**Strategic Export Controls: Country
Pivot Report**

**1st October 2008 - 31st December
2008**

OCTOBER 2019

Countries: All countries

Case Types: All case types

All Cases / Incorporation Cases Only: All cases

Ultimate Destinations: All countries

Licence Statuses: All licence statuses

Reasons for Refusal: All reasons for refusal

Case Summaries: All case summaries

Ratings: All control entries

Introduction

This report covers **export licensing decisions made by Her Majesty's Government (HMG)** between 1st October 2008 and 31st December 2008. Licence applications are submitted to and processed by the Export Control Organisation (ECO), part of the Department for International Trade, through a purpose-built online licensing system called Spire. The ECO issues licences for controlling the export of strategic goods.

Whether or not an export licence is required is determined by four factors, the:

- nature of the goods due to be exported
- destination concerned
- ultimate end use of the goods
- licensability of trade activities of the goods due to be exported

Broadly there are two types of licence, individual and general. Licences can be *standard* or *open*.

Each licence names the goods that can be exported and specifies the destinations to which they can be exported, along with other details and restrictions. *General* licences are pre-published and can be used by all eligible exporters whereas *individual* licences are issued following a successful application and allow only those named on the application to export certain goods. Those exporting under *general* licences must adhere to the terms and conditions of the licence under which they wish to export. Exporters must register with the ECO to use a *general* licence and are subject to regular audits to ensure the licence terms and conditions are being adhered to. Those requiring an *individual* licence must submit an application to the ECO where they wish to make exports not covered by the terms and conditions of a *general* licence.

Generally, *open* licences can be used with fewer restrictions than *standard* licences. *Standard* licences tend to name a specific quantity of specific goods that can be exported to a specific destination whereas *open* licences may include a wider range of goods or destinations and generally do not limit the quantity of goods that can be exported.

A glossary of key terms follows this introduction which explains the various licence types and subtypes that can be used or applied for and how information relating to each licence type and subtype is available within this report.

This report and other sources of information

Each of these quarterly reports (from 2015Q1 published in July 2015) is supplemented by a set of *data tables* in spreadsheet format (plus CSV format) and a *statistical commentary* document in addition to this report. The *data tables* provide the same information as presented in this report but in a different format and for **periods back to 1 January 2008**. CSV spreadsheets use a non-proprietary format that facilitates the manipulation of the data by a variety of software (not just Microsoft Excel) and provide the same information as available from the *data tables*. These outputs can be found alongside this report under the 'Quarterly reports' heading here:

<https://www.gov.uk/government/collections/strategic-export-controls-licensing-data>

The 'New Report' tool on the "Strategic Export Controls: Reports and Statistics" web page can also be used to download data. The tool offers a variety of filters that can be applied to allow users to download data of specific interest, such as licences which name a certain destination or licences for the shipment of goods with a certain rating. The tool is available here (registration required):

<https://www.exportcontroldb.trade.gov.uk/sdb/fox/sdb/SDBHOME>

Key terminology and data available in this report

Licences types exist for each combination of *open/standard* and *general/individual* , except for *standard general* . The following table summarises the licence types under each of these headings. Each of these licence type has subtypes (more information available under 'Licence types and subtypes').

	Open	Standard
General	OGELs	Not applicable
Individual	OIELs, OITCLs,	SIELs, SITCLs

Key terms

Strategic goods include military goods and a wide range 'dual-use' goods; civilian goods with a military purpose. Goods are assessed against a **consolidated list of goods that require export authorisation**, available here:

<https://www.gov.uk/government/publications/uk-strategic-export-control-lists-the-consolidated-list-of-strategic-military-and-dual-use-items-that-require-export-authorisation>

It is possible for a licence to be for both military and dual-use goods.

Control Entries are the codes assigned to each good on the **consolidated list of goods that require export authorisation (herein 'consolidated list')**. For example, all control entries beginning 'ML' (such as ML1, ML8 etc) are control entries for military goods. The process of assigning control entries to goods is called **Rating**.

In some cases goods can be made subject to control if they do not appear on the **consolidated list**. Goods that the exporter has been told, knows or suspects are, or may be, intended for "WMD Purposes" are given the rating "End-Use". Goods that the exporter has been told, knows or suspects are, or may be, intended for use as components in, or production or test equipment for, military equipment in an embargoed destination; or may be intended for use as parts of military goods illegally obtained from the UK, irrespective of destination, are given the rating "MEND". Both of these "end-use" ratings are also sometimes referred to as "catch all" ratings.

Case summaries are text descriptions used to classify goods on licences. They are standardised descriptions to explain what the goods are without giving away commercially sensitive details about the goods (such as design or intellectual property). Using standardised descriptions also facilitates comparison and analysis. Often extra detail is communicated by using prefixes. For example, a replacement part for a sporting shotgun may be described as "components for sporting shotguns" rather than just "sporting shotgun".

One or more Control Entry can be used to rate more than one good on a licence. Also, one or more Case Summaries can be used to describe a single Control Entry.

Goods are rated as **Military** (ie, they are assigned a Control Entry from the **UK Military List** within the **consolidated list**) or they are rated as being **Non-military**. Non-military goods:

- appear on other lists within the **consolidated list** , such as the **UK Dual-Use List** .
- also include goods refused to destinations that are placed under **sanctions**, such as trade sanctions or an arms embargo. Licences relating to the goods affected by the sanction do not get approved but also do not get rated against the **consolidated list**. They are instead rated with a **sanction code**, such as 'RUS' for Russia and 'IRN' for Iran.

