artillery ammunition.  
 components for sniper rifles (4 licences).  
 components for sniper rifles.  
 components for submachine guns (5 licences).  
 components for surface-to-air missiles.  
 components for surface-to-surface missiles (7 licences).  
 components for tanks (2 licences).  
 components for test equipment for combat aircraft.  
 components for test equipment for combat aircraft.  
 components for test equipment for control equipment for surface-to-air missiles.  
 components for test equipment for military communications equipment (2 licences).  
 components for test equipment for military utility helicopters.  
 components for test models for the development of landing craft.  
 components for test models for the development of unmanned air vehicles.  
 components for turrets.  
 components for unmanned air vehicles (22 licences).  
 components for unmanned air vehicles (2 licences).  
 components for vintage military aircraft (2 licences).  
 components for weapon day and night sights.  
 developmental missile components (3 licences).  
 ejector seats.  
 energetic materials additives.  
 equipment for operation of military aircraft in confined areas.  
 equipment for the development of air-to-air missiles.  
 equipment for the development of air-to-surface missiles.  
 equipment for the development of bombs.  
 equipment for the development of NBC decontamination equipment.  
 equipment for the use of airborne electronic warfare equipment.  
 equipment for the use of artillery fire location equipment.  
 equipment for the use of bombs.  
 equipment for the use of chemical agent detection equipment (2 licences).  
 equipment for the use of ejector seats (2 licences).  
 equipment for the use of environmental test facilities for combat aircraft.  
 equipment for the use of ground based radars (2 licences).

equipment for the use of large calibre artillery.  
 equipment for the use of laser rangefinders.  
 equipment for the use of military aircraft pressure refuellers (2 licences).  
 equipment for the use of military communications equipment (3 licences).  
 T equipment for the use of military communications equipment (2 licences).  
 equipment for the use of military electronic equipment (2 licences).  
 equipment for the use of military improvised explosive device disposal equipment.  
 equipment for the use of military improvised explosive device jamming equipment.  
 T equipment for the use of military improvised explosive device jamming equipment.  
 equipment for the use of military utility helicopters.  
 T equipment for the use of military utility helicopters.  
 equipment for the use of naval communications equipment.  
 equipment for the use of sniper rifles (2 licences).  
 T equipment for the use of software for the simulation of military operation scenarios.  
 T equipment for the use of test equipment for weapon sights.  
 equipment for the use of weapon sights (2 licences).  
 explosive ordnance disposal equipment.  
 explosives.  
 forward observer/target recognition training equipment.  
 general military aircraft components (7 licences).  
 general military vehicle components (3 licences).  
 general purpose machine guns (5000) (2 licences).  
 goods treated for signature suppression for military use.  
 T goods treated for signature suppression for military use.  
 grenade launchers.  
 gun silencers.  
 handling equipment for air-to-air missiles.  
 helmet mounted display equipment (2 licences).  
 inert ammunition.  
 inert anti-armour rockets.  
 inert illuminators.  
 inert signal hand grenades.  
 inert smoke canisters.  
 inert smoke hand grenades.  
 inert stun grenades.  
 inert thunderflashes.  
 laser rangefinders.  
 T laser rangefinders.  
 T laser weapon systems.  
 launching equipment for anti-ship missiles.  
 maintenance equipment for sniper rifles (2 licences).  
 T maintenance equipment for sniper rifles.  
 military aero-engines.  
 T military aero-engines.  
 military aircraft ground equipment (9 licences).  
 T military aircraft ground equipment.  
 military aircraft head-up displays.  
 military aircraft navigation equipment (8 licences).  
 military cargo vehicles (2 licences).  
 military communications equipment (18 licences).  
 T military communications equipment (2 licences).  
 military containers.  
 military devices for initiating explosives (2 licences).  
 military electronic equipment (5 licences).  
 T military electronic equipment (5 licences).  
 military field generators.  
 military firing sets.  
 military improvised explosive device disposal equipment (3 licences).  
 T military improvised explosive device disposal equipment.  
 military improvised explosive device jamming equipment (2 licences).  
 T military improvised explosive device jamming equipment (2 licences).  
 military infrared/thermal imaging equipment.  
 T military infrared/thermal imaging equipment (2 licences).  
 military navigation equipment (4 licences).  
 military parachutes.  
 military small arms training equipment.  
 military training aircraft (2 licences).  
 T military utility helicopters.  
 mine clearance vehicles.  
 T missile scoring equipment.

naval communications equipment.  
NBC clothing (4 licences).  
NBC decontamination systems.  
NBC respirators.

