**Legionella Molecular Scheme –
Preliminary Intended Results Notification**

These results are provided for guidance and are determined from the examinations undertaken during quality control testing of the samples. The quantification results may show minor variations from the final results, which are calculated from the participants' consensus results, and included in the distribution report.

Distribution: **LM6** Samples: **LM6A and LM6B**

Intended results:

		LM6A	LM6B
Isolation of legionellae		Detected	Detected
Identification		<i>Legionella pneumophila</i>	<i>Legionella</i> spp. not <i>pneumophila</i>
Quantification GU L⁻¹ (Genomic units per Litre)	<i>L. pneumophila</i>	1.9x10 ⁴	Not detected (LOD <1.25x10 ²)
	<i>Legionella</i> spp.	1.6x10 ⁴	8.9x10 ³

FEPTU's results were obtained using: Biorad iQ-Check screen *L. pneumophila*, Biorad iQ-Check screen *Legionella* spp. and Biorad iQ-Check *Legionella* quantification standards kits.

Sample contents:

LM6A	<i>L. pneumophila</i> serogroup 1, <i>Aerococcus viridans</i> and <i>Brevundimonas vesicularis</i>
LM6B	<i>Legionella bozemanii</i> and <i>Brevibacillus laterosporus</i>

Laboratory identification numbers of participants who did not return results this distribution: 233, 1001, 1267, 1915, 2077, 2135 and 2539

The distribution report providing details of your individual performance and an analysis of all participants' results will be dispatched within three weeks. The report may also include sample specific comments.

Repeat samples are available for up to one year from date of this letter for participants who experienced problems with any of the examination. There is no need to wait until you have received the report to order repeat samples.

The next distribution of Legionella Molecular Scheme samples will be dispatched during the week beginning 9 March 2020.

If you require any technical advice or wish to make comments or suggestions relating to the scheme please contact us.