SIELs for Goods covered by Council Regulation 1236/2005 (see 'Licence types and subtypes') concern trade in certain equipment and products which could be used for capital punishment, torture or other cruel, inhuman or degrading treatment or punishment. These are classed as non-military goods but appear separately to the statistics on licences for non-military goods. SIELs for Goods covered by Council Regulation 1236/2005 are

therefore not included in the count of non-military goods for other SIEL subtypes. More information on the Regulation is available here: <https://www.gov.uk/controls-on-torture-goods>

As noted, goods can also be rated even if they don't appear on the **consolidated list**.

Licence applications can be **Refused** (for standard individual licences) or **Rejected** (for open individual licences). Licences are refused/rejected for one or more pre-specified reasons. All applications for licences are assessed on a case-by-case basis against the **Consolidated EU and National Arms Export Licensing Criteria** and a decision made on either approval or refusal. Depending on the nature of the goods, other policy aspects might also be considered. For example, if the exported goods are due to be incorporated into another system, equipment or plant, then the items are also assessed against the UK's incorporation factors policy.

Applications for licences can be refused if it is deemed to fail one or more of the Consolidated EU and National Arms Export Licensing Criteria. These 8 criteria include, for example, *Preservation of regional peace, security and stability (criterion 4)* or *Respect for the UK's international obligations and commitments, in particular sanctions adopted by the UN Security Council or the European Union, agreements on non-proliferation and other subjects, as well as other international obligation (criterion 1)*. More information about the criteria is available here:

<https://www.gov.uk/government/publications/consolidated-eu-and-national-arms-export-licensing-criteria>

Licences can also be **Revoked** at any time after being Issued.

Case & goods footnotes are added to certain cases to provide explanation on the end use and/or end user.

Country footnotes are added to destinations with the aim to help the user understand why certain goods may have been approved, refused/rejected or revoked in the period.

Licence types and subtypes

Export Licences

General Licences

Before data are presented per destination, a table summarises the use of **Open General Export Licences (OGELs)** on page 14. OGELs are pre-published licences allowing the export of certain goods to certain destinations. If exporters are eligible to trade under an OGEL then they should register to use that OGEL. Once registered, there is no need for an exporter to submit further applications to trade under the licence they have registered to use.

Some Open General Transshipment licences exist for the **transshipment** of certain goods through the UK en-route from one country to another, providing in all cases that the relevant conditions are met.

There are no Open General licences for the **incorporation** of goods into another product or higher level systems.

Individual Licences

The vast majority of this report presents information (where available) per destination relating to *standard individual* licences and open individual licences (SIELs, OIELs, SITLs, SITCLs and OITCLs). All destinations are presented in this report, and if information regarding certain licence types is not presented for a destination then this is because no decisions have been made on such licences in this period.

Exporters should check to see whether they are eligible to use an *open general* licence before applying for either a *standard individual* licence (eg SIEL, SITCL) or *open individual* licence (eg OIEL, OITCL), whichever is most appropriate.

Open Individual Licences

Open Individual Export Licences (OIELs) are *specific to an individual exporter and cover multiple shipments of specified items to specified destinations and/or, in some cases, specified consignees.* Licences permitting permanent export are generally valid for up to 5 years from the date of issue. However, OIELs covering the export to EU Member States of goods entered on the Military List and Dealer to Dealer OIELs (an OIEL subtype) are generally valid for 3 years.

Other OIELs:

There are several subtypes of OIELs including **Global Project Licences**, as well as **Dealer-to-dealer, Cryptographic, Media and Continental Shelf OIELs.**

Dealer-to-dealer OIELs (or simply Dealer OIELs) authorise UK registered firearms dealers to export certain categories of firearms and ammunition solely to other registered firearms dealers on the European Union only, provided that copies of valid documentation are forwarded to the Home Office at least 2 working days before each shipment.

Cryptographic OIELs authorise the export of specified cryptography hardware or software and the transfer of specified cryptography technology. These licences do not cover hardware, software or technology which includes certain types of cryptanalytic functions.

Media OIELs authorise the export of military helmets, body armour, non-military 4WD civilian vehicles with

ballistic protection and specially designed components for any of these items, mainly for the protection of aid agency workers and journalists in areas of conflict. The licence permits these goods to be exported to all destinations on a temporary basis only, i.e. the goods must be returned to the United Kingdom when no longer required.

Continental Shelf OIELs authorise the export of controlled goods to the UK sector of the Continental Shelf for the use only on, or in connection with, offshore installation and associated vessels.

Global Project Licences (GPL) are a form of export licence that were introduced by Framework Agreement partners (UK, France, Italy, Sweden, Spain and Germany) to streamline the arrangements for licensing military goods and technologies between them, where these transfers relate to their participation in specific collaborative defence projects. In relation to the collaborative project, each Partner state will, as appropriate, issue their own GPLs to permit transfers of specified goods and technology where these are required for that programme. The GPLs operate on a similar basis to UK Open Individual Export Licences. In the UK, applications for GPLs are assessed against the Consolidated Criteria.

Standard Individual Licences

Standard Individual Export Licences (SIELs) are specific to an individual exporter and generally allow shipments of specified items to a specified consignee up to the quantity specified by the licence.

There are 5 main subtypes; permanent, temporary, incorporation, transshipment and SIELs for Goods covered by Council Regulation 1236/2005.