T NBC respirators.  
pistols (1).  
production equipment for aircrew protective masks.  
production equipment for military aero-engines.

T projectile launchers.  
propellants.  
replica vintage guns.  
rifles (1).  
rifles (3).  
rifles (6).  
rifles (91).  
rifles (117).  
rifles (2000).  
rifles (40000).  
rifles.  
semi-automatic pistols (1) (2 licences).  
semi-automatic pistols (2).  
semi-automatic pistols (500).  
semi-automatic pistols (10000).  
shotguns (1) (7 licences).  
shotguns (2) (3 licences).  
shotguns (3) (3 licences).  
shotguns (4) (2 licences).  
shotguns (6).  
shotguns (12) (2 licences).

T shotguns (14).  
shotguns (18).  
shotguns (35).  
shotguns (1400).  
simulators for man portable air defence system missiles (2 licences).

T simulators for surface-to-air missiles.  
small arms ammunition (5 licences).  
small calibre artillery.  
sniper rifles (1).  
sniper rifles (3).  
sniper rifles (10).  
sniper rifles (2800) (2 licences).

T software for electronic warfare equipment.  
software for military communications equipment.  
software for optimising equipment design (5 licences).  
software for the development of combat aircraft.  
software for the development of software for the use of military aircraft navigation equipment.  
software for the modelling of weapon systems.

T software for the simulation of military operation scenarios.  
software for the use of combat helicopters (2 licences).  
software for the use of command communications control and intelligence software.  
software for the use of ground based radars.  
software for the use of helmet mounted display equipment.  
software for the use of military aircraft head-up displays (2 licences).  
software for the use of military aircraft navigation equipment.  
software for the use of military cameras.  
software for the use of military communications equipment (2 licences).

T software for the use of military improvised explosive device jamming equipment (2 licences).  
software for the use of military navigation equipment (2 licences).  
software for the use of military utility helicopters (2 licences).  
software for the use of simulators for military transport aircraft.

T software for the use of software for the simulation of military operation scenarios (2 licences).

T software for the use of technology for the use of software for the simulation of military operation scenarios.  
software for the use of test equipment for military communications equipment.  
software to simulate the function of aircraft military communications equipment.  
software to simulate the function of forward observer/target recognition training equipment.

T software to simulate the function of forward observer/target recognition training equipment.  
software to simulate the function of military aircraft navigation equipment.  
software to simulate the function of military communications equipment.  
software to simulate the function of military navigation equipment.

sporting rifles (1) (4 licences).  
 sporting rifles (2) (5 licences).

T animal pathogens (2 licences).  
 bathymetric survey systems.  
 civil NBC detection systems.

T civil unmanned air vehicles.  
 components for firing sets.  
 components for improvised explosive device detection equipment (2 licences).  
 components for improvised explosive device disposal equipment (2 licences).  
 components for nuclear reactors (5 licences).

T cryptographic software.

T devices containing enriched lithium.

