

**Virus proficiency testing scheme –
Preliminary Intended Results Notification**

These results are provided for guidance and are determined from the examinations undertaken during quality control testing of the samples. The quantification results may show minor variations from the final results, which are calculated from the participants' consensus results, and included in the distribution report.

Distribution: **NHV006** Samples: **NHV0011 and NHV0012**

Intended results:

		NHV0011	NHV0012
Virus	GI	Negative	Positive
	GII	Positive	Negative
	HAV	Negative	Positive
Quantity (copies/per sample)	GI	-	6.2x10 ³
	GII	49	-
	HAV	-	1.9x10 ⁴

qRT-PCR was carried out using the RNA UltraSense™ One-Step Quantitative RT-PCR System (ThermoFisher), on a Stratagene Mx3005P real-time PCR machine

Laboratory identification numbers of participants who did not return results this distribution:
463, 744 and 1267

The distribution report providing details of your individual performance and an analysis of all participants' results will be dispatched shortly. The report may also include sample specific comments.

The next distribution of the Virus testing scheme samples will be dispatched during the week beginning 17 February 2020.

Repeat samples are available for participants who experienced problems with any of the examinations and wish to make a further attempt or repeat a count. There is no need to wait until you have received the report to order repeat samples.