- **Permanent SIELs** are for items that are for permanent export to a destination. They are generally valid for 2 years from date of issue.
- **Temporary SIELs** are for where the export is temporary, for example for the purposes of demonstration, trial or evaluation, and the licence is generally valid for one year only. The goods must be returned before the licence expires. Temporary SIELs can cover more than one destination and in such cases the licence will be counted once per destination. Therefore users should express caution when summing licence details together across countries.
- **Incorporation SIELs** are for goods that are due to be incorporated ie, installing them into another product or higher level system. For incorporation cases there are two end user types. The 'end user' is the person/organisation incorporating the goods. The 'ultimate end user' is defined as the entity that uses the product or the higher level system into which the exported goods are installed or incorporated.
- **Transshipment SIELs** are needed for the transshipment of certain goods through the UK en-route from one country to another, providing certain conditions are met. This subtype of SIEL is also called a Standard Individual Transshipment Licence (SITL). Most other transshipments (of certain goods through the UK en-route from one country to another) can be made under one of the Open General Transshipment Licences, provided in all cases that the relevant conditions are met. There are no Open Individual licences for transshipments.
- **SIELs for Goods covered by Council Regulation 1236/2005** concern trade in certain equipment and products which could be used for capital punishment, torture or other cruel, inhuman or degrading treatment or punishment. These are classed as non-military goods but appear separately to the statistics on licences for non-military goods. SIELs for Goods covered by Council Regulation 1236/2005 are therefore not included in the count of non-military goods for other SIEL subtypes.

It should be noted that the refusal of an application for an OIEL, amendment to exclude a particular destination(s) and/or item(s), or the revocation of an OIEL, does not prevent a company from applying for a SIEL covering some or all of the items concerned to specified consignees in the relevant destinations. Clearly, however, the factors that led to the original decision would be taken into account in the decision on any such application.

Other Individual Licences

Information on Other Individual licences is not included as part of this report, or as part of the Excel or CSV spread sheets released alongside this report. Please see separate documentation entitled 'Data for Other Licences' published alongside this, or previous, reports.

Trade Control Licences

Trade Control licences are required for those brokering the export of strategic goods. Brokering means buying or selling, or arranging or negotiating transactions for the purchase, sale, or supply, of goods located in one third country for transfer to another. There are Open and Standard Trade Control licences

An **Open Individual Trade Control Licence (OITCL)** is *specific to a named trader and covers involvement in trading of a generally unlimited supply of specific goods between specific source and destination countries and/or specified consignors, consignees and end-users*. OITCLs are generally valid for 5 years.

A **Standard Individual Trade Control Licence (SITCL)** is specific to a named trader and covers involvement in trading of a set quantity of specific goods between a specific source and destination country with a specified consignor, consignee and end-user. SITCLs will normally be valid for 2 years. Upon expiry either by time or because the activity has taken place, the licence ceases to be valid and must be returned to the Export Control Organisation. Once the licence expires, a new application must be applied for if further trades are required. Like Individual Export licences, exporters should check to see whether they are eligible to use an OITCL before applying for a SITCL.

Reporting

Summary Tables

Before more detailed information is presented by destination on SIELs, OIELs, SITCLs and OITCLs, data summarising the number of licences Issued, Refused/Rejected and Revoked for each licence type within the period are presented.

Following this is some detailed information on Dealer OIELs, Cryptographic OIELs, Media OIELs, Continental Shelf OIELs and Global Project Licences - as generally there are not many of these per quarter so the information is best summarised for all destinations together in one table. Processing statistics are reported, similar to those presented per destination (see below). A table showing registrations, suspensions and de-registrations for the use of OGELs immediately precedes detailed information per destination.

Information Per Destination

Information for each destination follows the same pattern. The minimum information provided for each destination is processing statistics. Where no such licences decisions were made in the period, there is simply no information presented for such cases.

Processing statistics

The time calculated is the initial processing time, ie, the time elapsed from when the application is first received to when it is closed. All closed cases are counted, including those where the licence is issued or refused/rejected, or where the application is stopped or withdrawn, or where there was No Licence Required (NLR) decision made on the licence. Revocations apply to existing licences only, so are not counted. Time spent by the ECO waiting for documents from applicants or any time where the ECO are waiting for the applicant to respond to a request for further information is excluded. Time taken to make any amendments post-decision is not counted. For more information on how processing time is calculated, please consult the Quality and Methodology Report on the Strategic Export Controls licensing statistics web page:

<https://www.gov.uk/government/collections/strategic-export-controls-licensing-data>.

Separately for SIELs, SITCLs, OIELs and OITCLs the following processing statistics are presented per destination:

- Median processing time
- % and number of licences completed in 20 and 60 working days. For SIELs there are government targets to process 70% of applications within 20 working days and 99% within 60 working days. For OIELs and OITCLs there are government targets to process 60% of applications within 60 working days.

Licensing statistics

The information within the report covers those licences Issued, Refused/Rejected or Revoked within the period. It does not include information where applications were not fully processed, eg stopped or withdrawn, information on goods where there was No Licence Required (NLR), or certain changes to an existing licence - such as re-opening an application to make changes such as extensions to licences, removing good/s (although this is not done for OIELs), removing country/countries, or amending applicant errors.

If goods / countries are added to an application and subsequently end up on a licence they will be reported as a new issue for that period. The existing items will not be re-reported. The same applies for items removed from an application on an amendment, except in this case it will be reported as revoked.

In a small number of cases there may be a subsequent change of status during the same period. There are two

main reasons for such changes: a licence issued during the period may have been issued then subsequently revoked in the same period, for example because of the imposition of trade sanctions or an arms embargo; or a decision during the period to refuse a licence might be overturned because the applicant later appealed successfully and the licence was issued in a later period. These cases are flagged in this report as Rv and A respectively.