- devices containing tritium.  
 devices for initiating explosives (5 licences).  
 equipment employing cryptography (2 licences).  
 equipment with reduced electromagnetic emanations.  
 extended temperature range integrated circuits (2 licences).  
 firing sets (7 licences).  
 general purpose integrated circuits.  
 genetically modified microorganisms.  
 global positioning satellite receivers.  
 high speed pulse generators.  
 human pathogens (9 licences).  
 imaging cameras.  
 improvised explosive device detection equipment (3 licences).  
 T improvised explosive device detection equipment (2 licences).  
 T improvised explosive device disposal equipment (2 licences).  
 inertial equipment (3 licences).  
 linear cutting explosive charges.  
 machine tools (3 licences).  
 T marine position fixing equipment.  
 mass spectrometers (12 licences).  
 materials containing natural uranium (2 licences).  
 materials containing thorium (2 licences).  
 neutron generators.  
 non-military explosives/propellants.  
 nuclear grade graphite (2 licences).  
 optical components made from zinc selenide.  
 products containing enriched uranium (2 licences).  
 products containing thorium.  
 radiation hardened integrated circuits (2 licences).  
 radio jamming equipment (2 licences).  
 T radio jamming equipment.  
 submersible vehicles.  
 T submersible vehicles (3 licences).  
 technology for the development of bellows sealed valves.  
 technology for the development of nuclear fuel reprocessing equipment.  
 technology for the development of nuclear reactors (2 licences).  
 technology for the development of uranium isotope separation equipment.  
 technology for the production of bellows sealed valves.  
 technology for the production of uranium isotope separation equipment.  
 technology for the use of bellows sealed valves.  
 technology for the use of software for the use of bellows sealed valves.  
 technology for the use of software for the use of uranium isotope separation equipment.  
 technology for the use of uranium isotope separation equipment.  
 test equipment for global positioning satellite receivers.  
 thorium.  
 toxins (19 licences).  
 T underwater electronic imaging systems.  
 uranium isotope separation equipment.  
 uranium-233.  
 vibration test equipment.

### Both Military and Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1A004	3	£9,548
ML4	2	£3,100
ML7	3	£166,743
ML11	1	£50,000
ML21	1	£5,000
PL5006	1	£18,890
PL5017	1	£2,000
PL8001	3	£24,580

- T biological agent detection equipment.  
 T chemical agent detection equipment.

T civil NBC detection systems.  
 civil NBC protection clothing.  
 T civil NBC protection clothing.  
 T civil NBC protection equipment.  
 T components for biological agent detection equipment.  
 T equipment for the use of chemical agent detection equipment.  
 firing sets.  
 T improvised explosive device detection equipment.  
 T improvised explosive device disposal equipment.  
 military devices for initiating explosives.  
 T military devices for initiating explosives.  
 T military improvised explosive device disposal equipment.  
 NBC clothing.  
 T NBC clothing.  
 T NBC filters.  
 T NBC protective equipment.  
 T NBC respirators.  
 T software for the use of chemical agent detection equipment.

## SIELs - Incorporation

### Issued

Types of goods on licence	No. of licences	Value
Military	55	£6,073,847
Total	55	£6,073,847

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

### Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML4	1	£200
ML5	9	£386,074
ML6	4	£65,130
ML10	26	£4,562,595
ML11	7	£522,131
ML13	1	£422,607
ML15	1	£109,700
ML21	4	£2,902
ML22	8	£1,400
PL5017	2	£1,109

airborne electronic warfare equipment.  
 armoured plate.  
 command communications control and intelligence software (2 licences).  
 components for airborne radars.  
 components for airborne targeting equipment (3 licences).  
 components for armoured fighting vehicles (2 licences).  
 components for armoured personnel carriers.  
 components for combat aircraft (4 licences).  
 components for fire control equipment (2 licences).  
 components for military aircraft head-up displays (4 licences).  
 components for military aircraft pressurised breathing equipment.  
 components for military electronic equipment.

components for military navigation equipment.  
components for military search and rescue aircraft (2 licences).  
components for military surveillance aircraft.  
components for military training aircraft (2 licences).  
components for military transport aircraft (7 licences).  
components for military utility helicopters.  
components for naval radars (4 licences).  
components for optical target acquisition equipment (2 licences).  
components for tanks.  
equipment for the use of military communications equipment.  
equipment for the use of optical target acquisition equipment.  
general military aircraft components.  
launching equipment for anti-armour rockets.  
military aircraft navigation equipment.  
military communications equipment.  
military electronic equipment.  
military navigation equipment.  
optical target acquisition equipment (2 licences).  
sensor data recorders.  
software to simulate the function of military navigation equipment.  
software to simulate the function of simulators for military training aircraft.  
technology for the use of command communications control and intelligence software (3 licences).  
technology for the use of military communications equipment.  
technology for the use of optical target acquisition equipment (2 licences).  
technology for the use of simulators for military training aircraft.  
technology for the use of software to simulate the function of military navigation equipment.  
test equipment for naval radars.

