

Upper Fowey and Pont Pill MCZ

Description:

The Upper Fowey and Pont Pill Marine Conservation Zone (MCZ) consist of two spatially separate areas. These estuary sites located on the Cornish coast protects a total area of 2 km² making it one of the smallest MCZs. The larger area protects the upper tidal reaches of the Fowey estuary extending to Lostwithiel and including the River Lerryn, Penpoll Creek and Bodmin Pill. The smaller area protects Pont Pill, a tributary estuary flowing into the Fowey on the Eastern side near Polruan.

Qualifying Features:

Upper Fowey and Pont Pill MCZ hosts the following features: intertidal coarse sediment, intertidal mud, low energy intertidal rock, coastal salt marshes and saline reedbeds, estuarine rocky habitats, sheltered muddy gravels, and intertidal sand and muddy sand.

Management:

- Bait collection (soft crabs) is managed by the [Harbour Authority](#).
- Locals are good at 'reporting' offenders, but this is a well-defined managed area.
- [Friends of Fowey Estuary Shore Group](#) take an interest and survey/monitor trends.
- Commercial kayak operators monitor and report issues on the estuary.

Stakeholder Concerns:

There were very few stakeholder concerns as the over-collection of bait is managed. With the estuary mostly inaccessible with steep rocky shores and mudflats, terrestrial impacts are minimal.

MPA: Upper Fowey and Pont Pill MCZ				No. Stakeholders: 0 online & 1 workshop