For each destination and for each of Issued, Refused and Revoked the following is data is presented in this report, where available, for each **SIEL** subtype (note: information on SITLs can be found under the heading 'SIELs - Transshipment'):

- A count of the number of licences on which goods were Issued, Refused or Revoked categorised by the type of goods; Military, Non-military or Both Military and Non-military (see 'Key Terms'). Examples of when a licence may be for both military and non-military goods could be where the goods are military body armour and civilian body armour, or where bomb detection goods are being sold for use by the military and for civilian use such as at airports. However, the military and non-military goods will not necessarily be of the same type.
- A count of the number of licences on which goods were Issued, Refused or Revoked per Control Entry. Control Entries are presented per category (Military, Non-military or Both Military and Non-military) based on the licence they relate to. The number given is the number of licences on which a Control Entry was used. Please note that more than one Control Entry can apply to goods on an individual licence and each Control Entry is counted only once per individual licence (regardless of the number of goods that have been rated with that Control Entry).
- Data for Issued SIELs includes the value of the goods in each category. However, note that goods covered by issued SITLs merely pass through the UK and it would therefore be misleading to compare the 'value' for these licences in the report with the value of items originating in the UK.
- Case summaries for each of Issued, Refused and Revoked broken down by category (Mil/Non-mil/Both), listed below the appropriate Control Entry table in which they feature. Case summaries for small arms covered by SIELs issued in the period give the number of units in parentheses. If the number of licences using the case summary in the period is more than one then this is also detailed in parentheses (eg "2 licences"). Items that were allowed for Temporary export are indicated by a "T" preceding the description. Items that were originally allowed for Temporary export but then converted to allow Permanent export are indicated by a "T(P)". Note that more than one Case Summary can apply to a single Control Entry. Note that more than one Case Summary can apply to a single Control Entry.
- The ultimate destination/s for goods that are being incorporated.
- For refusals, the number of times each of the 8 Consolidated EU and National Arms Export Licensing Criteria are used to refuse licence applications for the destination is provided.

The Control Entries supplied are less detailed than those listed in the **consolidated list of goods that require export authorisation**. For example, we report ML1 but there are more specific codes such as ML1a, ML1b, ML1c and ML1d. Here is an example to explain how we would count the number of licences containing goods rated ML1:

Issued licences for a given destination	Control Entries applied to goods on licence
Licence 1	ML1a, ML1a, ML1b, ML1c
Licence 2	ML1a, ML2a
Licence 3	ML1a
Licence 4	ML1c
Licence 5	ML2a
<i>Total number of licences containing goods rated ML1</i>	4

In the example the number of licences containing goods rated ML1 is 4 because the more detailed codes (eg ML1a, ML1b etc) are treated as though they are the broader code ML1. Also, each Control Entry is counted a maximum of once per licence, so licence 1, 2, 3 and 4 each have a count of 1 for ML1.

The data on refused SIEL applications does not include those refused during this period following an appeal against an earlier refusal. The SIELs data also does not cover goods that were removed from an application before a licence was issued, applications that were withdrawn or stopped before a decision was reached, or applications where it was determined that no licence was required or that the goods could be exported to the

destination concerned under an Open General Export Licence (OGEL).

In the case of SIELs refused or revoked, only the rating of the goods is provided.

Values are shown to the nearest pound. It should be noted that the actual value of exports made under the licences is likely to be less than shown because some of these licences will not be used to make all of the exports authorised and others will not be used at all. In addition, some items are exported only temporarily and are later returned to the UK.

In some cases SIELs may be issued identifying more than one destination. This normally arises where a licence is issued for the temporary export of items for exhibition or demonstration in more than one destination. Details of these licences are included in the information for each relevant destination. This means that the total number of SIELs issued is lower than the sum of all SIELs issued shown across all the destination pages.

For each destination and for each of Issued, Refused and Revoked the following data is presented in this report, where available, for each OIEL subtype:

- A case summary description of the goods covered by each OIEL, with the items that were allowed for temporary export indicated by a "T" preceding the description, for Issued, Rejected and Revoked licences.

Case summaries are provided for all licences issued in the period or where the coverage of an existing licence was amended during the period by the inclusion or reinstatement of this destination or by the addition of goods. Case summaries are provided for licences fully revoked, refused in full or whose coverage was amended during the period by the removal of items and/or destinations. The destination coverage of an OIEL may be amended for a variety of reasons, but mainly in the light of recommendations received from advisory government departments. Sometimes amendments follow the imposition of an arms embargo, but they may also reflect general concerns about the destination or a relevant change in circumstances there. A decision to exclude a particular country from the coverage of an OIEL does not mean that country is permanently excluded. Where the concerns that led to the original decision are no longer relevant, it might be decided to reinstate that destination.

The OIELs data does not cover applications from which specific goods or destinations were removed before an OIEL was issued, or applications withdrawn before a decision was reached, it was determined that no licence was required or that the items could be exported to the destination concerned under an OGEL.

The information does not cover OIELs whose period of validity was extended temporarily during the period pending a decision on an application for a new OIEL. Such cases amount to a temporary extension of an OIEL granted in an earlier period. The decision on the new application will be covered in this or a future report, depending on the timing of the decision. As OIELs cover multiple shipments of specified goods to specified destinations or specified consignees, exporters holding OIELs are not asked to provide details of the value of goods they propose to ship under an OIEL and it is therefore not possible to provide information on the total value of OIELs issued.