The items being incorporated in this destination are ultimately destined for all or some of the following:

Afghanistan  
Australia  
Belize  
Bulgaria  
Ecuador  
Egypt  
Finland  
France  
India  
Japan  
Kuwait  
North Macedonia  
Mexico  
Netherlands  
Oman  
Pakistan  
Poland  
Qatar  
Romania  
Saudi Arabia  
Singapore  
South Korea  
Spain  
Sweden  
Taiwan  
Thailand  
Trinidad and Tobago  
Turkey  
Ukraine  
United Kingdom

## OIELs (excluding Other OIELs)

### Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	components for military aero-engines, military aero-engines
2	P	equipment employing cryptography
3	P	bellows sealed valves, software for the use of bellows sealed valves, software for the use of uranium isotope separation equipment, technology for the use of bellows sealed valves, technology for the use of uranium isotope separation equipment, uranium isotope separation equipment
4	P	technology for the development of air-to-surface missiles, technology for the production of air-to-surface missiles, technology for the use of air-to-surface missiles
5	P	components for large calibre artillery
6	P	components for military communications equipment, equipment for the use of military communications equipment, military communications equipment, software for the use of military communications equipment, technology for the use of military communications equipment, training equipment for military communications equipment
7	P	military parachutes, military parachutist equipment, technology for the production of military parachutes, technology for the production of military parachutist equipment, technology for the use of military parachutes, technology for the use of military parachutist equipment
8	P	military utility aircraft
9	P	civil NBC protection equipment, NBC filters, NBC respirators
10	P	firing sets, military devices for initiating explosives
11	P	software for the use of military communications equipment, technology for the use of software for the use of military communications equipment
12	P	components for air-to-air missiles, components for anti-armour missiles, components for anti-ship missiles, components for combat aircraft, components for combat helicopters, components for fire control equipment, components for guided missile decoying equipment, components for imaging countermeasures equipment, components for laser rangefinders, components for military infrared/thermal imaging equipment, components for optical target acquisition equipment, components for optical target surveillance equipment, components for optical target tracking equipment, components for periscopes, components for weapon day and night sights, components for weapon sights, general military aircraft components
13	P	aircraft military communications equipment, components for aircraft military communications equipment, components for ground vehicle military communications equipment, components for military communications equipment, components for military electronic equipment, components for naval communications equipment, equipment for the use of aircraft military communications equipment, equipment for the use of ground vehicle military communications equipment, equipment for the use of military communications equipment, equipment for the use of military electronic equipment, equipment for the use of naval communications equipment, ground vehicle military communications equipment, military communications equipment, military electronic equipment, naval communications equipment, technology for the use of aircraft military communications equipment, technology for the use of ground vehicle military communications equipment, technology for the use of military communications equipment, technology for the use of military electronic equipment, technology for the use of naval communications equipment
14	P	components for military aero-engines, general military aircraft components
15	P	components for ejector seats, components for military training aircraft, ejector seats, military aircraft ground equipment, military distress signalling equipment, military parachutes, technology for the use of ejector seats, technology for the use of military aircraft ground equipment, technology for the use of military distress signalling equipment, technology for the use of military parachutes, technology for the use of military training aircraft
16	P	air guns, components for shotguns, components for sporting rifles, shotguns, small arms ammunition, sporting rifles, weapon sights

