National Ambulance

Syndromic Surveillance System:
England

12 November 2019   **Year: 2019   Week: 45**

Data summary:
Daily total syndromic counts and number of English ambulance trusts for which data is included in this bulletin.

Key messages   Data to: 10 November 2019

During week 45 there was nothing new to report.

A Cold Watch System operates in England from 1 November to 31 March each year. As part of the Public Health England Cold Weather Plan for England the PHE Real-time Syndromic Surveillance Team will be monitoring the impact of cold weather on syndromic surveillance data during this period.

Cold weather alert level (current reporting week): **Level 1 Winter preparedness**

http://www.metoffice.gov.uk/weather/uk/coldweatheralert/

Syndromic indicators at a glance:

Indicator		Calls*	Trend[†]	Level[‡]
Breathing problems		15,026	decreasing	above baseline levels
Heat/ cold exposure		60	no trend	similar to baseline levels
Falls/ back injuries - traumatic		12,935	no trend	above baseline levels
Cardiac	Cardiac/ respiratory arrest	2,017	no trend	above baseline levels
	Chest pain	12,148	no trend	above baseline levels
Overdose/ ingestion/ poisoning		3,744	decreasing	above baseline levels
Unconscious/ passing out		7,930	no trend	above baseline levels

* Number of syndromic calls received by PHE in the reporting week

[†] Trend is defined as the overall activity over the last few weeks

[‡] Current activity in comparison to historical baselines, which have been constructed using data from 1 January 2018

Day	Trusts*	Week 45
Monday	10	16,308
Tuesday	10	15,123
Wednesday	10	15,087
Thursday	10	14,853
Friday	10	15,058
Saturday	10	15,136
Sunday	10	15,304
Total	**(max) 10**	**106,869**

* Ambulance Trusts (England) submitting daily syndromic surveillance data included in report

1

12 November 2019   **Year: 2019   Week: 45**
1: Total syndromic calls.

The total number of syndromic calls recorded each day, all ages, England.

2: Breathing problems.

Daily number of calls related to 'breathing problems', England.

2a: Breathing problems: severity of illness.

Percentage of daily breathing problems calls categorised as emergency or life threatening.

* 7-day moving average adjusted for bank holidays.

2

3: Heat/cold exposure.

Daily number of calls related to 'heat/ cold exposure, England.

4: Falls/ back injury - traumatic.

Daily number of calls related to 'falls/ back injury - traumatic', England.

5: Cardiac/respiratory arrest.

Daily number of calls related to 'cardiac/ respiratory arrest', England.

* 7-day moving average adjusted for bank holidays.

12 November 2019   **Year: 2019   Week: 45**
6: Chest pain.

Daily number of calls related to 'chest pain', England.

7: Overdose/ ingestion/ poisoning.

Daily number of calls related to 'overdose/ ingestion/ poisoning', England.

8: Unconscious/ Passing out.

Daily number of calls related to 'unconscious', England.

* 7-day moving average adjusted for bank holidays.

Introduction to charts:

- A 7-day moving average (adjusted for bank holidays) is overlaid on the daily data reported in each chart, unless specified.
- Baselines have been constructed using historical data since 1 January 2018.
- National ambulance syndromic surveillance (NASS) call data are analysed by the Real-time Syndromic Surveillance Team (ReSST) on a daily basis to identify national and regional trends. A statistical algorithm underpins each syndromic surveillance system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team

---

Notes and further information:

Coverage:

- Total syndromic calls includes all calls where the chief presenting complaint can be mapped to one of the syndromic indicators monitored by Public Health England.
- Some indicators are not routinely presented in this report.
- Total syndromic calls is lower than the total number of calls received by ambulance trusts.

Description of included NASS indicators:

- **Breathing Problems:** persons finding it difficult to breathe.
- **Heat/Cold Exposure:** heat or cold exposure.
- **Falls/Back Injuries - traumatic:** persons falling or having a back injury.
- **Cardiac/Respiratory Arrest:** persons who have stopped or have ineffective breathing or/and no pulse.
- **Chest Pain:** persons experiencing chest pain or chest discomfort.
- **Overdose/Ingestion/Poisoning:** overdoses, ingestion of a substance or poisoning.
- **Unconscious/Passing out:** persons who are unconscious, not alert or fainting.

Acknowledgements:

We would like to thank:

- North East, North West, Yorkshire, East Midlands, West Midlands, East of England, London, South East Coast, South Central, and South Western NHS Ambulance Trusts for submitting anonymised, daily data to the National Ambulance Syndromic Surveillance system
- The Association of Ambulance Chief Executives for their support in establishing this system.