As well as the data presented on SIELs and OIELS, data is presented on **SITCLs and OITCLs:**

- The number of SITCLs or OITCLs (presented separately) Issued, Refused (for SITCLs)/Rejected (for OITCLs) and Revoked in the period

Overall Processing Statistics

	All licence applications	Issued	Refused/ Rejected	Revoked	Applications completed in 20 working days	% applications completed in 20 working days	Applications completed in 60 working days	% applications completed in 60 working days	Median processing time
SIELs	2637	2572	46	19	2580	79	3137	96	10 days
- Permanent Standard	2233	2168	46	19	2192	77	2696	95	10 days
- Temporary Standard	213	213	0	0	213	85	248	99	10 days
- Transhipment	2	2	0	0	2	50	4	100	19 days
- Incorporation	188	188	0	0	173	89	189	97	8 days
- For goods covered by EC Reg 1236/2005 (Permanent or Temporary)	1	1	0	0	0	0	0	0	82 days
SITCLs	39	37	2	0	19	41	39	85	25 days
OIELs	44	35	3	6	34	52	48	73	18 days
- Standard	34	25	3	6	21	41	33	65	28 days
- Dealer-to-dealer	8	8	0	0	11	92	12	100	4 days
- Cryptographic	0	0	0	0	n/a	n/a	n/a	n/a	n/a
- Media	1	1	0	0	0	0	1	100	54 days
- Continental Shelf	1	1	0	0	2	100	2	100	5 days
Global Project Licences	0	0	0	0	n/a	n/a	n/a	n/a	n/a
OITCLs	1	1	0	0	2	29	7	100	23 days

Table notes:

SIEL and OIEL sub-types are mutually exclusive. SIEL Transhipments and Incorporations are permanent, but counted separately to Standard Permanent and Standard Temporary licences.

Data in the first four columns are not based on the same licences as the rest of the columns in the table.

In the first four columns, counts of licence applications Issued, Refused/Rejected and Revoked count the decisions made during the period on the licence, whenever the case has been closed or re-opened then re-closed.

The processing statistics (in the other columns) are calculated based on all licences closed during the period. All closed cases are counted, including those where the licence is issued or refused/rejected, or where the application is stopped or withdrawn, or where there was No Licence Required (NLR) decision made on the licence. Revocations apply to existing licences only, so are not counted. Time spent by the ECO waiting for documents from applicants or any time where the ECO are waiting for the applicant to respond to a request for further information is excluded. Time taken to make any amendments post-decision is not counted. For more information on how processing time is calculated, please consult the Quality and Methodology Report on the Strategic Export Controls licensing statistics web page: <https://www.gov.uk/government/collections/strategic-export-controls-licensing-data>.

Open General Export Licences (OGLs)

OGLs can be used to export certain goods to certain destinations providing the terms and conditions of the OGL are met. See further information on military goods OGLs (<https://www.gov.uk/military-goods-ogels>) and dual-use goods OGLs (<https://www.gov.uk/dual-use-open-general-export-licences-explained>).

OGL Name	Registrations in this period	Suspensions in this period	Deregistrations in this period
EU GEA 001 (EU001)	38	0	0
EU GEA 002 (EU002) - exports of certain dual-use items to certain destinations	0	0	0

SIELs - Permanent and Temporary (excluding Incorporation and Transshipment)

Issued

Types of goods on licence	No. of licences	Value
Military	7	£313,945
Total	7	£313,945

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML3	2	£291,000
ML6	1	£2,632
ML10	1	£180
PL5017	3	£20,133

components for armoured fighting vehicles.
 equipment for the use of mortars.
 equipment for the use of small calibre artillery.
 equipment for the use of tanks.
 general military aircraft components.
 small arms ammunition (2 licences).
 test equipment for armoured fighting vehicles.
 test equipment for mortars.
 test equipment for tanks.

body armour.
explosive ordnance disposal equipment.
military firing sets.
military improvised explosive device disposal equipment.

Country Footnotes

- Arms trade sanctions against Rwanda were invoked by UN Security Council resolution 918 (amended by 997 and 1011). Resolution 997 extended this embargo to cover arms exports to countries neighbouring Rwanda (Burundi, DR Congo, Uganda and Tanzania) where their intended use was within Rwanda. UNSCR 1823 (2008) terminated the remaining provisions of the arms embargo related to Rwanda - implemented in the UK by The United Nations Arms Embargoes (Rwanda) (Amendment) Order 2008 which came into force 13 December 2008.

All exports for Burundi were approved in accordance with the sanctions in place.

improvised explosive device disposal equipment (3 licences).
military improvised explosive device disposal equipment.

Country Footnotes

1. A declaration by the Madrid European Council on 27 June 1989 established an arms embargo on China. The embargo applies to: lethal weapons such as machine guns, large calibre weapons, bombs, torpedoes, rockets and missiles; specially designed components of these items and ammunition; military aircraft and helicopters, vessels of war, armoured fighting vehicles and other such weapons platforms; any equipment which might be used for internal repression. All exports for this destination were approved in accordance with the sanctions in place.

Case & goods Footnotes

1. Approval granted for use by a public safety bureau for the legitimate disposal of explosives.
2. Approval granted as these components have a purely civil end use to aid in the detection of flaws in steel instruments.
3. Approval granted for small calibre sporting ammunition for the growing sports target shooting market in China. Export is for credible quantities and no military end use is involved.
4. Approval based on the fact that these are spare parts for a radar system currently owned by the end user, and judged to not lead to an enhancement in offensive military capabilities.
5. Approval based on the fact that these components are for an emergency rescue helicopter for legitimate civil end use only.

Country Footnotes

1. Arms sanctions against DRC are currently in place under UN Security Council resolution 1807 (amended by UNSCR 1857). The embargo prohibits the supply, sale or transfer of arms and related materiel (and the provision of assistance) to all non-governmental entities and individuals operating in the DRC (subject to strict exemptions for UN/humanitarian end-use).

All exports for this destination were approved in accordance with the sanctions in place.

2. Arms trade sanctions against Rwanda were invoked by UN Security Council resolution 918 (amended by 997 and 1011). Resolution 997 extended this embargo to cover arms exports to countries neighbouring Rwanda (Burundi, DR Congo, Uganda and Tanzania) where their intended use was within Rwanda. UNSCR 1823 (2008) terminated the remaining provisions of the arms embargo related to Rwanda - implemented in the UK by The United Nations Arms Embargoes (Rwanda) (Amendment) Order 2008 which came into force 13 December 2008.