17	P	aerial target equipment, airborne electronic warfare equipment, components for aerial target equipment, components for airborne electronic warfare equipment, components for electronic countermeasures equipment, components for military training aircraft, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, military training aircraft, technology for the use of aerial target equipment, technology for the use of airborne electronic warfare equipment, technology for the use of electronic countermeasures equipment, technology for the use of military training aircraft, technology for the use of training equipment for electronic countermeasures equipment, training equipment for electronic countermeasures equipment
18	P	aerial target equipment, airborne electronic warfare equipment, components for aerial target equipment, components for airborne electronic warfare equipment, components for electronic countermeasures equipment, components for military training aircraft, components for training equipment for electronic countermeasures equipment, electronic countermeasures equipment, military training aircraft, technology for the use of aerial target equipment, technology for the use of airborne electronic warfare equipment, technology for the use of electronic countermeasures equipment, technology for the use of test equipment for aerial target equipment, technology for the use of test equipment for airborne electronic warfare equipment, technology for the use of test equipment for electronic countermeasures equipment, technology for the use of training equipment for electronic countermeasures equipment, test equipment for aerial target equipment, test equipment for airborne electronic warfare equipment, test equipment for electronic countermeasures equipment, training equipment for electronic countermeasures equipment
19	P	command communications control and intelligence software
20	P	technology for the development of combat aircraft, technology for the development of military aircraft flight data recorders, technology for the development of military aircraft ground equipment, technology for the development of military aircraft pressurised breathing equipment, technology for the development of test equipment for combat aircraft, technology for the development of test equipment for military aircraft flight data recorders, technology for the development of test equipment for military aircraft pressurised breathing equipment, technology for the production of combat aircraft, technology for the production of military aircraft flight data recorders, technology for the production of military aircraft ground equipment, technology for the production of military aircraft pressurised breathing equipment, technology for the production of test equipment for combat aircraft, technology for the production of test equipment for military aircraft flight data recorders, technology for the production of test equipment for military aircraft pressurised breathing equipment, technology for the use of combat aircraft, technology for the use of military aircraft flight data recorders, technology for the use of military aircraft ground equipment, technology for the use of military aircraft pressurised breathing equipment, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military aircraft flight data recorders, technology for the use of test equipment for military aircraft pressurised breathing equipment
21	P	components for large calibre artillery
22	P	technology for the development of combat aircraft, technology for the development of military aircraft flight data recorders, technology for the development of military aircraft ground equipment, technology for the development of military aircraft pressurised breathing equipment, technology for the development of test equipment for combat aircraft, technology for the development of test equipment for military aircraft flight data recorders, technology for the development of test equipment for military aircraft pressurised breathing equipment, technology for the production of combat aircraft, technology for the production of military aircraft flight data recorders, technology for the production of military aircraft ground equipment, technology for the production of military aircraft pressurised breathing equipment, technology for the production of test equipment for combat aircraft, technology for the production of test equipment for military aircraft flight data recorders, technology for the production of test equipment for military aircraft pressurised breathing equipment, technology for the use of combat aircraft, technology for the use of military aircraft flight data recorders, technology for the use of military aircraft ground equipment, technology for the use of military aircraft pressurised breathing equipment, technology for the use of test equipment for combat aircraft, technology for the use of test equipment for military aircraft flight data recorders, technology for the use of test equipment for military aircraft pressurised breathing equipment
23	P	technology for the development of aerial target equipment, technology for the development of air-to-surface missiles, technology for the development of combat aircraft, technology for the development of combat helicopters, technology for the development of military search and rescue aircraft, technology for the development of military surveillance aircraft, technology for the development of military training

