No: .....

 $O_{1}$ 

EXPORT OF TURKEY HATCHING EGGS AND DAY OLD TURKEY POULTS TO IRAN HEALTH CERTIFICATE EXPORTING COUNTRY: UNITED KINGDOM (GREAT BRITAIN AND NORTHERN IRELAND) FOR COMPLETION BY: OFFICIAL VETERINARIAN

## I. Number and identification of the birds/Hatching eggs\*

Number	Species	Breed		

# II. Origin of the birds/hatching eggs

- a) Name and address of exporter:
- b) Address(es) of premises of origin:

c) \* Address of hatchery:

#### III. Destination of the birds/hatching eggs

a) Name and address of consignee in Iran:

b) Means of transportation:

## IV. Health Information

I, the undersigned, certify that the day old poults/hatching eggs described above meet the following requirements:

- a) there has been no history or clinical evidence of the following diseases in the flock(s) of origin during the past 6 months:
  viral anaemia (inclusion body hepatitis), lymphoid leucosis, viral arthritis, egg drop syndrome (EDS 76), avian encephalomyelitis, ,
  mycoplasma (M.gallisepticum, M.synoviae), avian leucosis virus (subgroup J), Newcastle disease, Marek's disease, tuberculosis, reticuloendotheliosis, avian chlamydiosis (ornithosis), psittacosis;
- b)\* there has been no history or clinical evidence of the following diseases in the hatchery during the past 6 months: viral anaemia (inclusion body hepatitis), lymphoid leucosis, viral arthritis, egg drop syndrome (EDS 76), avian encephalomyelitis, , mycoplasma (M.gallisepticum, M.synoviae), avian leucosis virus (subgroup J), Newcastle disease, Marek's disease, tuberculosis, reticuloendotheliosis, avian chlamydiosis (ornithosis), psittacosis;
- c) blood samples have been taken from a random sample of the birds comprising the flock(s) of origin and sent to a government approved laboratory where they were submitted to either the rapid serum plate test or the haemagglutination inhibition (HI) test for Mycoplasma (M.gallisepticum, M.meleagridis, M.synoviae) with negative results in each case;
- d) the flock(s) of origin is/are member(s) of a Government supervised Poultry Health Scheme, according to which they have been routinely tested for the following diseases with negative results in each case during the past 6 months:
   Salmonella pullorum, Salmonella gallinarum, Salmonella arizonae, and Mycoplasma gallisepticum and Mycoplasma meleagridis;
- e) (if necessary a separate schedule may be attached) the birds, comprising the flocks of origin have been vaccinated against the following diseases, using authorised products in accordance with the manufacturers instructions;

DISEASE	VACCINE USED	DATE

- f) there has been no history or clinical evidence of the following diseases in the flock(s) of origin during the past 30 days: infectious coryza, pasteurellosis, fowl pox, infectious laryngotracheitis, fowl cholera, Gumboro disease;
- g)\* the hatchery is subject to regular monitoring and is considered free from Salmonella (S.gallinarum, S.pullorum) Mycoplasma (M.synoviae, M.gallisepticum, M.meleagridis), Chlamydias, Aspergillus and clinical outbreaks of yolk sac infections as determined by regular clinical inspection and post-mortem examination, in accordance with the O.I.E standards described in chapter 6.4 of the Terrestrial Animal Health Code;
- h) the birds comprising the flock(s) of origin show no signs of feed deficiencies;
- i) no outbreak of Newcastle disease has been confirmed by the Department on the premises of origin or the hatchery, or within a radius of 25 km thereof, during the past 6 months.
- j) neither the flocks of origin nor the hatchery are situated in any zone which has been defined by OIE (World Organisation for Animal Health) at the time of despatch as a Highly Pathogenic Notifiable Avian Influenza (HPNAI)-affected zone.
- V. This certificate is valid for 15 days.
- \* Delete in the case of hatching eggs.