All exports for DRC were approved in accordance with the sanctions in place.

Country Footnotes

1. European Council Common Position 2007/140/CFSP, adopted on 27 February 2007, imposed a ban on the export of items on the Nuclear Suppliers Group and Missile Technology Control Regime lists. Common Position 2007/246/CFSP, adopted on 23 April 2007, imposed an embargo on the export to Iran of arms and related materiel of all types, including weapons and ammunition, military vehicles and equipment, paramilitary equipment and spare parts for the aforementioned. An exception is made for armoured vehicles for use by personnel of the EU and its Member States in Iran. EC Regulation 423/2007, adopted on 19 April 2007 (amended on 10 November 2008 through EC Regulation 1110/2008), made licensable, to Iran alone, goods or technology that could contribute to Iran's enrichment-related, reprocessing or heavy water-related activities; the development of nuclear weapon delivery systems by Iran; or the pursuit by Iran of activities related to other topics about which the IAEA has expressed concerns or identified as outstanding.

Following UNSCR 1803 Common Position 2008/632/CFSP was adopted on 8 August 2008. This put in place further restrictive measures including an additional embargo on certain goods and technology which could contribute to enrichment-related, reprocessing or heavy water-related activities. Further restraint concerning new commitments for public provided financial support for trade, vigilance over the activities of EU financial institutions with banks domiciled in Iran and their subsidiaries, branches and other financial entities outside Iran, inspection of and prior information requirement on certain cargoes to and from Iran. As stated above the corresponding Regulation was adopted on 10 November 2008 - EC Regulation 1110/2008.

All exports for this destination were approved in accordance with the sanctions in place.

Country Footnotes

1. General trade sanctions against Iraq, except prohibitions related to the sale or supply of arms and related materiel, were revoked by the UN Security Council resolution 1483 (22 May 2003), implemented in UK legislation on 14 June 2003 by the Iraq (United Nations Sanctions) Order 2003 [S.I. 2003/1519]. UNSCR 1546 (2004) continues the embargo on arms and related materiel against Iraq, but provides exemptions for equipment required by the Government of Iraq or the Multinational Force to serve the purposes of UNSCR 1546 (2004).

All exports for this destination were approved in accordance with the sanctions in place.

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	15	£145,190
Both Military and Non-military	2	£154,400
Total	17	£299,590

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	13	£129,836
ML3	1	£5,857
ML7	1	£9,497

components for chemical agent detection equipment.
 components for heavy machine guns.
 gun silencers (2 licences).
 heavy machine guns (28).
 rifles (1).
 semi-automatic pistols (1) (2 licences).
 shotguns (1) (3 licences).
 small arms ammunition.
 sporting rifles (1) (4 licences).

Both Military and Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1A004	1	£42,000
ML7	1	£87,600
ML8	1	£10,200
ML21	1	£5,000
PL8001	1	£6,000
PL9002	1	£3,600

T biological agent detection equipment.
 T chemical agent detection equipment.
 T civil NBC detection systems.
 T components for chemical agent detection equipment.
 explosives.
 T improvised explosive device detection equipment.
 non-military explosives/propellants.
 T nuclear radiation detection equipment.
 T software to simulate the function of software for the use of chemical agent detection equipment.

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	9	£75,748
Non-military	1	£8,000
Total	10	£83,748

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once

per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	4	£38,348
ML3	1	£16,290
ML6	2	£3,980
ML10	1	£343
ML13	1	£16,720
PL5017	1	£67

body armour.
 components for assault rifles.
 components for body armour.
 components for general purpose machine guns.
 components for gun mountings.
 components for military training aircraft.
 components for small arms ammunition.
 components for submachine guns.
 components for weapon sights.
 general military vehicle components.
 gun mountings.
 maintenance equipment for general purpose machine guns.
 military cargo vehicles.
 military helmets.
 military trailers.
 sporting rifles (10).

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
5A002	1	£8,000

equipment employing cryptography.

Country Footnotes

- Arms trade sanctions against Lebanon were adopted by UN Security Council resolution 1701, of 11 August 2006 and by European Council Common Position 2006/625/CFSP. Exceptions to the arms embargo cover the supply of arms and related materiel or the provision of assistance authorised by the Government of Lebanon or by UNFIL. All exports for this destination were approved in accordance with the sanctions in place.

Country Footnotes

- Arms trade sanctions against Somalia were invoked by UN Security Council resolution 733 in 1992 and were amended in 2002 by Security Council resolution 1425. Resolution 1356 adopted in 2001, provided for exemptions to the measures by allowing for supplies of non-lethal military equipment approved in advance by the Sanctions Committee intended solely for humanitarian or protective use. All exports for this destination were approved in accordance with the sanctions in place.

PL5017	4	£6,518

T airborne electronic warfare equipment (2 licences).
airborne electronic warfare equipment.
biological agent detection equipment.
chemical agent detection equipment.
components for air-to-air missiles.
components for airborne electronic warfare equipment (2 licences).
components for aircraft missile protection systems.
components for aircraft radars.
components for assault rifles.
components for attack alerting/warning equipment (2 licences).
components for chemical agent detection equipment.
components for combat helicopters.
components for electronic warfare equipment.
components for military aircraft flight data recorders.
components for military aircraft navigation equipment.
components for military training aircraft.
components for military utility helicopters.
components for optical target surveillance equipment.
components for periscopes.
components for semi-automatic pistols (2 licences).
components for sniper rifles.
components for submachine guns.
components for test equipment for military infrared/thermal imaging equipment.

T deactivated revolvers (1).
ejector seats.