		aircraft, technology for the development of military transport aircraft, technology for the development of military utility aircraft, technology for the development of military utility helicopters, technology for the development of surface-to-surface missiles, technology for the development of tanker aircraft, technology for the development of unmanned air vehicles, technology for the production of aerial target equipment, technology for the production of air-to-surface missiles, technology for the production of combat aircraft, technology for the production of combat helicopters, technology for the production of military search and rescue aircraft, technology for the production of military surveillance aircraft, technology for the production of military training aircraft, technology for the production of military transport aircraft, technology for the production of military utility aircraft, technology for the production of military utility helicopters, technology for the production of surface-to-surface missiles, technology for the production of tanker aircraft, technology for the production of unmanned air vehicles, technology for the use of aerial target equipment, technology for the use of air-to-surface missiles, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of surface-to-surface missiles, technology for the use of tanker aircraft, technology for the use of unmanned air vehicles
24	P	bomb suits, general military vehicle components
25	P	command communications control and intelligence software, software for the use of command communications control and intelligence software, software for the use of software to simulate the function of command communications control and intelligence software, software to simulate the function of command communications control and intelligence software
26	P	software for optimising equipment design
27	P	technology for the development of aerial target equipment, technology for the development of air-to-surface missiles, technology for the development of combat aircraft, technology for the development of combat helicopters, technology for the development of military search and rescue aircraft, technology for the development of military surveillance aircraft, technology for the development of military training aircraft, technology for the development of military transport aircraft, technology for the development of military utility aircraft, technology for the development of military utility helicopters, technology for the development of surface-to-surface missiles, technology for the development of tanker aircraft, technology for the development of unmanned air vehicles, technology for the production of aerial target equipment, technology for the production of air-to-surface missiles, technology for the production of combat aircraft, technology for the production of combat helicopters, technology for the production of military search and rescue aircraft, technology for the production of military surveillance aircraft, technology for the production of military training aircraft, technology for the production of military transport aircraft, technology for the production of military utility aircraft, technology for the production of military utility helicopters, technology for the production of surface-to-surface missiles, technology for the production of tanker aircraft, technology for the production of unmanned air vehicles, technology for the use of aerial target equipment, technology for the use of air-to-surface missiles, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of surface-to-surface missiles, technology for the use of tanker aircraft, technology for the use of unmanned air vehicles
28	T	software for military communications equipment, technology for the use of software for military communications equipment
29	P	components for NBC clothing, NBC clothing
30	P	components for military transport aircraft
31	P	aiming devices, components for anti-aircraft guns, components for anti-armour weapons, components for anti-riot guns, components for assault rifles, components for combat shotguns, components for general purpose machine guns, components for grenade launchers, components for gun laying equipment, components for heavy machine guns, components for large calibre artillery, components for launching equipment for anti-armour rockets, components for mortars, components for revolvers, components for rifles, components for semi-automatic pistols, components for shotguns, components for small calibre artillery, components for sniper rifles, components for submachine guns, components for weapon day and

		night sights, components for weapon night sights, components for weapon sights, general military vehicle components, gun laying equipment, gun mountings, maintenance equipment for anti-aircraft guns, maintenance equipment for anti-armour weapons, maintenance equipment for anti-riot guns, maintenance equipment for assault rifles, maintenance equipment for combat shotguns, maintenance equipment for general purpose machine guns, maintenance equipment for grenade launchers, maintenance equipment for heavy machine guns, maintenance equipment for large calibre artillery, maintenance equipment for launching equipment for anti-armour rockets, maintenance equipment for mortars, maintenance equipment for revolvers, maintenance equipment for rifles, maintenance equipment for semi-automatic pistols, maintenance equipment for shotguns, maintenance equipment for small calibre artillery, maintenance equipment for sniper rifles, maintenance equipment for submachine guns, military electronic equipment, technology for the use of anti-aircraft guns, technology for the use of anti-armour weapons, technology for the use of anti-riot guns, technology for the use of assault rifles, technology for the use of combat shotguns, technology for the use of general purpose machine guns, technology for the use of grenade launchers, technology for the use of heavy machine guns, technology for the use of large calibre artillery, technology for the use of launching equipment for anti-armour rockets, technology for the use of mortars, technology for the use of revolvers, technology for the use of rifles, technology for the use of semi-automatic pistols, technology for the use of shotguns, technology for the use of small calibre artillery, technology for the use of sniper rifles, technology for the use of submachine guns, test equipment for aiming devices, test equipment for gun laying equipment, weapon cleaning equipment, weapon day and night sights, weapon night sights, weapon sight mounts, weapon sights
32	P	hydrophones, towed hydrophone arrays
33	P	general military aircraft components
34	P	components for improvised explosive device detection equipment, improvised explosive device detection equipment

#### Revoked

Licences revoked or whose coverage was amended during the period by the removal of items and/or destinations.		
No.	Type	Goods Summary
1	P	air guns, components for air guns, components for revolvers, components for semi-automatic pistols, components for shotguns, components for sporting rifles, revolvers, semi-automatic pistols, shotguns, sporting gun ammunition, sporting rifles

The SIELs refused were not granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):