T electronic warfare equipment.
equipment for the production of optical target acquisition equipment.
equipment for the use of general purpose machine guns.
fire simulation equipment for submachine guns.
general military vehicle components.
maintenance equipment for assault rifles.
military communications equipment.
military electronic equipment.
military image intensifier equipment.

T NBC respirators.

T non-sporting shotgun ammunition.

T rifles (1) (3 licences).
semi-automatic pistols (15).
shotguns (1) (2 licences).

T shotguns (1).
shotguns (6).
shotguns (7).

T small arms ammunition.
smoothbore weapons (1).
sniper rifles (2).
software for the use of chemical agent detection equipment.
software for the use of military electronic equipment.
sporting rifles (2).
submachine guns (2).
technology for the development of military electronic equipment.
technology for the development of submarines.
technology for the use of military electronic equipment.
technology for the use of semi-automatic pistols.
technology for the use of submachine guns.
test equipment for air-to-air missiles.
test models for the development of air-to-air missiles.
training small arms ammunition.
unfinished products for military transport aircraft.

T vintage guns (1) (3 licences).
weapon cleaning equipment (2 licences).
weapon night sights.
weapon sight mounts.
weapon sights (2 licences).

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1A004	1	£600

SIELs - Permanent and Temporary (excluding Incorporation and Transhipment)

Issued

Types of goods on licence	No. of licences	Value
Military	30	£5,077,658
Non-military	2	£177,901
Total	32	£5,255,559

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML1	3	£18,921
ML2	1	£8,452
ML4	6	£346,862
ML5	6	£630,172
ML6	2	£7,858
ML9	2	£185,995
ML10	3	£2,783,361
ML11	3	£23,119
ML13	1	£720
ML16	1	£172,148
ML17	1	£900,000
ML21	1	£50

chaff (2 licences).
 components for anti-armour missiles.
 components for combat aircraft (2 licences).
 components for control equipment for man portable air defence system missiles.
 components for decoy flares (2 licences).
 components for ground based radars (4 licences).
 components for guided missile decoying equipment.
 components for military communications equipment.
 components for naval light guns.
 components for remote ground sensor systems.
 components for turrets.
 components for weapon control systems.
 general military aircraft components.
 general military vehicle components.
 general naval vessel components.
 guided missile decoy rounds.
 gun mountings.
 gun silencers.
 military electronic equipment.
 military helmets.
 naval communications equipment.
 recognition/identification equipment.
 software for the simulation of military operation scenarios.
 sporting rifles (1).
 test models for the development of combat aircraft.
 unfinished products for anti-armour missiles.

Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
0C002	1	£1
PL8001	1	£177,900

improvised explosive device jamming equipment.
products containing plutonium-239.

SIELs - Incorporation

Issued

Types of goods on licence	No. of licences	Value
Military	16	£877,492
Total	16	£877,492

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML4	3	£37,061
ML5	6	£96,794
ML6	1	£294,000
ML10	3	£35,477
ML11	2	£411,160
ML21	1	£3,000

components for aircraft radars (2 licences).
components for armoured fighting vehicles.
components for chaff equipment.
components for combat aircraft (3 licences).
components for ground based radars (3 licences).
components for guided missile decoying equipment (2 licences).
components for military electronic equipment.
components for naval radars.
software for the use of fire control equipment.
test equipment for helmet mounted display equipment.

5A002	1	£5,000

equipment employing cryptography.

Country Footnotes

- Arms trade sanctions against Rwanda were invoked by UN Security Council resolution 918 (amended by 997 and 1011). Resolution 997 extended this embargo to cover arms exports to countries neighbouring Rwanda (Burundi, DR Congo, Uganda and Tanzania) where their intended use was within Rwanda. UNSCR 1823 (2008) terminated the remaining provisions of the arms embargo related to Rwanda - implemented in the UK by The United Nations Arms Embargoes (Rwanda) (Amendment) Order 2008 which came into force 13 December 2008.

All exports for Tanzania were approved in accordance with the sanctions in place.

 T gyroscopes.
 T technology for the use of gyroscopes.

Country Footnotes

- Arms trade sanctions against Rwanda were invoked by UN Security Council resolution 918 (amended by 997 and 1011). Resolution 997 extended this embargo to cover arms exports to countries neighbouring Rwanda (Burundi, DR Congo, Uganda and Tanzania) where their intended use was within Rwanda. UNSCR 1823 (2008) terminated the remaining provisions of the arms embargo related to Rwanda - implemented in the UK by The United Nations Arms Embargoes (Rwanda) (Amendment) Order 2008 which came into force 13 December 2008.

All exports for Uganda were approved in accordance with the sanctions in place.

- animal pathogens.
- components for firing sets.
- components for improvised explosive device disposal equipment.
- devices containing tritium.
- devices for initiating explosives (3 licences).
- equipment with reduced electromagnetic emanations.
- firing sets (2 licences).
- global positioning satellite receivers.
- human pathogens (2 licences).
- improvised explosive device disposal equipment.
- T inertial equipment.
- linear cutting explosive charges.
- T marine position fixing equipment.
- mass spectrometers (4 licences).
- materials containing natural uranium.
- materials containing thorium.
- submersible vehicles.
- T submersible vehicles.
- test equipment for global positioning satellite receivers.
- thorium.
- toxins (17 licences).
- uranium isotope separation equipment.

Both Military and Non-military

Control Entry	No. of licences with goods rated using Control Entry	Value
1A004	2	£4,548
ML7	2	£38,743

- T civil NBC protection clothing.
- T civil NBC protection clothing.
- T civil NBC protection equipment.
- T NBC clothing.
- T NBC clothing.
- T NBC filters.
- T NBC protective equipment.
- T NBC respirators.

SIELs - Incorporation

Issued

Types of goods on licence	No. of licences	Value
Military	18	£4,207,147

Total	18	£4,207,147
-------	----	------------

The SIELs issued were granted for goods with the following 'Control Entries' (for permanent export except where the case summary description is preceded by a T, which indicates a Temporary Export). Please note that more than one 'Control Entry' can apply to goods on an individual licence and each 'Control Entry' is counted only once per individual licence (regardless of the number of goods that have been rated with that 'Control Entry'):

Military

Control Entry	No. of licences with goods rated using Control Entry	Value
ML5	2	£30,350
ML6	1	£306
ML10	12	£3,847,981
ML11	2	£218,810
ML15	1	£109,700
ML22	1	£0

airborne electronic warfare equipment.
 components for military aircraft head-up displays (2 licences).
 components for military aircraft pressurised breathing equipment.
 components for military training aircraft.
 components for military transport aircraft (7 licences).
 components for naval radars.
 components for optical target acquisition equipment.
 components for tanks.
 general military aircraft components.
 military navigation equipment.
 optical target acquisition equipment.
 sensor data recorders.
 technology for the use of optical target acquisition equipment.

The items being incorporated in this destination are ultimately destined for all or some of the following:

India
 Pakistan
 Qatar
 Singapore
 South Korea
 Spain
 Taiwan
 Trinidad and Tobago
 Turkey

OIELs (excluding Other OIELs)

Issued

Licences issued or where coverage was amended during the period by the inclusion or reinstatement of this destination.		
No.	Type	Goods Summary
1	P	software for optimising equipment design
2	P	technology for the development of aerial target equipment, technology for the development of air-to-surface missiles, technology for the development of combat aircraft, technology for the development of combat helicopters, technology for the development of military search and rescue aircraft, technology for the development of military surveillance aircraft, technology for the development of military training

		aircraft, technology for the development of military transport aircraft, technology for the development of military utility aircraft, technology for the development of military utility helicopters, technology for the development of surface-to-surface missiles, technology for the development of tanker aircraft, technology for the development of unmanned air vehicles, technology for the production of aerial target equipment, technology for the production of air-to-surface missiles, technology for the production of combat aircraft, technology for the production of combat helicopters, technology for the production of military search and rescue aircraft, technology for the production of military surveillance aircraft, technology for the production of military training aircraft, technology for the production of military transport aircraft, technology for the production of military utility aircraft, technology for the production of military utility helicopters, technology for the production of surface-to-surface missiles, technology for the production of tanker aircraft, technology for the production of unmanned air vehicles, technology for the use of aerial target equipment, technology for the use of air-to-surface missiles, technology for the use of combat aircraft, technology for the use of combat helicopters, technology for the use of military search and rescue aircraft, technology for the use of military surveillance aircraft, technology for the use of military training aircraft, technology for the use of military transport aircraft, technology for the use of military utility aircraft, technology for the use of military utility helicopters, technology for the use of surface-to-surface missiles, technology for the use of tanker aircraft, technology for the use of unmanned air vehicles
3	T	software for military communications equipment, technology for the use of software for military communications equipment
4	P	components for NBC clothing, NBC clothing
5	P	components for military transport aircraft
6	P	aiming devices, components for anti-aircraft guns, components for anti-armour weapons, components for anti-riot guns, components for assault rifles, components for combat shotguns, components for general purpose machine guns, components for grenade launchers, components for gun laying equipment, components for heavy machine guns, components for large calibre artillery, components for launching equipment for anti-armour rockets, components for mortars, components for revolvers, components for rifles, components for semi-automatic pistols, components for shotguns, components for small calibre artillery, components for sniper rifles, components for submachine guns, components for weapon day and night sights, components for weapon night sights, components for weapon sights, general military vehicle components, gun laying equipment, gun mountings, maintenance equipment for anti-aircraft guns, maintenance equipment for anti-armour weapons, maintenance equipment for anti-riot guns, maintenance equipment for assault rifles, maintenance equipment for combat shotguns, maintenance equipment for general purpose machine guns, maintenance equipment for grenade launchers, maintenance equipment for heavy machine guns, maintenance equipment for large calibre artillery, maintenance equipment for launching equipment for anti-armour rockets, maintenance equipment for mortars, maintenance equipment for revolvers, maintenance equipment for rifles, maintenance equipment for semi-automatic pistols, maintenance equipment for shotguns, maintenance equipment for small calibre artillery, maintenance equipment for sniper rifles, maintenance equipment for submachine guns, military electronic equipment, technology for the use of anti-aircraft guns, technology for the use of anti-armour weapons, technology for the use of anti-riot guns, technology for the use of assault rifles, technology for the use of combat shotguns, technology for the use of general purpose machine guns, technology for the use of grenade launchers, technology for the use of heavy machine guns, technology for the use of large calibre artillery, technology for the use of launching equipment for anti-armour rockets, technology for the use of mortars, technology for the use of revolvers, technology for the use of rifles, technology for the use of semi-automatic pistols, technology for the use of shotguns, technology for the use of small calibre artillery, technology for the use of sniper rifles, technology for the use of submachine guns, test equipment for aiming devices, test equipment for gun laying equipment, weapon cleaning equipment, weapon day and night sights, weapon night sights, weapon sight mounts, weapon sights
7	P	hydrophones, towed hydrophone arrays
8	P	general military aircraft components

Revoked

Licences revoked or whose coverage was amended during the period by the removal of items and/or destinations.		
No.	Type	Goods Summary
1	P	air guns, components for air guns, components for revolvers, components for semi-automatic pistols, components for shotguns, components for sporting rifles, revolvers, semi-automatic pistols, shotguns, sporting gun ammunition, sporting rifles
